- **Gender:** Men's

- **Rx-Able:** Designed to accommodate prescription lenses.
- **Origin:** Made In Italy

SETUP AND INITIAL USE

Your Tom Ford eyeglasses are ready for use upon receipt. However, for optimal comfort and vision, professional fitting by an optician is highly recommended.

Professional Fitting

An optician can adjust the frame to fit your face shape, ensuring the bridge sits comfortably on your nose and the temples rest securely behind your ears. This adjustment is crucial for preventing slippage and discomfort.

Lens Installation

These frames are designed to be Rx-Able. Take your eyeglasses to a certified optician for the installation of your prescription lenses. Ensure the optician uses appropriate tools and techniques to avoid damaging the frame.

OPERATING INSTRUCTIONS

Wearing Your Eyeglasses

- Always use both hands to put on and take off your eyeglasses to prevent bending the temples or frame.
- Ensure the eyeglasses sit evenly on your face, with the bridge resting comfortably on your nose and the temples extending straight back to your ears.

Adjusting for Comfort

Minor adjustments can sometimes be made by gently bending the temple tips. However, for significant adjustments or if you experience discomfort, consult a professional optician to avoid damaging the frame.

CARE AND MAINTENANCE

Cleaning Your Lenses and Frame

1. Rinse your eyeglasses under lukewarm running water to remove dust and debris. Avoid hot water, as it can damage lens coatings.
2. Apply a small drop of mild dish soap (lotion-free) to each lens.
3. Gently rub the lenses and frame with your fingertips to clean them.
4. Rinse thoroughly to remove all soap residue.
5. Dry the lenses and frame with a clean, soft microfiber cloth, preferably the one provided with your eyeglasses. Avoid using paper towels, tissues, or clothing, as these can scratch the lenses.

Storage

When not in use, always store your eyeglasses in their protective case to prevent scratches and damage. Avoid leaving them in direct sunlight or extreme temperatures (e.g., on a car dashboard), as this can warp the frame or damage lens coatings.

Handling Precautions

- Do not place your eyeglasses face down on any surface.

- Avoid contact with harsh chemicals, solvents, or abrasive materials.
- Do not attempt to repair bent frames or loose screws yourself unless you have the proper tools and expertise. Consult an optician.

TROUBLESHOOTING

Issue	Possible Cause	Solution
Eyeglasses keep slipping down nose.	Frame is too wide or temples are not properly adjusted.	Visit an optician for professional adjustment of the nose pads or temples.
Lenses appear dirty or smudged after cleaning.	Improper cleaning technique or use of unsuitable cleaning materials.	Ensure you are using a mild soap and a clean microfiber cloth. Avoid abrasive materials.
Frame feels too tight behind ears.	Temples are bent too tightly or are too short.	Consult an optician for temple adjustment.
Screws on hinges are loose.	Normal wear and tear.	Gently tighten with a small eyewear screwdriver. Do not overtighten. If unsure, visit an optician.

SPECIFICATIONS

Attribute	Detail
