5. Maintenance

Proper maintenance will ensure the longevity and continued aesthetic appeal of your ZINUS Dachelle Platform Bed Frame.

- **Cleaning:** Wipe the upholstered surfaces with a dry cloth to remove dust and light debris. For deeper cleaning, consult a professional upholstery cleaner or use a mild fabric cleaner suitable for upholstered furniture.
- **Spills:** Blot spills immediately with a clean, dry cloth. Do not rub, as this can spread the stain.
- **Structural Check:** Periodically inspect all bolts and connections to ensure they are tight. Re-tighten if necessary to maintain stability and prevent squeaking.
- **Avoid Direct Sunlight:** Prolonged exposure to direct sunlight may cause the fabric color to fade over time.

6. Troubleshooting

If you encounter any issues with your ZINUS Dachelle Platform Bed Frame, refer to the common troubleshooting tips below:

Common Issues:

- **Squeaking Noises:** Squeaking often indicates loose connections. Re-tighten all assembly bolts, especially those connecting the side rails to the headboard and footboard, and the center support beam. Ensure the wooden slats are properly seated and the Velcro is securely attached.
- **Instability/Wobbling:** Verify that the bed frame is on a flat, level surface. Check all leg attachments and frame connections for tightness. Ensure the center support legs are making firm contact with the floor.
- **Mattress Sagging:** While the wooden slats are designed for excellent support, ensure your mattress is compatible with a slat foundation. If sagging persists, inspect the slats for any damage or displacement.

If these troubleshooting steps do not resolve the issue, please contact Zinus Customer Support for further assistance.
