LUXPRO LP395

LUXPRO LP395 Gels Glow-in-the-Dark 9 LED Handheld Flashlight Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for the LUXPRO LP395 Gels Glow-in-the-Dark 9 LED Handheld Flashlight. Please read this manual thoroughly before using the product to ensure proper operation and longevity. The LUXPRO LP395 is a compact and durable flashlight featuring 9 LED bulbs, providing 40 lumens of brightness. Its unique silicone sleeve allows it to glow in the dark after exposure to a light source, making it easy to locate in low-light conditions. It is designed for various uses, including camping, emergency preparedness, and general household tasks.

PACKAGE CONTENTS

- LUXPRO LP395 Gels Glow-in-the-Dark 9 LED Flashlight (Quantity: 3)
- AAA Batteries (3 per flashlight, pre-installed)
- Wrist Lanyard (1 per flashlight)

SETUP

1. Battery Installation/Replacement

1. Unscrew the tail cap of the flashlight by turning it counter-clockwise.
2. Insert three (3) AAA batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the battery compartment.
3. Screw the tail cap back on clockwise until it is securely tightened.

2. Attaching the Wrist Lanyard

Thread the loop end of the wrist lanyard through the small hole located on the tail cap of the flashlight. Pull the lanyard through the loop to secure it. This helps prevent accidental drops.

OPERATING INSTRUCTIONS

1. Turning On/Off

Press the button located on the tail cap of the flashlight to turn the light on. Press the button again to turn it off.

Image: The LUXPRO LP395 flashlight provides 40 lumens of bright light, suitable for various tasks.

2. Activating Glow-in-the-Dark Feature

The outer silicone sleeve of the LP395 flashlight is designed to glow in the dark. To activate this feature, expose the flashlight's silicone sleeve to a strong light source (such as sunlight or a bright room light) for a period of time. The sleeve will absorb the light energy and then emit a glow in dark conditions. The glow typically lasts approximately 5-10 minutes.

after being charged.

MAINTENANCE

1. Cleaning

To clean the flashlight, wipe it with a soft, damp cloth. Do not use abrasive cleaners or solvents, as these may damage the finish or the glow-in-the-dark silicone sleeve.

2. Water Resistance

The LP395 flashlight has an IPX4 water-resistant rating, meaning it is protected against splashing water from all directions. It is not designed for submersion in water. Ensure the tail cap is securely tightened to maintain water resistance.

Glow-in-the-Dark

The rubber grip glows when charged by another light source. Glow lasts approximately 5-10 minutes.

Image: The IPX4 water-resistant rating protects the flashlight from splashes.

3. Battery Care

If the flashlight will not be used for an extended period, remove the batteries to prevent leakage and potential damage to the device.

TROUBLESHOOTING

- **Flashlight does not turn on:**
 - Check if the batteries are inserted correctly with the correct polarity.
 - Replace the batteries with new AAA batteries.
 - Ensure the tail cap is fully tightened.
- **Light is dim:**
 - The batteries may be low. Replace them with new AAA batteries.

- **Glow-in-the-dark feature is not working:**
 - Ensure the silicone sleeve has been exposed to a sufficient light source to "charge" it.
