## 4. SETUP AND INSTALLATION

Follow these steps to install your new HQRP 1043 Wick Humidifier Filter:

1. **Step 1:** Disconnect the power supply to your humidifier and open the top cover.
2. **Step 2:** Remove the fixed frame (if applicable) and carefully remove the old filter.
3. **Step 3:** Place the new HQRP 1043 filter into the fixed frame, ensuring it is seated correctly.
4. **Step 4:** Restore the humidifier components and turn on the power to use.

For best performance, fill the humidifier tank with distilled water to extend the service life of the filter and prevent mineral buildup.

## 6. MAINTENANCE

Regular replacement of your humidifier wick filter is crucial for optimal performance and hygiene. The HQRP 1043 filter is designed for easy replacement without special tools.

- **Replacement Frequency:** It is recommended to replace the humidifier filter every 1-2 months,

depending on usage and water hardness. At a minimum, replace it once per season.

- **Water Quality:** Using distilled water can significantly extend the life of your filter by reducing mineral buildup.

## Perfect absorption and maximizing moisture output

### 7. TROUBLESHOOTING

If you experience issues with your humidifier after installing the HQRP 1043 Wick Filter, consider the following:

- **Reduced Moisture Output:** Ensure the filter is fully saturated with water. If the filter is old or heavily calcified, it may need replacement.
- **White Dust:** While the filter is designed to reduce white dust, excessive mineral content in your water can still lead to some residue. Using distilled water is highly recommended.
- **Odor:** An unusual odor may indicate bacterial growth in the water tank or on the filter. Clean the humidifier thoroughly and replace the filter.
- **Filter Fit:** Double-check that the filter is correctly seated in its designated slot within the humidifier.
