Briggs & Stratton 7079882YP

Briggs & Stratton OEM 7079882YP Bushing User Manual

Model: 7079882YP

1. Product Overview

The Briggs & Stratton OEM 7079882YP Bushing is a genuine replacement part designed for specific outdoor power equipment. This bushing is crucial for reducing friction and providing support for rotating or sliding parts within machinery, ensuring smooth operation and extending the lifespan of components.

The official logo for Briggs & Stratton, a leading manufacturer of engines and outdoor power equipment.

2. Installation Guide

This bushing is a replacement component and its installation requires specific knowledge of the equipment it is intended for. Always refer to the original equipment manufacturer's service manual for detailed, step-by-step instructions relevant to your specific machine. Professional installation is recommended.

General Installation Steps (Consult Equipment Manual for Specifics):

1. **Safety First:** Ensure the equipment is turned off, cooled down, and any power sources (e.g., spark plug wire disconnected, battery removed) are disengaged before beginning work.
2. **Identify Location:** Locate the worn or damaged bushing that needs replacement.
3. **Disassembly:** Carefully disassemble the surrounding components to gain access to the bushing. Note the order of removal for reassembly.
4. **Remove Old Bushing:** Use appropriate tools to remove the old bushing. This may involve pressing it out or carefully prying it.
5. **Clean Area:** Clean the housing or bore where the new bushing will be installed, removing any debris or corrosion.

6. **Install New Bushing:** Carefully press or tap the new Briggs & Stratton 7079882YP bushing into place. Ensure it is seated correctly and flush. Avoid damaging the bushing during installation.
7. **Reassembly:** Reassemble all components in the reverse order of disassembly. Ensure all fasteners are tightened to the manufacturer's specifications.
8. **Test:** After reassembly, perform a functional test of the equipment to ensure proper operation and that the new bushing is performing as expected.

3. Function and Operation

The 7079882YP bushing serves as a bearing surface, typically made of steel, designed to reduce friction between moving parts and provide a stable pivot or support point. It allows for smooth rotation or sliding motion while minimizing wear on more expensive components. Proper functioning of the bushing is critical for the efficiency and longevity of the machinery it is installed in.

4. Maintenance

As a wear component, the 7079882YP bushing requires periodic inspection. While the bushing itself is generally maintenance-free once installed, its surrounding components may require lubrication or cleaning. Refer to your equipment's maintenance schedule for specific lubrication points and intervals.

Inspection:

- Regularly inspect the area around the bushing for signs of excessive wear, looseness, or unusual noise during operation.
- Look for play in the moving parts that the bushing supports. Excessive play indicates a worn bushing.

If significant wear is observed, the bushing should be replaced promptly to prevent damage to other parts of the equipment.

5. Troubleshooting

A worn or failing bushing can manifest in several ways, depending on its application within the equipment.

Common Symptoms of a Worn Bushing:

- **Excessive Play:** Noticeable looseness or wobbling in the component the bushing supports.
- **Increased Noise:** Squeaking, grinding, or rattling sounds coming from the area of the bushing.
- **Reduced Performance:** The affected mechanism may operate less smoothly or with increased effort.
- **Vibration:** Unusual vibrations during equipment operation.

If any of these symptoms are present, it is advisable to inspect the bushing and replace it if wear is confirmed. Continuing to operate equipment with a worn bushing can lead to more significant and costly damage to other components.

6. Specifications

Specification	Detail
Part Number	7079882YP

Specification	Detail
Manufacturer	Briggs and Stratton
Item Weight	4.2 ounces
Material	STEEL
Item Package Quantity	1

7. Warranty and Support

As an OEM replacement part, the warranty for the Briggs & Stratton 7079882YP Bushing is typically covered under the terms provided by Briggs & Stratton for their genuine parts. For specific warranty details, including coverage period and claims process, please refer to the official Briggs & Stratton website or contact their customer support directly.

For technical support or further inquiries regarding this part, it is recommended to consult the service manual of the equipment in which it is installed or contact Briggs & Stratton customer service.
