## PRODUCT FEATURES

- **UV-Protected High-Density Polyethylene Construction:** Ensures durability and resistance to sun damage.
- **Stable Flat Bottom:** Designed for enhanced stability on the water, ideal for fishing.
- **Deep Hull Tracking Channels:** Aids in straight-line paddling and improved tracking.
- **Stability Chine Rails:** Further enhances the kayak's stability.
- **Multiple Footrest Positions:** Accommodates different size riders for comfortable paddling.
- **Adjustable Padded Seat Back and Seat Pad:** Provides comfort during extended use.
- **Front and Rear Shock Cord Straps:** Secure storage for gear and equipment.
- **Two Flush Mounted Fishing Rod Holders:** Conveniently located for hands-free fishing.
- **One Top Mount Fishing Rod Holder:** Offers versatile rod placement options.
- **Two 6" Storage Compartments:** Located in the rear and center for secure storage of small items.

- **One Paddle Keeper with Shock Cords:** Keeps your paddle secure when not in use.
- **Front and Rear T-Handles:** Facilitates easy transport and carrying.

## SETUP

### 1. Seat and Footrest Adjustment

Before launching, adjust the padded seat back and seat pad for comfort. Ensure the footrests are set to a position that allows for a slight bend in your knees when your feet are firmly placed. This provides leverage for paddling and stability.

### 2. Rod Holder Installation

The kayak comes with two flush-mounted rod holders and one top-mount rod holder. The top-mount holder can be installed in the designated area using the provided hardware. Ensure all rod holders are securely fastened before use.

*Figure 7: Top-Mount Rod Holder.*

### 3. Paddle Keeper Setup

Utilize the paddle keeper with shock cords to secure your paddle when you are not actively paddling, especially during fishing or when taking a break.

## OPERATING INSTRUCTIONS

### Paddling

The Tamarack Angler 100 is designed for stability and tracking. Use the deep hull tracking channels and stability chine rails to maintain a straight course. Proper paddling technique involves engaging your core and using your entire body, not just your arms, to propel the kayak.

### Fishing

Position your fishing rods in the flush-mounted or top-mount holders. The stable flat bottom allows for comfortable casting and reeling. Be mindful of your weight distribution to maintain balance, especially when standing (if applicable and safe for your skill level).

### Storage

Utilize the front and rear shock cord straps for securing larger items like dry bags or coolers. The two 6-inch storage compartments in the rear and center are ideal for smaller, essential items that need to stay dry and secure.

## MAINTENANCE

- **Cleaning:** After each use, rinse the kayak with fresh water to remove salt, sand, and debris. Use mild soap and water for stubborn dirt.
- **Storage:** Store the kayak in a shaded area to protect the UV-protected HDPE construction from prolonged sun exposure. If storing outdoors, use a kayak cover. Store on its side or upside down to prevent hull deformation.
- **Inspection:** Regularly inspect the hull for any damage, and check all straps, buckles, and rod holders for wear and tear.

## TROUBLESHOOTING

- **Tracking Issues:** Ensure the skeg (if removable) is properly deployed. Check for excessive weight distribution imbalances.
- **Stability Concerns:** Verify that your weight is centered and evenly distributed. Adjust seating and footrest positions for better balance.
- **Leaking:** Inspect scupper plugs to ensure they are properly seated. Check for any cracks or damage to the hull.

## SPECIFICATIONS

Brand	Lifetime
Model Name	Tamarack Sit-On-Top Kayak, Tan, 120", Model: 90237
Item Weight	54 Pounds
Material	UV-Protected High-Density Polyethylene (HDPE)
