## Setup

Follow these steps to set up your EPtech AC Adapter/Charger:

1. **Verify Compatibility:** Ensure the voltage and connector type of the adapter match your device's requirements. This adapter is specifically designed for the Acoustic Research Glendale AWSEE2 Wireless Bluetooth Speaker.
2. **Connect to Device:** Plug the DC output connector of the adapter firmly into the power input port of

your device.

3. **Connect to Power Outlet:** Insert the AC input plug of the adapter into a standard wall power outlet (100-240VAC).
4. **Power On Device:** Once connected, you can power on your device as usual.

## Operating

The EPtech AC Adapter/Charger operates automatically once connected. It provides a stable power supply to your compatible device. No user intervention is required during operation.

- The adapter is designed for continuous operation within its specified limits.
- It may become warm during prolonged use; this is normal. However, if it becomes excessively hot, disconnect it immediately and contact support.

## Maintenance

To ensure the longevity and proper functioning of your adapter:

- **Cleaning:** Disconnect the adapter from the power outlet and your device before cleaning. Use a soft, dry cloth to wipe the surface. Do not use liquid cleaners or aerosols.
- **Storage:** Store the adapter in a cool, dry place when not in use. Avoid wrapping the cord too tightly around the adapter.
- **Inspection:** Periodically inspect the power cord and adapter casing for any signs of damage, such as cuts, fraying, or cracks. If damage is found, discontinue use and replace the adapter.

## Troubleshooting

If you encounter issues with your EPtech AC Adapter/Charger, try the following solutions:

- **No Power to Device:**
  - Ensure the adapter is securely plugged into both the wall outlet and your device.
  - Check if the wall outlet is functional by plugging in another device.
  - Verify that your device's power input port is clean and free of debris.

- **Adapter is Hot:**

- A warm adapter is normal. If it's excessively hot, disconnect it immediately. Ensure it's not covered or in an enclosed space that prevents proper ventilation.
- Confirm that the connected device is not drawing more power than the adapter's rated output.

- **Device Not Charging/Operating Properly:**

- Confirm the adapter's specifications (voltage, amperage) match your device's requirements.
- Try restarting your device.
- Inspect the adapter's cable and connector for any visible damage.

If problems persist after trying these steps, please contact customer support.
