KATCHY B07B6RZP4H

Katchy Indoor Insect Trap User Manual

Model: B07B6RZP4H

INTRODUCTION

The Katchy Indoor Insect Trap is designed to effectively capture and eliminate common indoor flying insects such as mosquitoes, gnats, moths, and fruit flies. This device utilizes a combination of UV light, a powerful fan, and a replaceable sticky glue board to attract and trap insects without the use of zapping noises or harmful chemicals. Its subtle and sleek design allows it to blend seamlessly into various indoor environments, including kitchens, entryways, and offices. This manual provides comprehensive instructions for the setup, operation, maintenance, and troubleshooting of your Katchy Indoor Insect Trap to ensure optimal performance and a more comfortable indoor environment.

SAFETY INFORMATION

Please read and understand all safety instructions before operating the device. Failure to follow these instructions may result in injury or damage to the product.

- Keep the device out of reach of children and pets.
- The sticky glue pads are designed to trap insects and could be harmful if touched or ingested. Handle with care.
- This device is intended for indoor use only. Do not use outdoors or in wet conditions.
- Do not block the air intake or exhaust vents of the device.
- Unplug the device before cleaning or replacing the glue board.
- Do not attempt to disassemble or repair the device yourself. Refer all servicing to qualified personnel.

PACKAGE CONTENTS

Verify that all items are present in the package:

- 1 x Katchy Indoor Insect Trap Unit (Original, Black)
- 4 x Complimentary Sticky Glue Boards

SETUP

1. **Unpack the Device:** Carefully remove the Katchy Indoor Insect Trap and all accessories from its packaging.
2. **Insert a Glue Board:**
 - Locate the bottom compartment of the Katchy unit.
 - Twist the bottom cover counter-clockwise to unlock and remove it.
 - Peel off the protective film from one side of a new sticky glue board.
 - Place the glue board, sticky side up, into the designated slot in the bottom compartment.
 - Replace the bottom cover and twist clockwise to secure it.

moths, and other small bugs.

Glue Boards
allow for clean,
contact-free disposal

**Not intended
for house flies**

Image: The Katchy trap with its base open, revealing a circular sticky glue board placed inside. The image highlights the "Glue Boards allow for clean, contact-free disposal" feature.

3. Placement:

For optimal results, place the Katchy trap in areas where you observe the most insect activity. This typically includes:

- Near fruit bowls or food storage areas.
- Close to indoor plants, especially if they show signs of gnats or aphids.
- Near drains or garbage cans.
- In dark rooms or areas, as insects are more attracted to the UV light in low-light conditions.

Ensure the device is placed on a solid, stable surface. The Katchy Indoor Insect Trap is designed for indoor use only and is not intended for outdoor environments.

Image: The Katchy Indoor Insect Trap, black in color, positioned on a light wooden side table next to a potted houseplant. Dimensions are indicated as 5 inches wide and 8.8 inches tall.

OPERATING INSTRUCTIONS

The Katchy Indoor Insect Trap is designed for simple operation.

1. **Power On:** Plug the device into a standard electrical outlet. The UV light will illuminate, and the fan will begin to operate.
2. **Select Fan Setting:** The Katchy trap offers two fan settings:
 - **Standard:** Provides maximum suction power for effective insect trapping.
 - **Low:** Reduces fan speed and noise level, suitable for quieter environments.

Adjust the setting using the control buttons on the top of the unit.

3. **Optimal Usage:**
 - For best results, activate the Katchy trap at night or in dark conditions, as insects are highly attracted to the UV light in the absence of other light sources.
 - Allow the device to operate continuously for at least three nights to observe significant results.

- To enhance effectiveness for fruit flies, place a small cap of apple cider vinegar near (or even inside) the Katchy unit.
- Keep doors and windows closed in the room where the trap is operating to concentrate insect activity towards the device.

Image: A graphic illustrating tips for maximizing Katchy's effectiveness: activate at night, place near bug activity, and allow three nights for results. A pro tip about apple cider vinegar for fruit flies is also included.

MAINTENANCE

Regular maintenance ensures the continued effectiveness of your Katchy Indoor Insect Trap.

1. Replacing Glue Boards:

The sticky glue boards should be replaced every 3-4 weeks, or sooner if they become full of insects. This ensures maximum trapping efficiency.

- Unplug the device from the power outlet.
- Twist the bottom cover counter-clockwise to unlock and remove it.
- Carefully remove the used glue board. The design allows for clean, contact-free disposal.

- Insert a new glue board, sticky side up, and secure the bottom cover.

Image: Two hands holding circular Katchy sticky glue boards, both visibly covered with numerous small trapped insects, demonstrating the product's effectiveness.

2. Cleaning the Unit:

Periodically wipe the exterior of the unit with a soft, dry cloth to remove dust. Do not use abrasive cleaners or immerse the unit in water.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Device not turning on.	Not plugged in, power outlet issue, or internal fan blades disconnected.	Ensure the device is securely plugged into a working electrical outlet. Check if the fan blades are freely moving; if they appear disconnected or jammed, contact customer support.

Problem	Possible Cause	Solution
Not catching many insects.	Incorrect placement, too much ambient light, full glue board, or targeting wrong insect type.	<ul style="list-style-type: none"> Place the trap closer to areas of high insect activity (e.g., near plants, fruit, drains). Ensure the room is dark, especially at night, as UV light is most effective in low light. Replace the sticky glue board if it is full or has lost its adhesion. Note: Katchy is effective for mosquitos, gnats, moths, and fruit flies. It is not effective on house flies. Allow at least three nights for the device to show significant results.
Fan is noisy or not spinning correctly.	Obstruction in the fan, or internal issue.	Unplug the device and check for any visible obstructions. If the issue persists, contact customer support.

SPECIFICATIONS

Brand	KATCHY
Model Number	B07B6RZP4H
Style	Original, Black
Color	Black
Material	Paper (for glue boards)
Product Dimensions (Glue Board)	4.3"L x 4.3"W x 0.2"H
Unit Dimensions (Approx.)	5 inches (12.7 cm) diameter, 8.8 inches (22.35 cm) height
Item Weight	5.3 ounces (150 Grams)
Power Source	Electric
Target Species	Mosquitos, Gnats, Moths, Fruit Flies (Not effective on house flies)
UPC	742833225518
EPA Est. Numb.	93372-CHN-1
