Silverline SS0001-ZP

Silverline SS0001-ZP 5 x 16mm Dual Steel Shelf Support Peg Instruction Manual

Model: SS0001-ZP

INTRODUCTION

This manual provides comprehensive instructions for the proper installation, use, and maintenance of your Silverline SS0001-ZP 5 x 16mm Dual Steel Shelf Support Pegs. Please read these instructions carefully before use to ensure safe and effective operation.

The Silverline SS0001-ZP shelf support pegs are designed for use in cabinets with pre-drilled holes, providing sturdy support for shelves. They are constructed from durable steel for long-lasting performance.

PRODUCT COMPONENTS

Each pack contains Silverline SS0001-ZP Dual Steel Shelf Support Pegs. The pegs measure 5mm in diameter and 16mm in length.

Figure 1: A single Silverline SS0001-ZP Dual Steel Shelf Support Peg. This image shows the full length of the peg, highlighting its cylindrical shape and the central collar that acts as a stop for insertion into pre-drilled holes.

SETUP AND INSTALLATION

Follow these steps for proper installation of the shelf support pegs:

1. **Preparation:** Ensure the cabinet or furniture unit has pre-drilled holes of the appropriate diameter (5mm) for the pegs. The holes should be clean and free of debris.
2. **Insertion:** Gently insert the narrow end of the shelf support peg into a pre-drilled hole. Apply firm, even pressure until the central collar of the peg rests flush against the cabinet wall. Do not force the peg, as this may damage the cabinet or the peg.
3. **Placement:** Install four pegs for each shelf, one in each corner where the shelf will rest. Ensure all four pegs are at the same height to provide a level surface for the shelf.
4. **Shelf Placement:** Carefully place the shelf onto the installed pegs, ensuring it sits securely and evenly on all four supports.

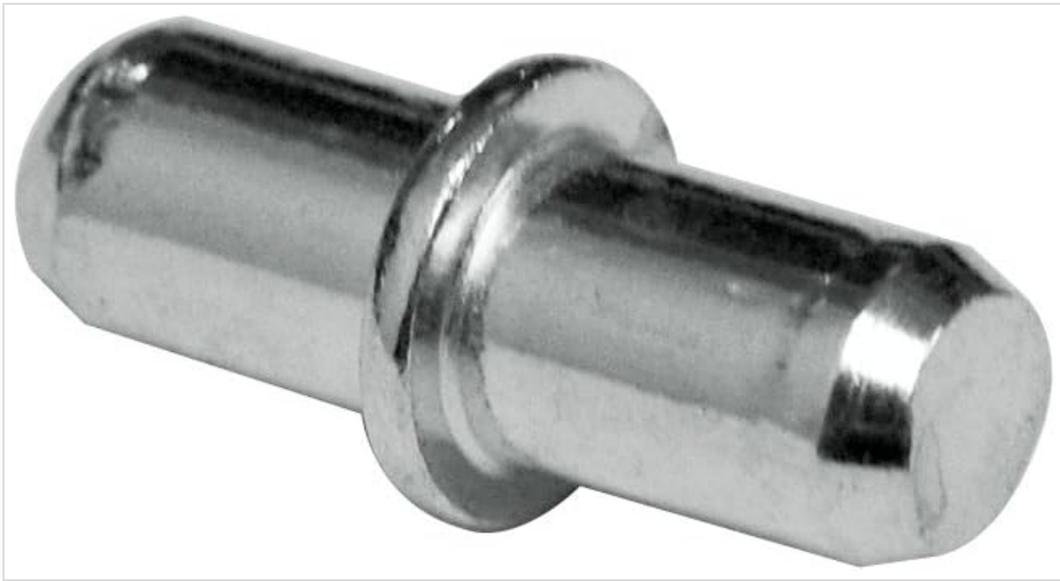

Figure 2: A close-up view of the Silverline SS0001-ZP shelf support peg, showing its design with a tapered end for easy insertion and a wider collar for secure seating. This image illustrates the peg's structure, which facilitates stable shelf support.

OPERATING INSTRUCTIONS

Once installed, the Silverline SS0001-ZP shelf support pegs function passively to hold shelves in place. No active operation is required.

- **Weight Distribution:** Distribute the weight of items on the shelf evenly to prevent undue stress on individual pegs.
- **Shelf Adjustment:** To adjust shelf height, remove the shelf, then carefully pull out the pegs from their holes. Reinsert the pegs into new pre-drilled holes at the desired height, ensuring they are level, before replacing the shelf.

MAINTENANCE

The Silverline SS0001-ZP shelf supporting pegs require minimal maintenance.

- **Cleaning:** Wipe the pegs with a dry or slightly damp cloth if they become dusty or dirty. Avoid abrasive cleaners or harsh chemicals, which could damage the steel finish.
- **Inspection:** Periodically inspect the pegs for any signs of wear, bending, or corrosion. While made of steel, extreme moisture or chemical exposure could affect their integrity.
- **Replacement:** If a peg shows signs of damage or weakness, replace it immediately to maintain shelf stability and safety.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Shelf is wobbly or uneven.	Pegs are not fully inserted or are at different heights.	Remove the shelf and ensure all pegs are fully inserted and level. Use a level tool if necessary.
Pegs are difficult to insert.	Holes may be too small or obstructed.	Verify hole diameter (should be 5mm). Clear any debris from the holes. Do not force pegs.
Pegs fall out easily.	Holes may be too large or worn.	Consider using a different set of holes or a different type of shelf support if the holes are permanently enlarged.

SPECIFICATIONS

- **Model:** SS0001-ZP
- **Material:** Steel
- **Dimensions:** 5mm (diameter) x 16mm (length)
- **Application:** Shelf support for cabinets with pre-drilled holes
- **Manufacturer:** Decor Hardware (for Silverline)
- **Date First Available:** January 17, 2018
