

TurboTorch SK-7000

TurboTorch SK-7000 Self Lighting Hand Torch

MODEL: 0426-4001

1. Introduction

The TurboTorch SK-7000 Self Lighting Hand Torch is a versatile tool designed for brazing and soft soldering applications. It is ideal for working with copper, brass, bronze, and aluminum. Featuring a self-lighting mechanism and a preset flame, this torch offers convenience and efficiency for various tasks. This manual provides essential information for the safe and effective use, setup, operation, and maintenance of your SK-7000 Hand Torch. Please read it thoroughly before first use and keep it for future reference.

2. Safety Information

WARNING: This product contains chemicals known to the State of California to cause cancer and birth defects or other reproductive harm. Always use in a well-ventilated area.

- Always wear appropriate Personal Protective Equipment (PPE), including safety glasses or goggles, heat-resistant gloves, and protective clothing, when operating the torch.
- Ensure adequate ventilation in your work area to prevent the accumulation of hazardous fumes.
- Keep flammable materials, liquids, and gases away from the torch and work area.
- Never point the torch flame at yourself, other people, or animals.
- Do not use the torch near combustible materials or in explosive atmospheres.
- Always check for gas leaks before operating the torch. Use a leak detection solution, not an open flame.
- Ensure the gas cylinder is securely attached and upright during use.
- Allow the torch and workpiece to cool completely before handling or storing.
- Store gas cylinders in a cool, dry, well-ventilated area, away from direct sunlight and heat sources.
- This torch is U.L. listed, indicating compliance with specific safety standards.

3. Product Features

- **Self-Lighting:** Built-in ignitor for instant flame, eliminating the need for external ignition tools.
- **Preset Flame:** Optimized flame setting for consistent performance.
- **180° Swivel Tip:** Allows for easy positioning and access in various work angles.
- **Safety Trigger Lock:** Enhances safety by preventing accidental ignition.
- **Swirl Combustion Design:** Engineered to cut brazing time by up to 15%.
- **Gas Compatibility:** Operates on any standard MAPP® and Propane 1 lb. tanks without changing the orifice.

Image: The TurboTorch SK-7000 Self Lighting Hand Torch displayed in its clear plastic retail packaging, highlighting its yellow body, metal tip, and key features printed on the blue backing card.

4. Setup

1. **Prepare Work Area:** Ensure your work area is clean, well-ventilated, and free of flammable materials.
2. **Attach Gas Cylinder:** Screw the torch handle firmly onto a standard 1 lb. MAPP® or Propane gas cylinder. Hand-tighten only; do not overtighten.
3. **Check for Leaks:** After attaching the cylinder, apply a leak detection solution (soapy water) to the connection point. If bubbles appear, there is a leak. Tighten the connection or replace the cylinder if necessary. Do not proceed if a leak is detected.
4. **Position Torch:** Ensure the torch is stable and pointed away from yourself and any flammable objects.

5. Operating Instructions

1. **Unlock Safety Trigger:** If the safety trigger lock is engaged, disengage it according to the torch's mechanism (refer to the diagram on the product if available).
2. **Ignite Torch:** Press the ignition trigger. The built-in ignitor will automatically light the flame.
3. **Adjust Tip (if needed):** Utilize the 180° swivel tip to direct the flame precisely to your workpiece.
4. **Perform Task:** Apply the flame to the area requiring brazing or soldering. The preset flame is optimized for efficiency.
5. **Extinguish Flame:** Release the ignition trigger to turn off the flame.
6. **Engage Safety Trigger Lock:** Once the flame is extinguished, engage the safety trigger lock to prevent accidental ignition.
7. **Cool Down:** Allow the torch and workpiece to cool down completely before storing or handling.

6. Maintenance

- **Cleaning:** Keep the torch clean and free of debris. Wipe down the exterior with a dry cloth after each use. Do not use harsh chemicals or abrasives.
- **Inspection:** Regularly inspect the torch for any signs of damage, wear, or leaks, especially around the connections and tip. Do not use a damaged torch.
- **Storage:** When not in use, disconnect the gas cylinder from the torch. Store the torch in a cool, dry place, away from direct sunlight, heat sources, and out of reach of children.

7. Troubleshooting

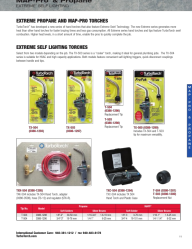

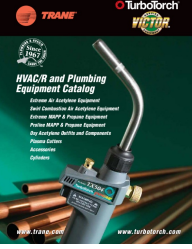

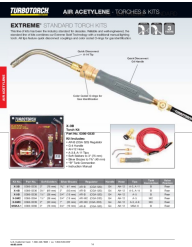

- **Torch Does Not Ignite:**
 - Ensure the gas cylinder is properly attached and contains gas.
 - Check if the safety trigger lock is disengaged.
 - Inspect the ignitor for any obstructions or damage.
- **Weak or Inconsistent Flame:**
 - Verify the gas cylinder has sufficient fuel.
 - Ensure there are no obstructions in the torch tip or gas flow path.
- **Gas Leak Detected:**
 - Immediately turn off the gas supply.
 - Tighten all connections. If the leak persists, replace the gas cylinder or contact customer support. Do not use the torch if a leak is present.

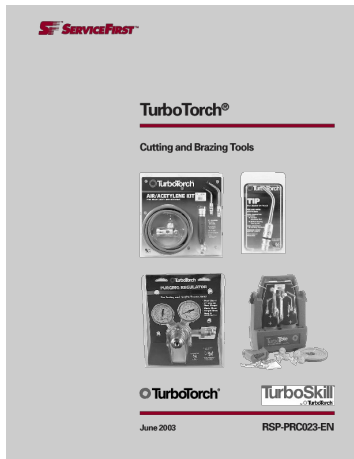

8. Specifications

Model Number	0426-4001 (SK-7000)
Brand	TurboTorch
Manufacturer	Victor Technologies International
Material	Copper (tip)
Item Weight	16 ounces (1 lb)
Package Dimensions	Approximately 1 x 1 x 1 inches (product dimensions may vary)
Gas Compatibility	MAPP® and Propane 1 lb. tanks
Certification	U.L. Listed
Assembly Location	Assembled in Mexico

9. Warranty and Support

This TurboTorch SK-7000 Hand Torch comes with a **1 Year Limited Warranty** from the date of purchase. This warranty covers defects in materials and workmanship under normal use. For warranty claims, technical support, or any questions regarding your product, please refer to the contact information provided with your purchase documentation or visit the official TurboTorch website. Please retain your proof of purchase for warranty purposes.
