

## Technical Precision MAXSTAR

# Technical Precision Replacement Light Bulb for Brinkmann MAXSTAR - User Manual

## INTRODUCTION

---

This manual provides instructions for the Technical Precision replacement light bulb designed for use with Brinkmann MAXSTAR devices. Please read this manual carefully before installation and use to ensure proper function and safety.

An image of the Technical Precision replacement light bulb, featuring a clear glass dome and a metal base with two contact points.

## SETUP AND INSTALLATION

---

Follow these steps to safely install your new light bulb:

1. Ensure the device is powered off and unplugged before attempting to replace the bulb.
2. Allow the old bulb to cool completely if it was recently in use.
3. Carefully remove the old bulb from its socket. Refer to your device's original manual for specific removal instructions if needed.
4. Insert the new Technical Precision replacement bulb into the socket, ensuring it is seated firmly and correctly. Do not overtighten.

5. Restore power to the device.

**Caution:** Handle the bulb by its base to avoid touching the glass, as oils from your skin can reduce bulb life.

## OPERATION

---

This replacement bulb operates identically to the original Brinkmann MAXSTAR bulb.

- Once installed, activate your device as usual.
- The bulb will illuminate when power is supplied.
- This bulb is designed for immediate full brightness upon activation.

**Note:** The light source type is Xenon, providing a bright and clear illumination.

## MAINTENANCE

---

The Technical Precision replacement bulb requires minimal maintenance.

- Periodically inspect the bulb for any signs of damage or wear.
- If cleaning is necessary, ensure the device is off and the bulb is cool. Gently wipe the glass with a soft, dry, lint-free cloth. Do not use liquid cleaners.
- Replace the bulb if it flickers, dims significantly, or fails to illuminate.

**Warning:** Do not attempt to disassemble the bulb.

## TROUBLESHOOTING

---

Problem	Possible Cause	Solution
Bulb does not light up	No power to device	Check power connection and device's power source.
Bulb does not light up	Bulb not properly seated	Ensure the bulb is fully inserted into the socket.
Bulb does not light up	Defective bulb	Replace with a new bulb.
Bulb flickers	Loose connection	Ensure the bulb is securely seated in the socket.
Bulb flickers	Device issue	Consult your device's manual or a qualified technician.

If issues persist after following these steps, contact Technical Precision customer support.
