Rabbit Air SPA-780N

Rabbit Air MinusA2 Air Purifier User Manual

Model: SPA-780N

INTRODUCTION

The Rabbit Air MinusA2 is an advanced HEPA air purifier designed to significantly improve indoor air quality. It features a sophisticated six-stage filtration and deodorization system, effectively capturing allergens, dust, mold, smoke, VOCs, and odors. This unit is suitable for large rooms and can be used as a standalone device or mounted on a wall, offering versatile placement options for homes and businesses.

SETUP AND INSTALLATION

Follow these steps for initial setup and filter installation to ensure optimal performance of your MinusA2 air purifier.

Unboxing and Initial Preparation

1. Carefully remove the air purifier from its packaging.
2. Place the unit on a flat, stable surface or prepare for wall mounting.
3. Locate the Quick Start Guide and read the initial filter installation instructions.

Filter Installation

The MinusA2 utilizes a multi-stage filtration system. Ensure all filters are unwrapped and correctly installed before operating the unit.

1. Remove the front panel by gently pulling it from the bottom and lifting it up.
2. Remove the filter case by grasping the handles on either side and pulling it forward. Lay the filter case on a flat surface.
3. Pull the tabs on the front of the Pre-Filter to remove it.
4. Remove the white Medium Filter from its black frame. Discard the plastic wrapping and return the filter to its frame.
5. Remove the BioGS HEPA Filter and discard plastic wrapping.
6. Remove the Activated Carbon Filter and discard plastic wrapping.
7. Remove the empty Customized Filter frame from the case. Locate the Customized Filter set aside from the case. Insert the filter into its frame. Make sure the front of the filter is facing up. Refer to your Customized Filter chart to identify the front of your filter.
8. Reinstall all filters in the correct order: Pre-Filter, Medium Filter, BioGS HEPA Filter, Activated Carbon Filter, and Customized Filter.
9. Close the filter case and reattach the front panel.

OPERATING INSTRUCTIONS

Your MinusA2 air purifier offers various modes and settings for optimal air purification.

Control Panel Overview

The control panel, located on the side of the unit, allows you to manage all functions. Refer to Figure 3 for a visual guide.

- **Power Button:** Turns the unit on or off.
- **Fan Speed:** Adjusts the fan speed (Silent, Low, Medium, High, Turbo).
- **Mode Button:** Toggles between Auto Mode and Pollen Mode.
- **Mood Light:** Controls the ambient light bar.
- **Air Quality Indicator:** Changes color to reflect current air quality.
- **Filter Replacement Indicator:** Illuminates when filters need replacement.
- **Filter Reset Button:** Resets the filter timer after replacement.

Modes of Operation

- **Auto Mode:** The unit automatically adjusts fan speed based on detected air quality. This is the recommended setting for continuous operation.
- **Pollen Mode:** Optimized for detecting and removing pollen, adjusting fan speed accordingly.
- **Sleep Mode:** Reduces fan speed to the lowest setting and dims lights for quiet operation during sleep.

Smart App Control (WIFI Models)

For models with WIFI capability, you can control your air purifier remotely using the Rabbit Air App.

- Download the "Rabbit Air" app from the App Store or Google Play.
- Follow the in-app instructions to connect your MinusA2 to your home WIFI network.
- Once connected, you can monitor air quality, adjust settings, and schedule operations from your smartphone or tablet.

MAINTENANCE

Regular maintenance ensures the longevity and efficiency of your Rabbit Air MinusA2 air purifier.

Filter Cleaning and Replacement

- **Pre-Filter:** Clean the Pre-Filter monthly by vacuuming or rinsing with water. Ensure it is completely dry before reinstallation.
- **Medium Filter, BioGS HEPA Filter, Activated Carbon Filter, Customized Filter:** These filters are not washable and should be replaced approximately every 12 months, depending on usage and air quality. The Filter Replacement Indicator on the control panel will illuminate when replacement is due.
- After replacing filters, press and hold the Filter Reset Button on the control panel until the indicator light turns off.

General Cleaning

- Wipe the exterior of the unit with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Ensure the air intake and outlet vents are free from dust and obstructions.

TROUBLESHOOTING

If you encounter issues with your MinusA2 air purifier, refer to the common problems and solutions below.

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Unit does not turn on.	Power cord not properly connected; no power from outlet.	Ensure power cord is securely plugged into the unit and a working electrical outlet. Check circuit breaker.
Airflow is weak or no air comes out.	Filters are clogged; plastic wrapping not removed from new filters; air intake/outlet blocked.	Clean or replace filters as needed. Ensure all plastic wrapping is removed from new filters. Check for obstructions around air vents.
Unusual noise from the unit.	Foreign object inside; fan obstruction; unit not on a stable surface.	Turn off and unplug the unit. Carefully inspect for any foreign objects. Ensure unit is on a stable, level surface.
Air quality indicator always red/poor.	Sensor is dirty; high levels of pollutants in the environment.	Gently clean the air quality sensor with a dry cotton swab. Ensure proper ventilation in the room.
Cannot connect to Wi-Fi (WIFI models).	Incorrect Wi-Fi password; unit too far from router; router issues.	Verify Wi-Fi password. Move unit closer to router. Restart your Wi-Fi router. Refer to the app's connection guide.

If the problem persists after attempting these solutions, please contact Rabbit Air customer support.

SPECIFICATIONS

Feature	Detail
Model Number	SPA-780N
Product Dimensions	7"D x 21.4"W x 20.25"H
Weight	19.4 Pounds
Color	Black (Odor Remover variant)
Floor Area Coverage	Up to 815 sq. ft. (based on 2 air changes per hour)
Filtration Standard	HEPA filtration standard
Filter Life	Approximately 12 months (main filters)
Power Source	AC Powered
Batteries Required	1 Lithium Metal battery (included, likely for remote control)
Connectivity	Wi-Fi enabled (for app control)
Mounting Options	Freestanding or Wall-Mountable
