1. INTRODUCTION

The Victor M1 Smart-Kill Wi-Fi Electronic Mouse Trap provides an efficient and humane solution for mouse control. This innovative trap utilizes high-voltage shock to eliminate mice and features Wi-Fi connectivity to alert you of a catch via your mobile device. The unique design ensures no-touch, no-see disposal, making rodent management cleaner and more convenient.

2. SAFETY INFORMATION

- **Indoor Use Only:** This trap is designed for indoor use only. Do not expose to outdoor elements or moisture.
- **2.4GHz Routers Only:** The Wi-Fi functionality is compatible only with 2.4GHz routers. Ensure your network meets this requirement for proper connectivity.
- **Battery Operated:** The trap requires 4 AA batteries (not included). Ensure correct battery insertion and replace depleted batteries promptly.
- **Safety Switch:** A built-in safety switch deactivates the trap when opened, helping to protect children and pets from accidental contact with the electrified plates. Always ensure the trap is turned off before handling or cleaning.
- **Placement:** Place the trap in areas with high rodent activity, ensuring the entrance is accessible to mice but away from areas easily accessed by children and pets.
- **No-Touch Disposal:** The trap is designed for no-touch, no-see disposal. Avoid direct contact with captured rodents.

3. PRODUCT FEATURES

The Victor M1 Smart-Kill Electronic Mouse Trap offers advanced features for effective and convenient mouse control:

- **Wi-Fi Connectivity:** Receive instant kill alerts and monitor trap status directly on your mobile device via the user-friendly app.
- **High-Voltage Shock:** Delivers a humane, high-voltage shock for a 100% kill rate.
- **No-Touch, No-See Disposal:** The unique tunnel design and removable kill chamber allow for easy and hygienic disposal of rodents without direct contact.
- **Advanced Smart Circuit Technology:** Senses when a mouse enters the tunnel, triggering the shock system.
- **Beveled Columns:** Hold the mouse in place over the electrified plates to prevent escapes.
- **Built-in Safety Switch:** Deactivates the trap when opened, enhancing safety for children and pets.
- **Reusable Design:** The trap is reusable after proper cleaning and re-baiting.

5. SETUP

Follow these steps to set up your Victor M1 Smart-Kill Electronic Mouse Trap:

1. Install Batteries:

Open the battery compartment located on the underside of the trap. Insert 4 AA batteries (not included), ensuring correct polarity. Close the compartment securely.

2. Download the App:

Download the free Victor Smart-Kill app from the App Store (iOS) or Google Play Store (Android) on your mobile device.

3. Power On the Trap:

Press the power button on the trap. The green 'V' indicator light should blink three times, indicating it's powered on.

4. Connect to Wi-Fi:

Open the Victor Smart-Kill app and follow the on-screen instructions to connect your trap to your home Wi-Fi network. Ensure your router operates on the 2.4GHz band.

You will need to press and hold the Wi-Fi button on the trap for 5 seconds. The Wi-Fi button will blink blue 10 times while connecting. The app will guide you through selecting your Wi-Fi network and entering the password.

5. Link the Trap:

Scan the QR code located on the bottom of the trap using the app, or manually enter the 15-digit alphanumeric code to link the trap to your account.

6. Name Your Trap:

After successful connection, name your trap within the app (e.g., "Kitchen Trap," "Attic Trap") for easy

6. OPERATING INSTRUCTIONS

1. Baiting the Trap:

Open the removable kill chamber by lifting the lid away from you. Apply a small amount of high-protein bait, such as peanut butter or hazelnut spread, to the bait cup located inside the trap. Close the kill chamber securely.

2. Placing the Trap:

Place the trap in an area where you have observed mouse activity. Position the trap with the entrance hole flush against a wall, as mice tend to travel along walls.

Figure 6: Proper placement of the trap against a wall.

Figure 7: Example of trap placement in a common area.

3. Activating the Trap:

Ensure the trap is powered on. The trap is now ready to detect and eliminate mice.

4. Monitoring and Alerts:

When a mouse is caught, the trap will send a notification to your mobile device via the Victor Smart-Kill app. The app will display "Rodent Caught" and indicate the trap's location.

Receive Kill Alerts On Your Mobile Device

Figure 8: Mobile app displaying a "Rodent Caught" alert.

5. Disposing of a Catch:

Once an alert is received, turn off the trap using the power button. Take the trap to a trash receptacle. Open the removable kill chamber away from you to dispose of the dead mouse without touching or seeing it. Close the chamber.

7. MAINTENANCE

• Cleaning:

After each catch, it is recommended to clean the kill chamber. With the trap turned off and the kill chamber open, wipe down the electrified plates and interior surfaces with a damp cloth or paper towel. Ensure the trap is completely dry before re-baiting and re-activating.

• Re-baiting:

Reapply fresh bait to the bait cup as needed to maintain effectiveness.

• Battery Replacement:

The app will monitor battery life and send alerts when batteries are low. Replace all 4 AA batteries when indicated to ensure continuous operation.

8. TROUBLESHOOTING

Problem	Possible Cause / Solution
Trap not connecting to Wi-Fi	Ensure your Wi-Fi router is operating on the 2.4GHz band. The trap is not compatible with 5GHz networks. Verify that the trap is within range of your Wi-Fi router. Check that the Wi-Fi password entered in the app is correct. Try resetting the trap and repeating the connection process. Ensure the app is updated to the latest version.
Short battery life	Ensure you are using fresh, high-quality AA batteries. Leaving a captured rodent in the trap for an extended period may drain batteries faster. Dispose of catches promptly. Extreme temperatures can affect battery performance.
Trap not catching mice	Verify that the trap is baited with an attractive, high-protein bait (e.g., peanut butter). Ensure the trap is placed in an area with confirmed mouse activity, with the entrance against a wall. Check that the trap is powered on and the indicator light is functioning correctly. Clean the trap thoroughly, as residual odors can deter new mice.
No app notifications	Check your phone's notification settings to ensure the Victor Smart-Kill app has permission to send alerts. Verify that your trap is successfully connected to Wi-Fi and the app. Ensure your mobile device has an active internet connection.

9. WARRANTY AND SUPPORT

For detailed warranty information and customer support, please refer to the official Victor website or contact their customer service department. Keep your purchase receipt for warranty claims.
