## SETUP INSTRUCTIONS

---

Assembly of your mDesign shoe rack is required and designed to be straightforward. All necessary hardware and easy-to-follow instructions are included in the package.

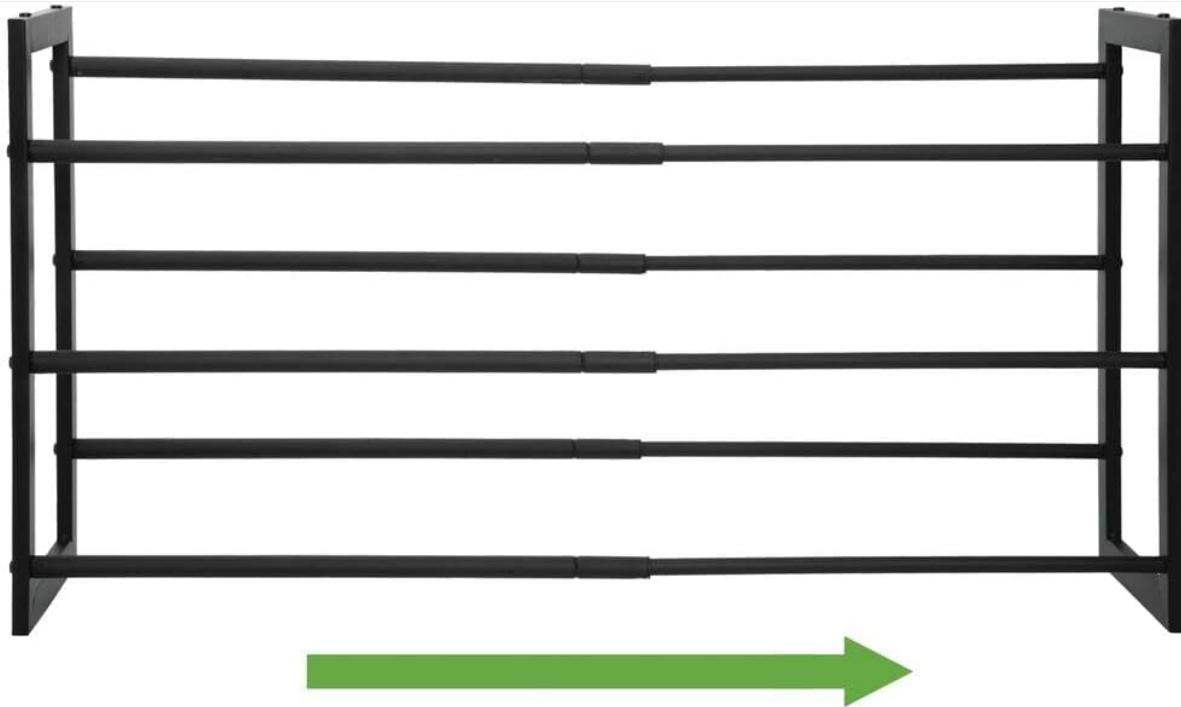

### Package Contents:

- Side frames (2)
- Adjustable horizontal rods (6)
- Assembly hardware (screws, plastic feet)
- Instruction sheet

### Assembly Steps:

1. Unpack all components and verify against the package contents list.
2. Attach the horizontal rods to the side frames using the provided screws. Ensure all connections are secure.
3. Insert the plastic feet into the bottom of the side frames to protect your floors.
4. To expand the rack, gently pull the inner rods outwards until the desired width is achieved. The rack expands

from 18.25 inches up to 32 inches wide.

## EXPANDS UP TO 31" WIDE

### OPERATING INSTRUCTIONS

---

Once assembled, the shoe rack is ready for use. Its design accommodates various types of footwear, from flats and sneakers to boots.

#### Placing Footwear:

- Place shoes on the horizontal rods. The angled design helps keep shoes securely in place.
- The three tiers maximize vertical storage, keeping shoes and boots off the floor.
- The expandable width allows you to adjust the rack to fit the number of shoes you need to store, providing up to 31 inches of usable space per level.

## MAINTENANCE

To ensure the longevity and appearance of your mDesign shoe rack, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the rack clean with a dry cloth as needed. For tougher dirt, a slightly damp cloth can be used, followed by immediate drying.
- **Avoid Harsh Chemicals:** Do not use abrasive cleaners or harsh chemicals, as these may damage the finish.
- **Regular Inspection:** Periodically check all screws and connections to ensure they remain tight and secure.

## TROUBLESHOOTING

If you encounter any issues with your shoe rack, please refer to the following common solutions:

Problem	Possible Cause	Solution
Rack feels unstable or wobbly	Loose assembly screws or uneven placement.	Ensure all screws are tightened securely. Place the rack on a flat, level surface.
Difficulty expanding/contracting the rack	Dust or debris in the sliding mechanism.	Clean the sliding parts with a dry cloth. Apply a small amount of silicone lubricant if necessary.
Screws not seating properly during assembly	Misaligned parts or manufacturing defect.	Double-check alignment. If screws still do not seat, contact customer support for replacement hardware.
Rack tipping over	Exceeded weight limit or improper weight distribution.	Do not exceed the maximum weight limit of 10 kilograms (22.1 pounds). Distribute weight evenly across the tiers.
