WoldoClean 8524

WoldoClean Coffee Machine Cleaner & Descaler Tablets (Model 8524)

Instruction Manual

1. PRODUCT OVERVIEW

The WoldoClean Coffee Machine Cleaner & Descaler Tablets are designed for effective removal of limescale and mineral buildup in various coffee machines and related appliances. Regular use helps maintain optimal machine performance and coffee taste.

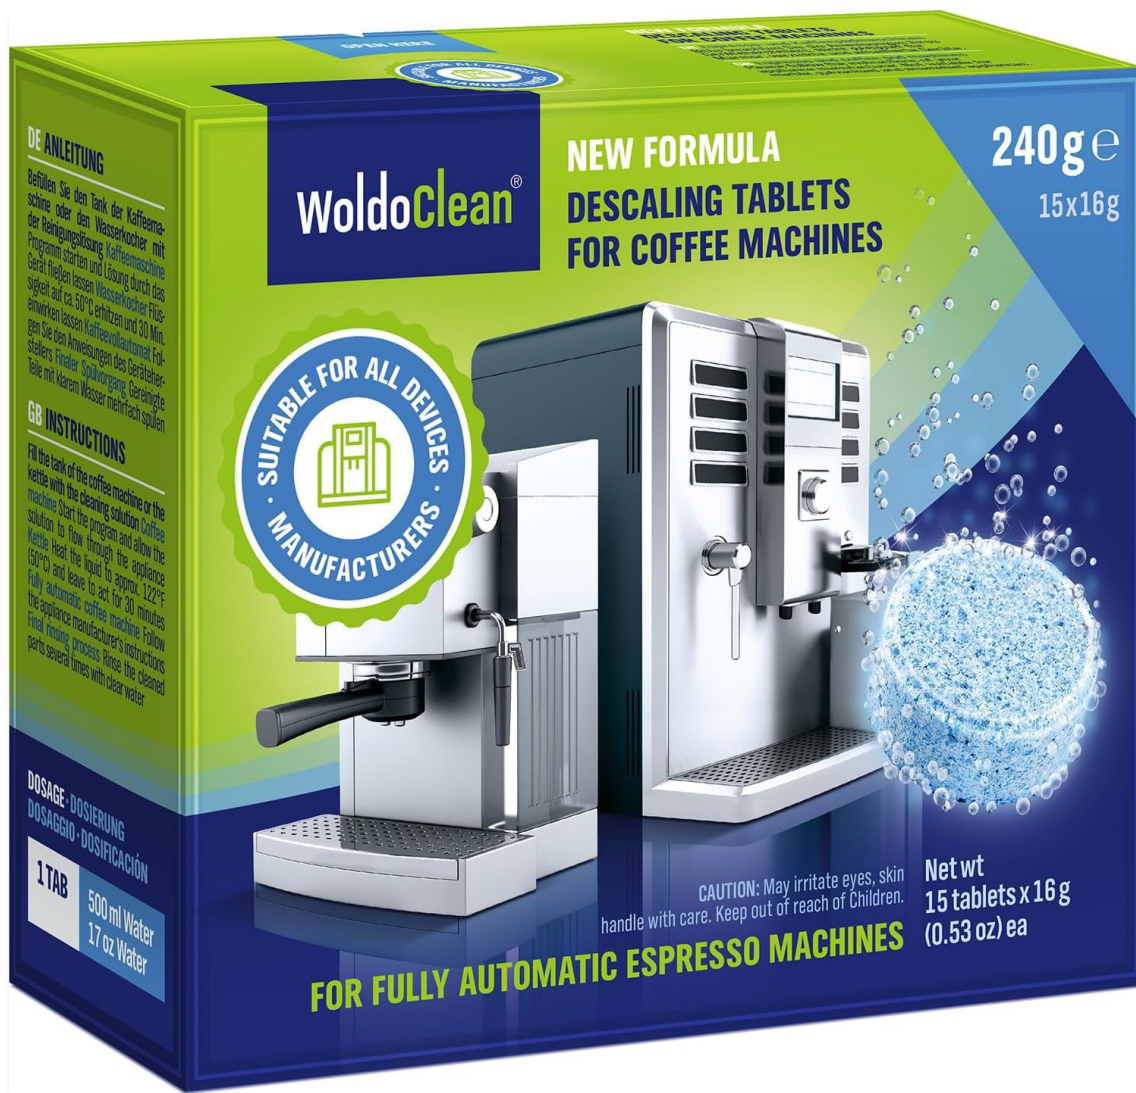

Image 1.1: WoldoClean Coffee Machine Cleaner & Descaler Tablets.

Key Features:

- **Universal Compatibility:** Suitable for Keurig K-Cup, Nespresso Vertuo, Ninja, Breville, DeLonghi, Miele, and standard drip coffee makers.
- **Powerful 2-in-1 Formula:** Concentrated active ingredients dissolve limescale and calcium deposits.
- **Improved Coffee Taste:** Restores optimal brewing temperature and water flow.
- **Extends Machine Life:** Protects heating elements and internal pumps.
- **Easy to Use:** Simple drop, dissolve, and brew application.

2. SETUP AND GENERAL OPERATING INSTRUCTIONS

Before starting the descaling process, always consult your specific coffee machine's operating manual for any manufacturer-specific descaling procedures or warnings. The following instructions provide a general guideline for using WoldoClean Descaler Tablets.

General Descaling Steps:

1. Remove one WoldoClean descaling tablet from its packaging.
2. Place the tablet directly into your machine's water reservoir.

3. Fill the water tank with approximately 27 fl oz (800 ml) of water.
4. Allow the tablet to dissolve completely. Using lukewarm water (maximum 104°F / 40°C) can accelerate dissolution.
5. Once dissolved, initiate the descaling cycle as described in your appliance's operating manual.
6. After the descaling cycle, thoroughly rinse the machine with fresh, clear water to flush out any remaining deposits. Perform at least two rinse cycles with clean water.

INSTRUCTIONS FULL AUTOMAT

**DISSOLVE 1 TAB IN 17OZ OF
122°F WARM WATER FOR 2 MIN
AND POUR INTO THE WATER TANK**

1 TAB	17 oz Water
--------------	--------------------

**2 MIN
AT 122°F**

DISSOLVING TIME IN WATER

Follow the device manufacturer's instructions

Insert the tank and activate the descaling program/brewing process. Allow the solution to run through.

Remove the tank, rinse out and fill with fresh water. Carry out at least two runs for optimum results.

Image 2.1: Instructions for Full Automatic Coffee Machines.

Specific Instructions for Full Automatic Machines:

- Dissolve 1 tablet in 17 oz (500 ml) of 122°F (50°C) warm water for 2 minutes.
- Pour the dissolved solution into the water tank of your machine.
- Insert the tank and activate the descaling program or brewing process. Allow the solution to run through.
- Remove the tank, rinse it out, and refill with fresh water.
- Carry out at least two rinse runs with fresh water for optimum results.

Important: Always follow your device manufacturer's instructions for the descaling process.

Image 2.2: Versatile Applicability for Coffee Machines.

The tablets are suitable for fully automatic machines, espresso machines, coffee machines, capsule machines, portafilter machines, and pad machines.

3. MAINTENANCE

Regular descaling is crucial for the longevity and optimal performance of your coffee machine. The frequency of descaling depends on your water hardness and how often you use your machine. As a general recommendation, descale your machine every 1 to 3 months, or as indicated by your machine's descaling alert system.

Consistent descaling prevents the accumulation of limescale, which can lead to:

- Reduced water flow.
- Lower brewing temperatures.
- Increased energy consumption.
- Compromised coffee flavor.
- Potential damage to internal components.

WoldoClean[®]

FAST AND POWERFUL AGAINST LIME

- Compatible with all brands
- Particle free tab dissolution
- Odorless cleaning formula
- Protected from moisture

4. TROUBLESHOOTING

If you encounter issues during or after the descaling process, consider the following:

- **Descaling Light Remains On:** Ensure you have completed all rinse cycles as per your machine's manual. Some machines require a specific sequence of button presses to reset the descaling indicator.
- **Residue in Water:** If you observe brown grit or residue, it indicates significant limescale buildup. Perform additional rinse cycles with fresh water. For heavily scaled machines, a second descaling cycle might be necessary, followed by thorough rinsing.
- **Machine Not Functioning:** Verify that all components are correctly assembled and that the water tank is properly seated. If the machine still does not function, refer to your coffee machine's specific troubleshooting guide.

For persistent problems, please refer to the support section or your coffee machine's manufacturer for assistance.

5. SPECIFICATIONS

Feature	Detail
Brand	WoldoClean
Model Number	8524
Item Form	Tablet
Scent	Unscented
Unit Count	15.0 Count
Product Dimensions	6.69 x 4.72 x 1.57 inches
Item Weight	0.53 Pounds
Specific Uses	Cleaning espresso & cappuccino machines, Descaling single-serve pod brewers, Maintenance of electric water kettles, Removing stubborn limescale buildup, Restoring water flow & temperature
Special Features	Dissolves rapidly without residue, Extends machine lifespan, Odorless & neutral taste formula, Restores heating element efficiency, Safe for internal pumps & seals
Material Features	Food-safe ingredients, High-density compressed powder tab, Highly concentrated active agents, Non-corrosive to metal & plastic, Quick-action effervescent technology

6. SAFETY INFORMATION

Important Safety Precautions:

- Keep out of reach of children and pets.
- Avoid contact with eyes and skin. In case of contact, rinse thoroughly with water.
- Do not ingest. If swallowed, seek medical attention immediately.
- Store in a cool, dry place, away from direct sunlight.
- Always ensure adequate ventilation when using cleaning products.

Statements regarding dietary supplements have not been evaluated by the FDA and are not intended to diagnose, treat, cure, or prevent any disease or health condition.
