MAINTENANCE AND CARE

To ensure the longevity and appearance of your bamboo spice rack, follow these care instructions:

- **Cleaning:** Wipe the surface with a damp cloth. For more thorough cleaning, use a mild soap and water solution.
- **Drying:** After washing, ensure the rack is completely dry to prevent moisture damage.
- **Avoid Submersion:** Do not submerge the bamboo rack in water, as this can cause warping or damage to the material.
- **Stain and Odor Resistance:** Bamboo naturally resists stains and odors, simplifying routine cleaning.

TROUBLESHOOTING

Rack Appears Slightly Unstable (Wobble)

In some instances, the expandable sections may exhibit a slight forward-and-back movement or 'wobble' when empty or lightly loaded. This is typically due to the design of the sliding grooves, which are engineered to allow for smooth expansion and retraction. This minor movement does not generally affect the rack's stability or functionality once items are placed on it, as the weight of the items will help to stabilize the unit.

- **Solution:** Place items evenly across the tiers. The weight of spice jars or other contents will typically secure the rack and minimize any perceived wobble.
- **Placement:** Ensure the rack is placed on a completely flat and level surface. Uneven surfaces can exacerbate any instability.
