Figure 5.1: Top view of the motor unit showing the two speed control buttons.

1. Ensure the appliance is correctly assembled and plugged in.
2. **Speed I (Gentle):** Press and hold the button marked with a single line (I) for a slower, more controlled chop, ideal for softer ingredients or coarser results.
3. **Speed II (Powerful):** Press and hold the button marked with a double line (II) for a faster, more powerful chop, suitable for harder ingredients or finer results.
4. Pulse operation: For best results and to prevent over-processing, use short pulses by pressing and releasing the desired speed button repeatedly.
5. Once chopping is complete, release the button and unplug the appliance from the power outlet.
6. Carefully remove the motor unit, then the lid, and finally the blade assembly before emptying the chopped ingredients.

#### Tips for Best Results:

- Cut larger ingredients into smaller, uniform pieces (approx. 1-2 cm) before placing them in the container.
- Do not overload the container. Process in smaller batches if necessary.
- For ingredients like herbs or garlic, add a small amount of liquid (water or oil) to help them circulate and chop evenly.
