[Specifications](#) [Warranty](#)

1. INTRODUCTION

This manual provides essential instructions for the safe and effective use of your RUPES LH19E Rotary Polisher. Please read this manual thoroughly before operating the tool and retain it for future reference. The RUPES LH19E is designed for professional polishing operations in various industries, including automotive detailing, collision repair, refinishing, and marine applications.

2. SAFETY INFORMATION

Always observe general safety precautions when operating power tools. Failure to follow these instructions may result in electric shock, fire, and/or serious injury.

- Wear appropriate personal protective equipment (PPE), including eye protection, hearing protection, and gloves.
- Ensure the work area is clean, well-lit, and free from obstructions.
- Keep children and bystanders away while operating the tool.
- Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases, or dust.
- Always disconnect the power cord before making any adjustments, changing accessories, or storing the tool.

- Use the correct tool for your application. Do not force the tool.
- Maintain the tool with care. Keep cutting tools sharp and clean.
- Check for misalignment or binding of moving parts, breakage of parts, and any other condition that may affect the tool's operation.
- Use only accessories recommended by RUPES for this specific model.

3. PRODUCT OVERVIEW

The RUPES LH19E is a high-performance rotary polisher featuring a powerful motor, compact design, and ergonomic features for enhanced user comfort and control. Its rotary motion is effective for various polishing tasks.

Key Features:

- **High Torque Motor:** Provides consistent power for demanding applications.
- **Compact Design:** Facilitates maneuverability in tight spaces.
- **Premium Ergonomics:** Designed for user comfort during extended use.
- **Lightweight Housing:** Reduces operator fatigue.
- **Anti-Vibration Loop Handle:** Allows secure grip at various angles, absorbing vibrations.
- **Anti-Vibration Side Handle:** Reduces vibration and offers comfortable control; can be attached to either side.
- **9-Meter Electrical Cord:** Heavy-duty, extra-long cord for extended reach without additional extension cords.
- **Electronic Speed Control Dial:** Allows precise speed adjustment with clear numerical indicators and tactile feedback.
- **Progressive Trigger:** Provides variable speed control within the selected dial range for precise application.

Components:

Figure 3.1: RUPES LH19E Rotary Polisher. This image shows the complete polisher unit with its backing plate attached, ready for use.

Figure 3.2: Electronic Speed Control Dial. A close-up view of the polisher's body, highlighting the numbered dial for adjusting operational speed.

Figure 3.3: Progressive Trigger. This image focuses on the trigger mechanism, which allows for fine-tuned speed control during operation.

Figure 3.4: 9-Meter Electrical Cord. The image displays the polisher connected to its long, heavy-duty power cord, emphasizing its extended reach.

4. SETUP

1. **Unpacking:** Carefully remove the polisher and all accessories from the packaging. Verify that all components listed in the product description are present: LH19E Polisher, 125mm/5in backing plate, D-loop handle.
2. **Handle Attachment:**
 - **Loop Handle:** Attach the anti-vibration loop handle (811.374/C) to the front of the polisher. Ensure it is securely fastened for stability and comfort.
 - **Side Handle (Optional):** If using a side handle (typically included with DLX Kits), attach it to either side of the polisher, depending on your preference, ensuring it is firmly secured.
3. **Backing Plate Installation:**
 - Ensure the polisher is unplugged.
 - Align the 125mm/5in backing plate (982.500) with the spindle thread (M14 and 5/8").
 - Thread the backing plate onto the spindle by hand until snug. Use a wrench if necessary to gently tighten, but do not overtighten.
4. **Pad Attachment:** Attach the appropriate polishing pad (foam or wool, not included) to the backing plate. Ensure it is centered and securely adhered.
5. **Power Connection:** Connect the 9-meter electrical cord to a suitable power outlet. Ensure the outlet meets the power requirements of the tool.

5. OPERATING INSTRUCTIONS

The RUPES LH19E is a rotary polisher. Rotary tools rotate on a central axis, with the highest velocity at the pad's edge. This movement generates significant friction and heat, making it highly effective for cutting and correcting paint defects. Proper technique is crucial to avoid surface damage.

5.1 Before Starting:

- Ensure the work surface is clean and prepared for polishing.
- Select the appropriate polishing pad and compound for the task.
- Verify the backing plate and pad are securely attached.
- Hold the polisher firmly with both hands using the main grip and the attached handle (loop or side).

5.2 Speed Control:

- **Electronic Speed Control Dial:** Use the dial to pre-set the maximum desired speed (450 - 1700 RPM). The dial has clear numbers and a click sensation for precise adjustments.
- **Progressive Trigger:** The trigger acts as a throttle. Pressing it gradually increases the speed from zero up to the pre-set maximum on the dial. This allows for fine-tuning speed during operation without interrupting the workflow.

5.3 Polishing Technique:

- Place the pad flat on the work surface before starting the polisher.
- Begin polishing at a low speed and gradually increase as needed using the progressive trigger.
- Maintain consistent, even pressure. Avoid excessive pressure, which can generate too much heat.
- Move the polisher in overlapping passes, ensuring even coverage.
- Monitor the surface temperature to prevent overheating or burning the paint.
- When finished, lift the polisher from the surface before releasing the trigger and turning it off.

5.4 Rotary Movement Considerations:

Rotary polishers are powerful and can be invasive if used improperly. They are best suited for experienced technicians. Improper use can lead to:

- Burns or strike-throughs (removing too much clear coat).
- Rotary-induced swirl marks (holograms).

Practice on test panels before working on critical surfaces. The low vibration levels of this tool contribute to operator comfort, but mastering rotary technique requires time and skill.

5.5 Official Product Video:

Your browser does not support the video tag.

This section would typically feature an official product video demonstrating the RUPES LH19E in operation. No seller-provided videos were available in the product data.

6. MAINTENANCE

Regular maintenance ensures the longevity and optimal performance of your RUPES LH19E Rotary Polisher.

- **Cleaning:** After each use, wipe down the tool with a clean, damp cloth. Remove any compound residue or dust from the housing, vents, and backing plate. Do not use harsh chemicals or solvents.

- **Pad Care:** Clean polishing pads thoroughly after each use according to their manufacturer's instructions. Replace worn or damaged pads promptly.
- **Cord Inspection:** Regularly inspect the 9-meter electrical cord for any signs of damage, cuts, or fraying. If damaged, have it repaired by a qualified technician.
- **Brush Inspection (if applicable):** Some rotary tools use carbon brushes that wear over time. Refer to the full RUPES service manual for specific brush inspection and replacement procedures for the LH19E, if applicable.
- **Storage:** Store the polisher in a clean, dry place, away from direct sunlight and extreme temperatures.
- **Professional Servicing:** For any internal repairs or complex maintenance, contact an authorized RUPES service center.

7. TROUBLESHOOTING

This section addresses common issues you might encounter with your RUPES LH19E Rotary Polisher. For problems not listed here, contact RUPES customer support or an authorized service center.

Problem	Possible Cause	Solution
Tool does not start.	No power supply; damaged cord; faulty switch.	Check power connection. Inspect cord for damage. If cord is damaged or switch is faulty, seek professional repair.
Reduced power or inconsistent speed.	Low voltage; worn carbon brushes (if applicable); motor overload.	Ensure stable power supply. Check for worn brushes (refer to service manual). Reduce pressure on the tool.
Excessive vibration.	Unbalanced pad; loose backing plate; internal component issue.	Ensure pad is centered and backing plate is tight. If problem persists, professional inspection is recommended.
Overheating.	Blocked ventilation; continuous heavy load; incorrect technique.	Clear ventilation openings. Allow tool to cool. Adjust polishing technique to avoid excessive pressure.

8. SPECIFICATIONS

Technical data for the RUPES LH19E Rotary Polisher:

Feature	Value
Model	LH19E
Brand	RUPES
Specific Uses	Automotive detailing, Collision repair and refinishing, Marine
Speed (RPM)	450 - 1700
Maximum Power	1200 Watts
Item Weight	2.2 kg (4.85 lbs) / 8.6 Pounds

Feature	Value
Product Dimensions	21.5 x 7.5 x 6 inches
Max Polishing Foam Pad Diameter	200 mm (8")
Available Backing Pad Diameter	125 mm (5") / 150 mm (6") / 165 mm (6.5")
Backing Pad Thread	M14 and 5/8"
Electrical Cord Length	9 meters (30 feet)
Power Source	Corded Electric

TECHNICAL DATA		
Ø polishing foam pad max	mm-in	200 - 8"
Ø backing pad available	mm-in	125 - 5" / 150 - 6" / 165 - 6,5"
Power	Watt	1200
R.P.M.		450 - 1700
Weight	kg-lbs	2.2 - 4.85
Speed control		•
Backing pad thread		M14 and 5/8"
Electrical Cord	m-ft	9 - 30'

Figure 8.1: RUPES LH19E Technical Data. This image presents a table summarizing the key technical specifications of the polisher, including pad sizes, power, RPM, weight, and cord length.

9. WARRANTY INFORMATION

RUPES 1-YEAR LIMITED WARRANTY:

RUPES warrants to the original purchaser only that RUPES power tools shall be free from material or workmanship defects for a period of **ONE YEAR** from the date of purchase. This warranty is subject to the following conditions:

- **Remedy:** RUPES' sole obligation and your exclusive remedy under this warranty is limited to the replacement or repair, without charge, of those parts determined by RUPES to be defective.
- **Exclusions:** This warranty does not cover power tools subjected to misuse (including overloading and use not specified in the user's manual), neglect, faulty maintenance, alteration, damage caused by improper use of chemicals, repairs by unauthorized parties, or damage caused by normal "wear & tear."
- **Non-Warranty Repairs:** In the event repairs are deemed non-warranty, the repair charges shall be borne by the purchaser.
- **Accessories:** This limited warranty does not apply to accessory items such as pads, backing plates, chemicals, and normally wearable motor parts (e.g., bearings, blades, brushes).
- **Transferability:** The warranty described herein is not transferable to other individuals beyond the original purchaser.

- **Eligibility:** Only tools purchased from an authorized RUPES USA distributor are eligible for repair under this warranty.

DISCLAIMER: THIS LIMITED WARRANTY IS GIVEN IN LIEU OF ALL OTHERS INCLUDING THE IMPLIED WARRANTY OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE AND EXCLUDES ALL INCIDENTAL OR CONSEQUENTIAL DAMAGES. This LIMITED WARRANTY gives you specific legal rights that may vary from state to state.

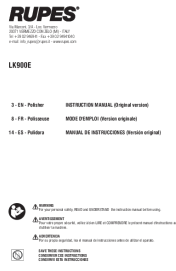

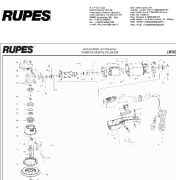

10. CUSTOMER SUPPORT

For technical assistance, service, or warranty claims, please contact your authorized RUPES dealer or visit the official RUPES website for contact information.

You can find more information and products from RUPES by visiting the [RUPES Store on Amazon](#).
