WilTec 60192

Wiltec XXL 3-Tier Wooden Hamster Cage Instruction Manual

Model: 60192 | Brand: WilTec

1. INTRODUCTION

Thank you for choosing the Wiltec XXL 3-Tier Wooden Hamster Cage. This habitat is designed to provide a comfortable and stimulating environment for small rodents, such as hamsters, guinea pigs, and other small animals. Featuring three levels connected by ramps, clear acrylic observation windows, a hinged roof, and a removable base, this cage offers both functionality and ease of maintenance. Please read this manual thoroughly before assembly and use to ensure proper setup and safe operation.

2. SAFETY INSTRUCTIONS

- Always supervise children when they are interacting with the cage and pets.
- Ensure all parts are securely assembled before placing any animals inside.
- Place the cage on a stable, level surface away from direct sunlight, drafts, and extreme temperatures.
- Regularly inspect the cage for any damage, loose parts, or splintering wood that could harm your pet.
- This cage is intended for small rodents. Ensure the species you house is appropriate for the cage size and features. For example, golden hamsters require at least one square meter of floor space and a bedding depth of at least 30 cm, which may exceed the capacity of this cage. Always research species-specific requirements.
- Keep food and water dishes clean and replenished daily.

3. PACKAGE CONTENTS

Before beginning assembly, please verify that all components are present and undamaged:

- Wooden panels for the cage structure
- Acrylic observation windows (with protective film)

- Hinged mesh roof
- Internal wooden ramps (quantity: 2-3)
- Wooden platforms for three levels
- Removable base tray
- Assembly hardware (screws, connectors)
- Instruction manual

4. ASSEMBLY INSTRUCTIONS

Follow these steps carefully to assemble your Wiltec XXL 3-Tier Wooden Hamster Cage. It is recommended to have a screwdriver and possibly a rubber mallet for gentle tapping.

1. **Unpack Components:** Carefully remove all parts from the packaging. Inspect for any damage.
2. **Remove Protective Film:** Peel off the protective film from both sides of the acrylic observation windows.
3. **Assemble Base Structure:** Connect the side wooden panels to form the hexagonal base. Ensure the grooves for the removable tray are aligned at the bottom. Secure with provided screws.
4. **Insert Removable Tray:** Slide the removable base tray into the designated slot at the bottom of the cage.
5. **Install Lower Level:** Place the first wooden platform (lower level) into its designated position, typically 19 cm from the base. Secure if necessary.
6. **Install Middle Level:** Place the second wooden platform (middle level) into its designated position, typically 37 cm from the base. Secure if necessary.
7. **Attach Ramps:** Connect the wooden ramps between the levels to allow your pet to move freely. Ensure they are stable.
8. **Install Acrylic Windows:** Carefully slide the acrylic windows into the grooves on the front and sides of the cage.
9. **Attach Hinged Roof:** Secure the hinged mesh roof to the top of the cage using the provided hinges and screws. Ensure it opens and closes smoothly and latches securely.
10. **Final Check:** Verify that all screws are tightened, and all components are stable and secure.

Dimensions du produit

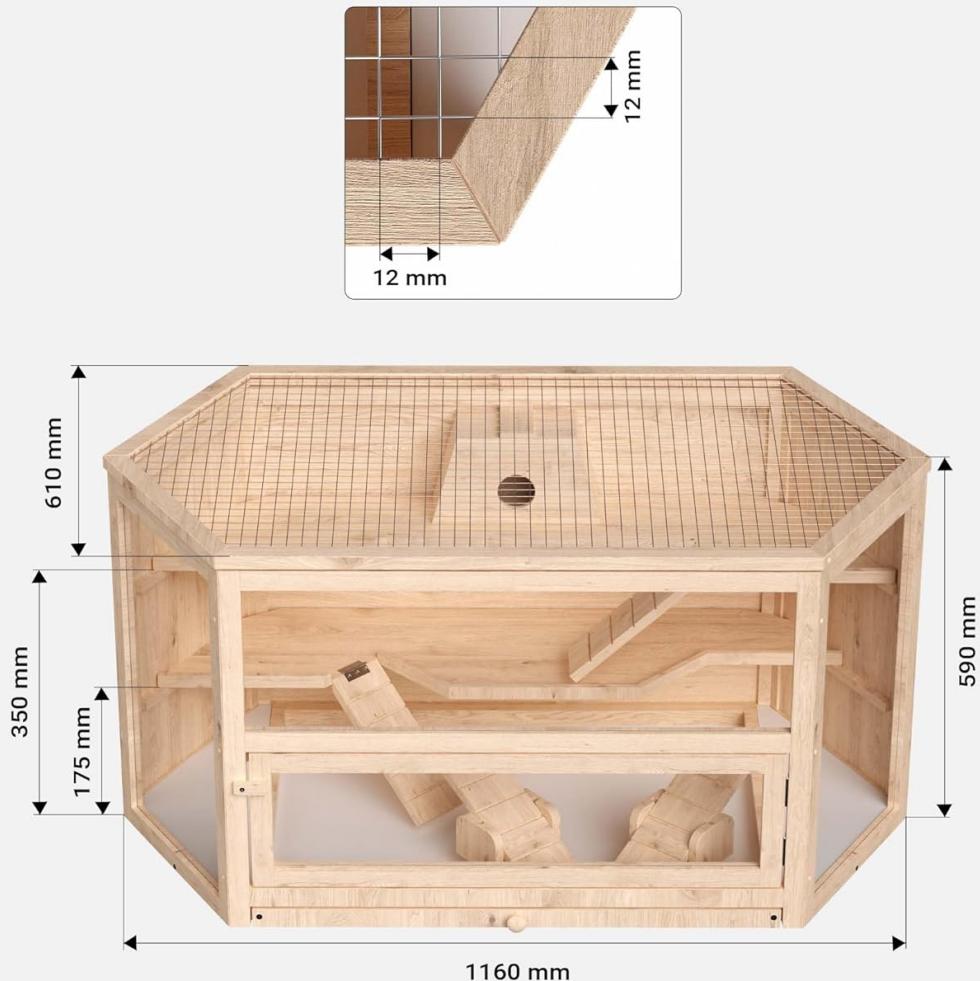

Figure 4.1: Product Dimensions. The cage measures approximately 116 cm (length) x 60 cm (width) x 59 cm (height). The mesh size is 15mm.

Figure 4.2: Assembled Cage. A view of the fully assembled Wiltec XXL 3-Tier Wooden Hamster Cage, showing its spacious interior and multiple levels.

5. USAGE GUIDELINES

Proper setup of the internal environment is crucial for your pet's well-being.

- **Bedding:** Fill the lowest level with a generous amount of appropriate bedding material. This allows rodents to burrow and build nests, fulfilling natural behaviors.
- **Food and Water:** Place food bowls and water bottles on the upper levels to prevent bedding from contaminating them.
- **Accessories:** Utilize the different levels for various accessories such as exercise wheels, chew toys, and hiding spots.
- **Observation:** The clear acrylic windows allow for easy observation of your pets without disturbing them.

Grande cage à 3 niveaux

Figure 5.1: Three-Level Structure. The cage features three distinct levels connected by ramps, providing ample space for rest, play, and feeding areas.

Fenêtre de surveillance

Figure 5.2: Observation Window. The large acrylic windows allow for comfortable and continuous monitoring of your pets without disturbing their environment.

6. MAINTENANCE AND CLEANING

Regular cleaning is essential for maintaining a hygienic and healthy environment for your pets.

- **Daily Spot Cleaning:** Remove soiled bedding and waste daily.
- **Weekly Deep Cleaning:**
 - a. Carefully remove your pet(s) and place them in a secure temporary enclosure.
 - b. Open the hinged roof and front door for full access.
 - c. Pull out the removable base tray to easily dispose of all bedding and waste.
 - d. Wipe down all surfaces of the cage, including platforms, ramps, and acrylic windows, with a pet-safe cleaner or mild soap and water. Rinse thoroughly and dry completely before returning your pet.
 - e. Replace with fresh bedding and reintroduce your pet(s).
- **Wood Care:** The cage is made of fir wood. To prevent urine stains and prolong the life of the wood, consider applying a pet-safe, non-toxic sealant or varnish, especially to the lower levels.

Bac amovible pour nettoyage aisé

Figure 6.1: Removable Tray. The pull-out base tray simplifies the cleaning process, allowing for quick and efficient removal of soiled bedding.

Accès facilité via porte et toit avec charnières

Figure 6.2: Easy Access. The hinged roof and front door provide convenient access for cleaning, feeding, and interacting with your pets.

7. TROUBLESHOOTING

- **Difficulty with Screw Holes:** If screw holes are not pre-drilled or misaligned, carefully create pilot holes with a small drill bit to prevent wood splitting.
- **Wood Splintering:** The natural wood material can sometimes splinter. Gently sand any rough edges or splinters to ensure your pet's safety.
- **Unstable Structure:** Ensure all screws are fully tightened. If the cage feels wobbly, re-check all connections and ensure it is placed on a flat, stable surface.
- **Pet Chewing Wood:** Rodents naturally chew. Provide plenty of safe chew toys to redirect their chewing behavior away from the cage structure.

8. SPECIFICATIONS

Feature	Detail
---------	--------

Model Number	60192
Dimensions (L x W x H)	116 x 60 x 59 cm (45.7 x 23.6 x 23.2 inches)
