## OPERATING INSTRUCTIONS

### Basic Keyboard Functions

The 1STPLAYER MK6 is a standard 104-key layout keyboard. All standard alphanumeric and function keys operate as expected. The keyboard features Outemu Blue mechanical switches, providing a tactile and audible click feedback.

### RGB Lighting Control

The keyboard features dynamic RGB backlighting. You can cycle through various lighting modes and adjust brightness directly on the keyboard or through the dedicated software.

- **Changing Lighting Modes:** Use the function keys (Fn) combined with specific keys (refer to the keyboard's keycap legends or software for exact combinations) to cycle through pre-set RGB effects.
- **Adjusting Brightness:** The dedicated roller on the top right of the keyboard can adjust the backlight brightness. Press the button next to the roller to switch its function between volume control and brightness control.

### Dedicated Media Control

The MK6 keyboard includes dedicated media keys for convenient control of audio and video playback.

- **Volume Control:** Use the dedicated roller on the top right to adjust system volume.
- **Playback Control:** Dedicated buttons for rewind, play/pause, and forward are located next to the volume roller.

### Software Customization

For advanced users, the 1STPLAYER software allows for comprehensive customization:

- **RGB Effects:** Access 19 different lighting modes and customize colors.
- **Key Remapping:** Reassign key functions.
- **Macro Recording:** Create and assign macros for complex commands.
- **Programmable Game Mode:** Highlight specific keys for gaming, optimizing your setup for different titles.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to wipe the keyboard surface. For deeper cleaning, use the provided keycap puller to remove keycaps and clean dust or debris with compressed air or a small brush.
- **Switch Replacement:** The MK6 features hot-swappable switches. Use the provided switch puller to carefully remove and replace individual switches if needed. Ensure the new switch is aligned correctly before pressing it into place.
- **Storage:** Store the keyboard in a cool, dry place away from direct sunlight and extreme temperatures.

## TROUBLESHOOTING

Problem	Solution
Keyboard not responding	Check USB cable connection. Try a different USB port. Restart your computer. Ensure no physical damage to the cable or port.
RGB lighting not working	Check brightness settings using the dedicated roller or software. Ensure the software is installed and running correctly. Try resetting the keyboard to factory defaults (refer to software or specific key combination).
Specific keys not working	Clean under the keycap for debris. If hot-swappable, try replacing the switch with one of the extra switches provided. Ensure the keycap is properly seated.
Software not detecting keyboard	Reinstall the software. Ensure the keyboard is directly connected to the computer (avoid USB hubs if possible). Check for software updates.
