Introduction

This manual provides essential instructions for the safe and efficient operation, maintenance, and care of your OVENTE 3-in-1 Electric Sandwich Maker, Model GPI302B. This versatile appliance is designed for preparing sandwiches, waffles, and grilled items using interchangeable non-stick plates. Please read all instructions thoroughly before first use and retain this manual for future reference.

Important Safeguards

When using electrical appliances, basic safety precautions should always be followed to reduce the risk of fire, electric shock, and/or injury to persons, including the following:

- Read all instructions before operating the appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against electrical hazards, do not immerse the cord, plugs, or the appliance itself in water or other liquids.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts, and before cleaning the appliance.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner. Contact customer service for examination, repair, or adjustment.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors.
- Do not let the cord hang over the edge of a table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.

- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Always attach the plug to the appliance first, then plug the cord into the wall outlet. To disconnect, turn any control to 'off', then remove the plug from the wall outlet.
- Do not use the appliance for other than intended use.

Setup

1. **Unpacking:** Carefully remove the appliance and all accessories from the packaging. Retain packaging for storage or disposal.
2. **Initial Cleaning:** Before first use, wipe the exterior of the appliance with a damp cloth. Wash the interchangeable plates with warm, soapy water, rinse thoroughly, and dry completely. The plates are also dishwasher safe.
3. **Plate Installation:** Ensure the appliance is unplugged and cool. Select the desired cooking plates (sandwich, waffle, or grill). Align the tabs on the plates with the slots on the appliance base and lid, then gently press down until they click securely into place.
4. **Placement:** Place the appliance on a stable, heat-resistant, and dry surface, away from walls or other heat-sensitive materials. Ensure adequate ventilation around the unit.

Operating Instructions

General Operation

1. Ensure the correct plates are installed and securely locked.
2. Close the lid and plug the appliance into a standard 120V electrical outlet. The red indicator light will illuminate, signaling that the appliance is heating.
3. Allow the appliance to preheat. The green indicator light will illuminate when the desired cooking temperature is reached, indicating the unit is ready for use.
4. Carefully open the lid using the cool-touch handle.
5. Place your food onto the bottom cooking plate. Do not overfill.
6. Close the lid. The green indicator light may turn off and on during cooking as the thermostat maintains the temperature.
7. Cook for the recommended time or until desired doneness is achieved. Cooking times will vary based on food type and personal preference.
8. Once cooking is complete, carefully open the lid and remove food using a heat-resistant plastic or wooden utensil to avoid damaging the non-stick coating.
9. Unplug the appliance from the outlet and allow it to cool completely before cleaning or storing.

Using Sandwich Plates

For best results, lightly butter or spray the outer sides of your bread with cooking oil. Place two slices of bread with your desired filling onto the bottom sandwich plates. Close the lid and cook until the sandwich is golden brown and sealed, typically 3-5 minutes.

Using Waffle Plates

Pour approximately 1/2 to 3/4 cup of waffle batter onto the center of each bottom waffle plate. Close the lid and cook until the waffles are golden brown and steam stops escaping, typically 4-7 minutes. Adjust cooking time for desired crispness.

Using Grill Plates

Lightly brush the grill plates with cooking oil or spray. Place items such as burgers, steaks, chicken, or vegetables onto the bottom grill plate. Close the lid for contact grilling or leave open for an open-face grill. Cook until desired doneness, flipping items if necessary for even cooking when using an open-face grill.

Maintenance and Cleaning

Proper cleaning and maintenance will extend the life of your appliance.

1. **Always Unplug:** Ensure the appliance is unplugged from the power outlet and completely cool before attempting any cleaning.
2. **Remove Plates:** To remove the cooking plates, locate the plate release buttons (usually on the side or front of the unit) and press them while gently lifting the plates.
3. **Clean Plates:** The non-stick plates can be washed by hand with warm, soapy water and a soft sponge or cloth. Rinse thoroughly and dry completely. Alternatively, the plates are dishwasher safe for convenience. Do not use abrasive cleaners, scouring pads, or metal utensils on the non-stick surface.
4. **Clean Exterior:** Wipe the exterior of the appliance with a damp cloth. Do not immerse the main unit in water or any other liquid.
5. **Storage:** Once clean and dry, reinstall the plates or store them separately. The appliance can be stored

upright to save space.

Troubleshooting

Problem	Possible Cause	Solution
Appliance does not heat up.	Not plugged in; power outlet malfunction; appliance malfunction.	Ensure the appliance is securely plugged into a working outlet. Check the circuit breaker. If the issue persists, contact customer service.
Food sticks to the plates.	Plates not properly seasoned; insufficient oil/butter; food residue buildup.	Ensure plates are clean. Lightly grease plates with cooking oil or butter before adding food. Do not use metal utensils.
Green indicator light does not turn on.	Appliance not preheated; thermostat issue.	Allow sufficient time for preheating (typically 3-5 minutes). If the red light is on but green never illuminates after adequate time, contact customer service.
Uneven cooking.	Uneven food placement; too much food; lid not fully closed.	Distribute food evenly on the plates. Avoid overfilling. Ensure the lid is closed properly to allow even heat distribution.
