## CLP Toulouse

# CLP Toulouse Fabric Office Chair User Manual

Model: Toulouse

## 1. INTRODUCTION

---

Thank you for choosing the CLP Toulouse Fabric Office Chair. This manual provides essential information for the safe and efficient assembly, operation, and maintenance of your new office chair. Please read these instructions carefully before use and retain them for future reference.

The CLP Toulouse office chair is designed for versatility and comfort in various settings, including offices, meeting rooms, and study areas. Its compact design without armrests offers enhanced freedom of movement, making it suitable for smaller spaces. Key features include adjustable height, comfortable fabric upholstery, and a stable chrome-effect metal base with smooth-gliding casters.

## 2. PACKAGE CONTENTS

---

Before assembly, please ensure all components are present and undamaged. If any parts are missing or damaged, contact customer support.

- Seat and Backrest Assembly (1)
- Gas Lift Cylinder (1)
- Star Base (1)
- Casters (5)
- Assembly Hardware (screws, washers, Allen key)

## 3. SETUP AND ASSEMBLY

---

Assembly typically requires one person and approximately 15-30 minutes. No additional tools are usually required beyond what is provided.

1. **Attach Casters to Base:** Insert each of the five casters into the holes at the end of each leg of the star base. Push firmly until they click into place.
2. **Insert Gas Lift:** Place the gas lift cylinder into the central hole of the star base. Ensure it is seated securely.
3. **Attach Seat to Gas Lift:** Carefully align the central mechanism under the seat with the top of the gas lift cylinder. Lower the seat onto the gas lift, applying gentle pressure to secure it.
4. **Test Stability:** Once assembled, sit on the chair to ensure all components are properly connected and

stable.

A front-side view of the CLP Toulouse Fabric Office Chair. The chair features comfortable brown fabric upholstery, a sturdy chrome-plated metal base, and five durable casters designed for easy movement across various floor surfaces without causing scratches.

## 4. OPERATING INSTRUCTIONS

---

The CLP Toulouse office chair offers simple adjustments for personalized comfort.

- **Height Adjustment:** To adjust the seat height, locate the lever under the right side of the seat. While seated, pull the lever upwards to lower the seat. To raise the seat, stand up and pull the lever upwards. Release the lever at the desired height.
- **Swivel Function:** The chair is designed to swivel 360 degrees, allowing for easy rotation and access to different areas of your workspace.

- **Mobility:** The five smooth-gliding casters allow the chair to move freely across various floor surfaces, including tiles, parquet, and insulated floors, without leaving scratches.

## 5. MAINTENANCE

---

Proper care will extend the life and appearance of your chair.

- **Fabric Upholstery:** For general cleaning, vacuum the fabric surfaces with a suitable upholstery attachment. For spills or stains, gently wipe with a cotton cloth dampened with warm water. Avoid harsh chemicals or abrasive cleaners.
- **Metal Base:** Clean the chrome-effect metal base with a cloth dipped in a mild, non-corrosive rinsing solution. Dry immediately with a clean cloth to prevent water spots.
- **Casters:** Periodically check casters for hair or debris that may hinder smooth movement. Clean as needed.
- **General Inspection:** Regularly check all screws and connections to ensure they are tight. Retighten if necessary.

## 6. TROUBLESHOOTING

---

Here are solutions to common issues you might encounter:

- **Chair Squeaks:** Check all screws and bolts for tightness. A small amount of silicone spray on moving parts (excluding the gas lift cylinder) may help.
- **Difficulty Adjusting Height:** Ensure the gas lift lever is fully engaged. If the gas lift is unresponsive, it may need replacement.
- **Chair Wobbles:** Verify that the star base is fully assembled and all casters are securely inserted. Ensure the gas lift is properly seated in the base and seat mechanism.
- **Casters Not Rolling Smoothly:** Inspect casters for trapped debris (hair, lint, etc.) and clean them.
