FEELWORLD T7

FEELWORLD T7 7 Inch IPS 4K HDMI Camera Field Monitor User Manual

Model: T7 | Brand: FEELWORLD

Introduction

The FEELWORLD T7 is a high-quality 7-inch IPS field monitor designed to assist photographers and videographers in achieving precise focus and exposure. Featuring a Full HD 1920x1200 resolution, 4K HDMI input and output, and a durable aluminum housing, it offers a clear and reliable viewing experience for various shooting environments. This manual provides comprehensive instructions for setting up, operating, maintaining, and troubleshooting your T7 monitor.

Setup

1. Unboxing and Initial Inspection

Carefully remove all components from the packaging. Verify that all standard accessories are included:

- Mini HDMI Cable
- Sunshade
- F970 Battery Plate
- Hot Shoe Mount
- Operation Manual

2. Powering the Monitor

The T7 monitor can be powered using an F970 series battery (not included) or via a DC 12V power adapter (not included). Attach the F970 battery plate to the rear of the monitor. Insert a compatible battery into the plate, ensuring it clicks securely into place.

3. Mounting the Monitor

Attach the hot shoe mount to your camera's hot shoe. Securely fasten the monitor to the hot shoe mount using the 1/4"-20 thread socket located at the bottom of the monitor. Adjust the angle for optimal viewing.

Operating the Monitor

1. Basic Controls and Menu Navigation

The T7 monitor features intuitive buttons for navigation and function control. Use the MENU button to access the main menu, and the arrow keys (up/down/left/right) to navigate through options. The F1/F2 buttons are user-definable for quick access to frequently used functions.

2. Key Features for Exposure and Focus

The T7 monitor includes several advanced features to assist with accurate exposure and focus:

- **Peaking Focus Assist:** Highlights in-focus areas with a selectable color (Red, Green, Blue) for precise manual focusing.
- **False Colors:** Displays different exposure levels as distinct color overlays, helping to identify overexposed or underexposed areas.
- **Histogram:** Provides a graphical representation of the tonal distribution in your image, aiding in exposure analysis.
- **Exposure:** Overexposure warning.
- **Anamorphic Mode:** Supports various anamorphic de-squeeze ratios.
- **Nine Grid:** Assists with composition using a rule-of-thirds grid.
- **Embedded Audio:** Monitors audio levels from the HDMI input.
- **Zoom-in:** Magnifies a portion of the image for critical focus.
- **Pixel-to-Pixel:** Displays the image at its native resolution without scaling.
- **Check Field:** Allows viewing individual color channels (Red, Green, Blue, Mono).
- **Image Flip:** Flips the image horizontally or vertically, useful for various mounting orientations.

3. Display Adjustments

The T7 monitor features a 7-inch IPS screen with 1920x1200 Full HD resolution, 450cd/m2 brightness, and a 1200:1 contrast ratio. You can adjust various display settings through the menu to suit your preferences and shooting conditions. The 160° wide viewing angles IPS panel ensures consistent image quality from different perspectives.

Maintenance

1. Cleaning Instructions

To clean the monitor screen, use a soft, lint-free cloth. For stubborn smudges, lightly dampen the cloth with a screen-cleaning solution. Avoid using harsh chemicals or abrasive materials that could damage the screen or housing. Keep the ports free of dust and debris.

2. Storage Recommendations

When not in use, store the FEELWORLD T7 monitor in a dry, cool place away from direct sunlight and extreme temperatures. Use the provided sunshade or a protective case to prevent scratches and impacts to the screen.

Troubleshooting

If you encounter issues with your FEELWORLD T7 monitor, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
No Signal displayed	Incorrect HDMI connection, camera not outputting signal, incorrect input selected.	Ensure HDMI cable is securely connected to both devices. Verify camera HDMI output settings. Check monitor's input source.
Monitor does not power on	Low battery, incorrect power adapter, faulty battery plate.	Charge or replace battery. Use a compatible DC 12V power adapter. Ensure battery plate is correctly installed.
Image is distorted or incorrect aspect ratio	Incorrect aspect ratio setting on monitor or camera.	Adjust the Aspect Ratio setting in the monitor's menu. Check camera's output aspect ratio.
Screen is too dim or too bright	Brightness/Contrast settings are incorrect.	Adjust Brightness and Contrast settings in the monitor's menu.
