Step 3: Mount Wall Plate to the Wall

Determine the desired height for your TV. Use a stud finder to locate the center of the wooden studs if installing on a wooden wall. Mark the drilling locations for the wall plate. Drill pilot holes and securely fasten the wall plate to the wall using the appropriate screws and anchors for your wall type. Use the included spirit level to ensure the wall plate is perfectly horizontal.

Step 4: Hang TV onto Wall Plate

With assistance, carefully lift the TV and hook the TV brackets onto the wall plate. Ensure the brackets are properly seated on the wall plate's rails.

7. MAINTENANCE

- Regularly check all screws and connections on the wall mount and TV brackets to ensure they remain tight and secure.

8. TROUBLESHOOTING

Issue: TV is not level after installation.

Solution:

- Check the wall plate installation for levelness using a spirit level. If the wall plate is not level, you may need to re-adjust its position.

Issue: Difficulty adjusting tilt.

Solution:

- Ensure the pull cords are fully engaged to release the lock mechanism before attempting to tilt the TV.
- Check for any obstructions behind the TV or between the TV and the wall mount that might be preventing movement.

Issue: Missing parts or damaged components.

Solution:

- Refer to the 'Package Contents' section to verify all included items.
