SAFETY INFORMATION

- Ensure all components are present and undamaged before assembly. Do not use if any parts are missing or broken.
- For wall mounting, use appropriate hardware for your wall type and ensure the cabinet is securely fastened to prevent tipping. Professional installation is recommended if you are unsure.
- When hanging over a door, verify that the door can close properly without obstruction and that the hooks are stable.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- The LED lights require 3 AAA batteries (not included). Ensure correct battery polarity and do not mix old and new batteries or different battery types. Remove batteries if the unit will not be used for an extended period.

2. **Mark Drilling Points:** Hold the cabinet against the wall at the desired height. Use a pencil to mark the positions for the mounting brackets. Ensure the marks are level.
3. **Drill Holes:** Drill pilot holes at the marked positions. Insert wall anchors if necessary (for drywall or plaster).
4. **Attach Brackets:** Secure the wall mounting brackets to the wall using the provided screws.
5. **Mount Cabinet:** Carefully lift the cabinet and align the pre-drilled holes on the back of the cabinet with the wall brackets. Secure the cabinet to the brackets using the remaining screws.
