Balboa Water Group 11746

Balboa MVP260 Control Panel Overlay User Manual

Model: 11746

INTRODUCTION

This manual provides instructions for the proper installation and care of your Balboa MVP260 Control Panel Overlay. This overlay is designed to replace worn or damaged overlays on compatible Balboa control panels, restoring the appearance and functionality of your hot tub's control interface.

PRODUCT OVERVIEW

The Balboa MVP260 Control Panel Overlay (Model 11746) is an adhesive-backed decal that adheres to the surface of your hot tub's control panel. It features clearly labeled buttons for Jets, Light, Cool, and Warm functions, ensuring intuitive operation of your spa.

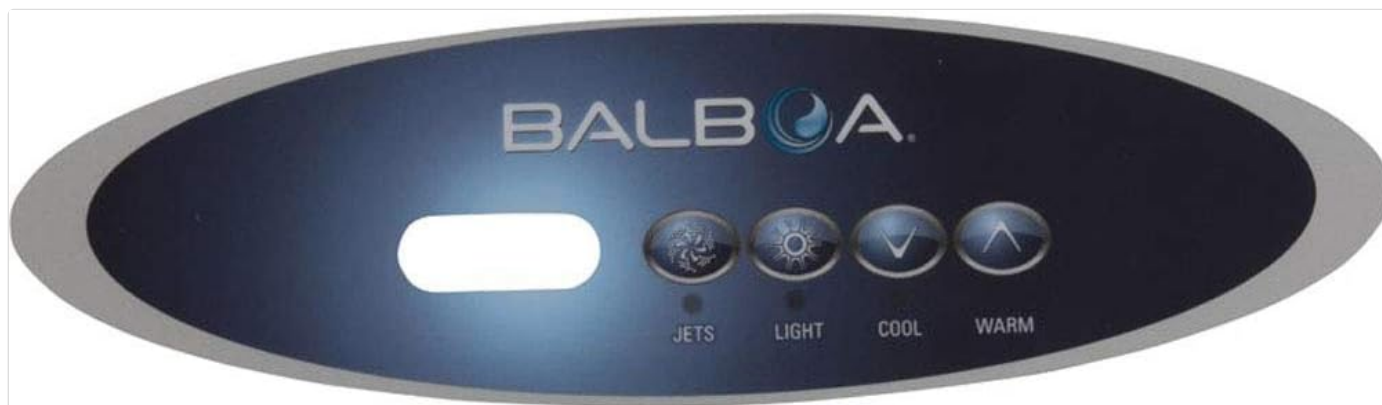

Image 1: Front view of the Balboa MVP260 Control Panel Overlay, showing the button labels for Jets, Light, Cool, and Warm, along with the Balboa logo.

Image 2: Back view of the Balboa MVP260 Control Panel Overlay, revealing the 3M adhesive backing and the cutouts for the control panel buttons.

INSTALLATION (SETUP)

Proper installation is crucial for the longevity and appearance of your new overlay. Follow these steps carefully:

1. **Preparation:** Ensure the hot tub is powered off and the control panel is dry. Carefully remove the old overlay.
2. **Cleaning the Surface:** Thoroughly clean the control panel surface where the new overlay will be applied. Use isopropyl alcohol to remove any adhesive residue, dirt, or oils. Allow the surface to dry completely before proceeding. A clean, dry surface is essential for strong adhesion.
3. **Peeling the Backing:** Carefully peel off the protective backing from the new Balboa MVP260 overlay. Avoid touching the adhesive surface with your fingers to prevent transferring oils.
4. **Alignment:** Align the new overlay precisely with the existing button cutouts and edges of the control panel. Take your time to ensure perfect alignment before pressing down.
5. **Application:** Once aligned, gently press the overlay onto the control panel, starting from one end and working your way across. Apply firm, even pressure to ensure the adhesive bonds securely to the entire surface, especially around the button areas.
6. **Curing:** Allow the adhesive to cure for at least 24 hours before exposing the control panel to water or heavy use. This ensures maximum bond strength.

OPERATION

The Balboa MVP260 Control Panel Overlay provides clear labeling for the following functions:

- **JETS:** Activates or deactivates the spa's jet pump(s). Pressing this button typically cycles through different jet speeds or turns them on/off.
- **LIGHT:** Controls the spa's internal lighting system. Pressing this button usually turns the lights on/off or cycles through different light modes/colors.
- **COOL:** Decreases the set temperature of the spa water.
- **WARM:** Increases the set temperature of the spa water.

Refer to your hot tub's main control system manual for detailed instructions on specific button sequences and advanced features.

MAINTENANCE

To ensure the longevity and appearance of your control panel overlay:

- **Cleaning:** Clean the overlay regularly with a soft, damp cloth. Use mild, non-abrasive cleaners. Avoid harsh chemicals, solvents, or abrasive materials, as these can damage the overlay's surface and print.
- **Sunlight Exposure:** While designed for outdoor use, prolonged direct sunlight exposure can eventually lead to fading. Consider using a spa cover when not in use to protect the control panel.
- **Avoid Sharp Objects:** Do not use sharp objects or excessive force on the overlay, as this can scratch or puncture the material.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Overlay not sticking properly	Surface not clean or dry; insufficient pressure during application; low ambient temperature during installation.	Ensure the control panel surface is thoroughly cleaned with isopropyl alcohol and completely dry before application. Apply firm, even pressure across the entire overlay. Install in a warm environment if possible.
Bubbles under the overlay	Uneven application; trapped air.	Apply the overlay slowly and evenly, starting from one edge and smoothing it out to the opposite side to push out air. For small bubbles, you may gently try to push them towards the edge.
Buttons not responding after installation	Overlay not aligned correctly over buttons; underlying control panel issue.	Verify the overlay is perfectly aligned with the physical buttons on the control panel. If alignment is correct, the issue may be with the control panel itself, not the overlay. Consult a qualified technician.

SPECIFICATIONS

- **Model:** Balboa MVP260 Control Panel Overlay
- **Part Number:** 11746
- **Dimensions:** 1.9 x 6.6 x 0.1 inches (approximate)
- **Weight:** 0.317 ounces (approximate)
- **Compatibility:** Designed for Balboa MVP260/VL260 control panels.
- **Features:** Jets, Light, Cool, Warm button labels.

WARRANTY INFORMATION

This Balboa Water Group product is typically covered by a limited manufacturer's warranty against defects in materials and workmanship. Specific warranty terms and duration may vary. Please retain your proof of purchase. For detailed warranty information, contact Balboa Water Group or your authorized dealer.

Note: Damage due to improper installation, misuse, or neglect is generally not covered under warranty.

CUSTOMER SUPPORT

For technical assistance, installation questions, or warranty claims, please contact your product retailer or the manufacturer, Balboa Water Group.
