GUESS U1132G1

GUESS Watch User Manual

MODEL: U1132G1

Comfortable Gold-Tone Black Stain Resistant Silicone Watch with Crystal Embellished Day, Date + 24 Hour
Military/Int'l Time

INTRODUCTION

This manual provides essential information for the proper use, setup, and maintenance of your GUESS U1132G1 watch. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

The GUESS U1132G1 is a sophisticated timepiece featuring a gold-tone case with crystal accents, a black silicone strap, and a multi-function dial displaying day, date, and 24-hour military/international time. It is designed for durability and style.

PRODUCT OVERVIEW

Figure 1: Front view of the GUESS U1132G1 watch. This image highlights the gold-tone case, the black crystal chrono-look dial, and the crystal embellishments around the bezel and on the strap.

Figure 2: The GUESS U1132G1 watch as worn on a wrist. This perspective demonstrates the watch's 46mm case size and how it appears when worn, complementing casual attire.

Figure 3: Side profile of the GUESS U1132G1 watch. This view illustrates the thickness of the gold-tone case and the design of the crown and pushers on the side.

Figure 4: Detail of the gold-tone buckle on the black silicone strap. This image highlights the quality and finish of the buckle mechanism, designed for secure and comfortable wear.

SETUP

Initial Time and Date Setting

1. **Pull out the Crown:** Gently pull the crown (the knob on the side of the watch) to its outermost position. This will stop the second hand.
2. **Set the Time:** Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time. Ensure you account for AM/PM if your watch has a 24-hour indicator.
3. **Set the Date:** Push the crown in one click to the middle position. Rotate the crown to adjust the date display. If your watch has a day display, this may also be adjusted in this position by rotating the crown in the opposite direction.
4. **Set 24-Hour Military/Int'l Time:** The 24-hour sub-dial typically synchronizes with the main time setting. Ensure the main time is set correctly for this sub-dial to display accurately.
5. **Push in the Crown:** Once the time and date are set, push the crown back into its original position. The second hand will resume movement.

Battery Information

Your GUESS U1132G1 watch is powered by a Japanese Quartz Movement and includes a battery. The battery is pre-installed and should provide reliable operation for an extended period. When the battery requires replacement, it is recommended to have it serviced by a qualified watch technician to ensure proper sealing and water resistance.

OPERATING INSTRUCTIONS

Understanding the Dial Functions

- **Main Hands:** Hour, minute, and second hands indicate the current time.
- **Day Sub-dial:** Displays the current day of the week.
- **Date Sub-dial:** Displays the current day of the month.
- **24-Hour Military/Int'l Time Sub-dial:** Shows the time in a 24-hour format, synchronized with the main time. This is useful for distinguishing between AM and PM, especially in military or international contexts.

Water Resistance

This watch is water resistant to 100 meters (300 feet). This rating means the watch is suitable for recreational surfing, swimming, snorkeling, sailing, and water sports. It is *not* suitable for diving.

Important: Do not operate the crown or pushers when the watch is wet or submerged in water. Ensure the crown is fully pushed in before exposing the watch to water.

MAINTENANCE

Cleaning Your Watch

- **Case and Crystal:** Wipe the gold-tone case and mineral crystal with a soft, lint-free cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying. Avoid harsh chemicals or abrasive materials.
- **Silicone Strap:** The black silicone strap is stain resistant. Clean it with mild soap and water, then rinse thoroughly and

dry completely. Avoid prolonged exposure to direct sunlight or extreme temperatures, which can degrade the material over time.

Storage

When not wearing your watch, store it in a cool, dry place away from direct sunlight, extreme temperatures, and strong magnetic fields. The original watch box is ideal for storage.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch is not running or stops intermittently.	Battery depleted. Crown is pulled out.	Replace battery (professional service recommended). Push crown fully in.
Date or Day changes at noon instead of midnight.	Time is set incorrectly (AM/PM).	Advance the time by 12 hours.
Condensation inside the crystal.	Exposure to extreme temperature changes or moisture ingress.	Seek professional service immediately to prevent damage.
Strap feels uncomfortable or causes irritation.	Strap is too tight or not cleaned regularly.	Adjust strap for comfort. Clean strap regularly as per maintenance instructions.

SPECIFICATIONS
