Hampton Bay NXT-1770

Hampton Bay Solar Bronze Outdoor Integrated LED Pathway Light Set (6-Pack)

Model: NXT-1770

Introduction

This instruction manual provides important information for the proper setup, operation, and maintenance of your Hampton Bay Solar Bronze Outdoor Integrated LED Pathway Light Set. Please read this manual thoroughly before installation and retain it for future reference.

Safety Information

- Always handle solar lights with care.
- Do not attempt to disassemble or modify the product beyond routine maintenance.
- Keep batteries away from children. If swallowed, seek medical attention immediately.
- Dispose of old batteries according to local regulations. Do not dispose of batteries in fire, as they may explode.
- Ensure the solar panel is clean and free from obstructions to maximize charging efficiency.
- Do not install near flammable materials or in areas prone to flooding.

Package Contents

Verify that all components are present in your package:

- 6 x Solar Pathway Lights (Integrated LED)
- 6 x Ground Stakes
- 6 x AA Rechargeable Batteries (pre-installed)

Setup

Follow these steps to set up your solar pathway lights:

1. **Unpack Components:** Carefully remove all items from the packaging.
2. **Activate Light:** Locate the ON/OFF switch, usually found near the battery compartment or under the solar panel. Ensure the switch is in the "ON" position.
3. **Attach Ground Stake:** Securely attach the ground stake to the bottom of each light fixture.

4. **Select Location:** Choose an outdoor location that receives at least 6-8 hours of direct sunlight daily. Avoid shaded areas, as this will reduce charging efficiency and illumination time.
5. **Install Light:** Gently push the assembled light, with the stake, into the ground. Ensure the light is stable and upright. Do not force the light into hard ground; if necessary, loosen the soil first.

An image showing a single Hampton Bay solar pathway light, featuring a bronze finish, a glass light housing, and a ground stake.

Operating Instructions

The Hampton Bay Solar Pathway Lights are designed for automatic operation:

- **Initial Charge:** Allow the lights to charge for a full 24-48 hours in direct sunlight before first use to ensure the battery is fully charged.
- **Automatic Operation:** Once fully charged and the switch is in the "ON" position, the lights will automatically turn on at dusk and turn off at dawn.
- **Light Duration:** The duration of illumination depends on the amount of sunlight received during the day. Longer

charging times result in longer illumination.

Maintenance

Regular maintenance ensures optimal performance and longevity of your solar lights:

- **Cleaning Solar Panel:** Periodically wipe the solar panel with a soft, damp cloth to remove dirt, dust, or debris. A clean solar panel ensures maximum sunlight absorption for efficient charging.
- **Battery Replacement:** The included AA rechargeable batteries have a limited lifespan. If the lights begin to dim or illuminate for shorter periods, it may be time to replace the batteries. Use only **rechargeable AA batteries** of the same voltage and capacity. To replace, carefully open the battery compartment (usually located under the solar panel), remove the old battery, and insert the new one, observing correct polarity (+/-).
- **Winter Care:** In areas with heavy snow or prolonged periods of low sunlight, you may choose to bring the lights indoors during winter months to protect them and extend battery life.

Troubleshooting

If your solar lights are not functioning as expected, refer to the following common issues and solutions:

Problem	Possible Cause	Solution
Light does not turn on at night.	• Switch is OFF. • Insufficient sunlight. • Battery is depleted or faulty. • Solar panel is dirty.	• Ensure the ON/OFF switch is in the "ON" position. • Relocate the light to an area with more direct sunlight. • Allow 24-48 hours for initial charge. Replace battery if necessary. • Clean the solar panel.
Light illuminates for a short duration.	• Insufficient sunlight. • Battery capacity reduced. • Solar panel is dirty.	• Ensure the light receives full, direct sunlight. • Replace the rechargeable AA battery. • Clean the solar panel.
Light is dim.	• Battery is not fully charged. • Battery is old or faulty.	• Ensure adequate charging time. • Replace the rechargeable AA battery.

Specifications

Feature	Detail
Brand	Hampton Bay
Model Number	NXT-1770
Power Source	Solar Powered

Feature	Detail
Light Source Type	Integrated LED
Color Temperature	3000K
Material	Bronze, Metal, Glass
Finish Type	Metal
Indoor/Outdoor Usage	Outdoor
Mounting Type	Ground Mount
Batteries	6 x AA rechargeable batteries (included)
Voltage	6 Volts
Unit Count	6 Count
Assembly Required	No
Item Weight	6.39 pounds (for the set)
UPC	842674009367

Warranty and Support

For warranty information or technical support, please refer to the product packaging or contact Hampton Bay customer service directly. Keep your purchase receipt as proof of purchase.
