ASSEMBLY INSTRUCTIONS

Assembling the BePuzzled Owl 3D Crystal Puzzle requires careful attention to detail and spatial reasoning. Follow these general steps for assembly:

1. **Unpack and Sort:** Carefully remove all 42 crystal puzzle pieces from the packaging. It may be helpful to sort the pieces by shape or size initially, though many pieces are unique.
2. **Identify Key Pieces:** Look for the base pieces (often larger or distinct) and any central connecting pieces that form the core structure of the owl.
3. **Interlock Pieces:** Begin interlocking the pieces according to their unique shapes. The pieces are designed to fit together precisely. Some pieces may require a gentle twist or push to snap into place.
4. **Build Layer by Layer:** Most 3D crystal puzzles are built in layers or sections. Work systematically, ensuring each piece is securely connected before adding the next.
5. **Refer to Solutions (Optional):** If you encounter difficulty, step-by-step puzzle solutions are available online to

assist with the assembly process. Do not force pieces if they do not fit.

6. **Attach Base:** Once the main owl figure is complete, attach it securely to its designated base piece.

OPERATING TIPS

While there is no "operation" in the traditional sense for a puzzle, here are tips to enhance your puzzle-solving experience:

- **Work in a Well-Lit Area:** Good lighting will help you distinguish the subtle differences in piece shapes and connections.
- **Be Patient:** 3D crystal puzzles can be challenging. Take your time and enjoy the process.
- **Utilize Online Resources:** If you get stuck, remember that step-by-step solutions are often available online from the manufacturer to guide you through difficult sections.
- **Display Your Creation:** Once completed, the owl puzzle serves as an attractive decorative item.

MAINTENANCE

To maintain the clarity and appearance of your BePuzzled Owl 3D Crystal Puzzle:

- **Cleaning:** Gently wipe the assembled model with a soft, dry, lint-free cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these may scratch or damage the crystal-like finish.
- **Storage:** Store the puzzle in a cool, dry place away from direct sunlight. Prolonged exposure to direct sunlight may cause discoloration or warping of the plastic over time.
- **Handling:** Handle the assembled puzzle with care to prevent pieces from detaching or the structure from breaking.

TROUBLESHOOTING

If you encounter any issues during the assembly of your puzzle, consider the following:

- **Pieces Not Fitting:** Ensure you are attempting to connect the correct pieces. Many pieces may look similar but have unique interlocking patterns. Rotate pieces to try different orientations. Do not force pieces together, as this can cause damage.
- **Missing Pieces:** Double-check the packaging and your work area thoroughly. If a piece is genuinely missing, contact the manufacturer's customer support.
- **Difficulty with a Section:** Refer to the online step-by-step solutions provided by BePuzzled or University Games for visual guidance on specific sections of the puzzle.
