## Korona 76620

# Korona Henry 76620 Mechanical Personal Scale User Manual

## INTRODUCTION

Thank you for choosing the Korona Henry 76620 Mechanical Personal Scale. This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your new scale. Please read these instructions carefully before first use to ensure accurate measurements and extend the product's lifespan. This analog scale is designed for precise body weight measurement up to 130 kg.

## SETUP

1. **Unpacking:** Carefully remove the scale from its packaging. Retain the packaging for future storage or transport.
2. **Placement:** Place the scale on a firm, flat, and level surface. Uneven or soft surfaces (like carpets) can affect accuracy.
3. **Zero Adjustment:** Before first use, and periodically thereafter, ensure the scale's pointer is aligned with the '0' mark. If not, use the small adjustment wheel, usually located near the dial, to manually set it to zero.

## OPERATING INSTRUCTIONS

1. **Step On:** Gently step onto the center of the scale's platform with bare feet. Stand still and distribute your weight evenly.
2. **Read Measurement:** Wait for the pointer to stabilize. Read your weight directly from the analog dial. The scale measures in 1 kg increments.
3. **Maximum Capacity:** Do not exceed the maximum weight capacity of 130 kg to prevent damage to the scale.
4. **Consistent Use:** For consistent readings, weigh yourself at the same time of day, preferably in the morning before breakfast and after using the restroom.

## MAINTENANCE AND CARE

- **Cleaning:** Wipe the scale's surface with a soft, damp cloth. Do not use abrasive cleaners or immerse the scale in water.
- **Storage:** Store the scale in a dry place at room temperature. Avoid extreme temperatures and direct sunlight.
- **Avoid Impact:** Do not drop the scale or subject it to heavy impacts, as this can affect its accuracy and functionality.

## TROUBLESHOOTING

- **Inaccurate Readings:**
  - Ensure the scale is placed on a hard, flat, and level surface.
  - Check if the pointer is set to '0' before use and adjust if necessary.
  - Ensure you are standing still and centered on the platform.
- **Pointer Not Moving:** Ensure there are no obstructions beneath the scale and that it is not overloaded.
