## Camco 40019

# Camco Tastepure XL RV Water Filter (Model 40019) Instruction Manual

Your guide to clean, great-tasting water on the go.

## 1. INTRODUCTION

The Camco Tastepure XL RV Water Filter is designed to provide clean, filtered water for various applications, including RVs, boats, and general outdoor use. This inline filter features advanced filtration technology to reduce unpleasant tastes, odors, chlorine, sediment, and other impurities, ensuring a better water experience. It is proudly made in the USA and includes a flexible hose protector for ease of use.

NEW & IMPROVED

**CAMCO**

Advanced **6-STEP**  
Filtration Technology

#1 RV Water Filter in America.

Image: The Camco Tastepure XL RV Water Filter, a blue cylindrical filter, is shown with water splashing around it. Text on the image highlights its 'Advanced 6-STEP Filtration Technology' and 'Proudly Made in the USA'.

## 2. KEY FEATURES

- **Advanced 6-Step Filtration Technology:** Utilizes Hex-Flow Technology for comprehensive water purification.
- **Certified Lead-Free:** Independently tested and listed to NSF/ANSI 42 & NSF/ANSI 53 standards, and CSA lead-free content certified to NSF/ANSI 372.
- **Improved Water Quality:** Offers 2x the filtration power of standard filters, reducing tastes, odor, chlorine, sediment, and controlling bacteria/mold growth with GAC and KDF filtration.
- **Made in the USA:** Manufactured with quality materials and craftsmanship.
- **20-Micron Protection:** Internal sediment filter protects against silt and sediment.
- **High Flow Design:** Wide body design ensures efficient water flow.
- **Flexible Hose Protector:** Prevents kinks and reduces strain on connections.

## 3. SETUP INSTRUCTIONS

1. **Prepare the Filter:** Before first use, connect the filter to a water source (e.g., outdoor spigot) without connecting it to your RV or device. Allow water to run through the filter for 30-45 seconds to flush out any loose carbon particles. This ensures optimal performance and taste.
2. **Connect Flexible Hose Protector:** Attach the included flexible hose protector to the water source. This helps prevent kinking and reduces strain on the connection.
3. **Attach Filter:** Connect the Camco Tastepure XL RV Water Filter to the flexible hose protector. Ensure a snug fit to prevent leaks.
4. **Connect Water Hose:** Attach your drinking water hose to the outlet side of the filter.
5. **Connect to RV/Device:** Connect the other end of your drinking water hose to your RV's freshwater inlet or the device you wish to supply with filtered water.
6. **Check for Leaks:** Slowly turn on the water supply and check all connections for leaks. Tighten as necessary.

Video: A demonstration of connecting the Camco Tastepure RV Water Filter to an outdoor spigot using the flexible hose protector, showing the water flowing through the filter.

## 4. OPERATING INSTRUCTIONS

---

Once installed, the Camco Tastepure XL RV Water Filter operates continuously as water flows through it. No additional steps are required for filtration during normal use. The filter is designed for inline use with standard garden or drinking water hoses.

## 5. MAINTENANCE

---

The lifespan of your Camco Tastepure XL RV Water Filter depends on water quality and usage. It is recommended to replace the filter after one camping season or when you notice a decrease in water flow or quality. The filter is designed to last up to 6 months or for a specified number of gallons (refer to product packaging for specific gallon capacity).

To prolong filter life when not in use, especially during storage, ensure the filter is drained of water. Some users recommend swinging the filter to remove residual water and allowing it to dry before storing.

## 6. TROUBLESHOOTING

---

- **Reduced Water Flow:** If water flow decreases significantly, the filter may be clogged with sediment. This indicates it's time for a replacement.
- **Unpleasant Taste/Odor:** If filtered water still has an undesirable taste or odor, the filter's capacity may be exhausted, or the initial flushing was insufficient. Replace the filter or ensure proper initial flushing.
- **Leaks at Connections:** Ensure all connections are tightly secured. Check the rubber washers for proper seating and condition.
- **Black Particles in Water (First Use):** It is normal to see some black carbon particles during the initial flushing of a new filter. Continue flushing until the water runs clear.

## 7. SPECIFICATIONS

---

Feature	Detail
Model Number	40019
Material	Kinetic Degradation Fluxion (KDF)
Product Dimensions	3.3"D x 3.3"W x 12.7"H
Item Weight	2.29 Pounds
External Testing Certification	ANSI, NSF/ANSI 42, NSF/ANSI 53, CSA Lead-Free to NSF/ANSI 372
Filtration Micron Rating	20-Micron
Color	Blue
Power Source	Hand-powered (inline water pressure)

## 8. VERSATILE APPLICATIONS

---

The Camco Tastepure XL RV Water Filter is suitable for a wide range of uses:

- **RV and Camping:** Provides clean drinking water for recreational vehicles and campsites.
- **Boating:** Ensures filtered water for marine applications.
- **Pets:** Offers cleaner water for pet hydration.
- **Gardening:** Can be used to filter water for plants.
- **Car Washes/Detailing:** Helps reduce water spots and impurities.

# Multiple uses

**RV**

**Boating**

**Camping**

**Auto Washing**

**Pets**

**Gardening**

## 9. CERTIFICATIONS

This filter meets stringent industry standards for water quality and safety:

- Independently tested & listed to standards NSF/ANSI 42 & NSF/ANSI 53.
- CSA lead-free content certified to NSF/ANSI 372.
- Compliant with all federal & state-level lead-free laws.

# Patent-Protected. Top Industry Certifications.

\*Per requirements of NSF/ANSI 372

Image: Several certification badges are displayed, including NSF/ANSI 42, NSF/ANSI 53, KDF 55, and a 'Certified Lead-Free' seal, indicating the product's adherence to quality and safety standards.

## 10. WARRANTY

The Camco Tastepure XL RV Water Filter comes with a Limited 1 Year Warranty.

## 11. SUPPORT

For further assistance, product information, or to inquire about replacement parts, please visit the official Camco website or contact their customer service department. Refer to your product packaging for specific contact details.
