7. TROUBLESHOOTING

If you encounter issues with your SR-K801 keyboard, refer to the following common solutions:

    - Ensure the USB receiver is securely plugged into a working USB port.

    - Try plugging the USB receiver into a different USB port on your device.
    - Restart your computer or device.

- **Keys are sticky or unresponsive:**
    - Clean around and under the affected keys using compressed air or a soft brush to remove debris.
    - Ensure no liquid has been spilled on the keyboard. If so, allow it to dry completely before use.

- **Multimedia keys not working:**
    - Ensure you are pressing the **Fn** key simultaneously with the desired F-key.
    - Check your operating system's settings for keyboard shortcuts or media key configurations.
    - Some applications may not fully support all multimedia functions.
