Lafuma LFM3120-7057

Lafuma Futura Air Comfort Zero Gravity Recliner User Manual

Model: LFM3120-7057

1. Product Overview

The Lafuma Futura Air Comfort Zero Gravity Recliner is designed to provide exceptional comfort and relaxation, whether for outdoor patio use, camping, or simply unwinding. Its ergonomic design allows for multiple reclining positions, including a 'zero gravity' position that helps alleviate stress and back pain by distributing body weight evenly.

This recliner features a durable HLE steel frame and a breathable, padded AirComfort seat pad, ensuring both stability and comfort. It is also foldable for convenient storage and transport.

2. Safety Information

Please read and understand all safety instructions before using the Lafuma Futura Air Comfort Zero Gravity Recliner.

- **Weight Limit:** This chair is designed for use by one person only and has a maximum weight capacity of 308

pounds (approximately 140 kg). Exceeding this limit may result in damage to the chair or personal injury.

- **Folding and Storage:** Always ensure the chair is fully folded and secured before moving or storing it to prevent accidental unfolding or injury. Store in a safe place away from high traffic areas.
- **Stable Surface:** Always place the recliner on a flat, stable, and level surface to prevent tipping. Avoid uneven ground or slopes.
- **Pinch Points:** Be aware of potential pinch points when folding or unfolding the chair, particularly around the frame joints and armrests. Keep hands and fingers clear.
- **Children and Pets:** Keep children and pets away from the chair during assembly, folding, and adjustment to prevent accidents.

3. Setup and Initial Use

The Lafuma Futura Air Comfort Recliner comes pre-assembled and does not require complex setup. Follow these steps for initial use:

1. **Unfolding the Chair:** Carefully remove the chair from its packaging. Hold the frame firmly and gently pull the front and back legs apart until the chair is fully extended and stable. Ensure all locking mechanisms (if any) are engaged.
2. **Positioning the Headrest:** The adjustable headrest can be slid up or down the backrest to provide optimal head or lumbar support, depending on your preference.
3. **Checking Stability:** Before sitting, gently push down on the seat and backrest to ensure the chair is fully open and stable on the ground.

Image 3.1: The Lafuma Futura Air Comfort Zero Gravity Recliner shown in its compact, folded state. This demonstrates the chair's portability and ease of storage when not in use.

4. Operating Instructions

The Lafuma Futura Air Comfort Recliner offers multiple reclining positions for personalized comfort.

1. **Sitting Down:** Approach the chair from the front. Ensure it is in an upright, stable position. Sit down gently, distributing your weight evenly.
2. **Reclining:** To recline, gently push back with your body weight while simultaneously pushing forward on the armrests. The chair will smoothly glide into your desired position.
3. **Zero Gravity Position:** Continue reclining until your legs are elevated above your heart, achieving the zero gravity position. This position is designed to reduce pressure on your spine and improve circulation.
4. **Adjusting Friction:** The chair features a mechanism to increase or decrease the friction on the slide bar, allowing you to control how easily the chair reclines and holds its position. Adjust this to your comfort level.
5. **Returning to Upright Position:** To return to an upright position, gently lean forward and use your feet to push down on the footrest while pulling on the front of each armrest.

Image 4.1: A person relaxing in the Lafuma Futura Air Comfort Zero Gravity Recliner, demonstrating a reclined position. This highlights the chair's ergonomic design and its suitability for extended periods of relaxation.

5. Maintenance and Care

Proper care will extend the life and appearance of your Lafuma Futura Air Comfort Recliner.

- **Cleaning the Fabric:** The AirComfort seat pad is designed for easy maintenance. Simply wipe clean with a damp cloth and mild soap. Avoid harsh chemicals or abrasive cleaners, as these can damage the fabric.
- **Frame Care:** The HLE steel frame can be wiped clean with a damp cloth. Dry thoroughly to prevent rust.
- **Fabric Removal:** The canvas seat is removable and can be easily replaced if needed. Refer to the manufacturer's guidelines for specific instructions on removal and reattachment.
- **Storage:** When not in use, especially during inclement weather or off-season, fold the chair and store it in a dry, protected area to prevent wear and tear from elements.
- **Regular Inspection:** Periodically inspect all bolts, screws, and moving parts to ensure they are secure. Tighten any loose fasteners as necessary.

6. Troubleshooting

If you encounter any issues with your Lafuma Futura Air Comfort Recliner, please refer to the following common solutions:

- **Chair is Stiff to Recline/Return:**
  - Ensure the friction mechanism on the armrests is not set too high. Adjust it to a lower setting.
  - Apply a small amount of silicone-based lubricant to the moving joints and slide bars if resistance persists. Avoid oil-based lubricants.
- **Chair Does Not Hold Position:**
  - Increase the friction setting on the armrests.
  - Ensure you are within the specified weight limit of 308 pounds.
- **Squeaking Noises:**
  - Identify the source of the squeak. It is often a joint that needs lubrication. Use a silicone-based spray lubricant on the pivot points.
- **Fabric Appears Loose or Sagging:**
  - Check the attachment points of the fabric to the frame. Ensure all clips or laces (depending on model) are securely fastened.

If these steps do not resolve the issue, please contact Lafuma customer support for further assistance.

7. Specifications
