West Ivory LED-R38-GRN-25FT

West Ivory 25ft Green LED Rope Light Instruction Manual

Model: LED-R38-GRN-25FT

1. PRODUCT OVERVIEW

The West Ivory 25ft Green LED Rope Light is designed for both indoor and outdoor accent lighting. It features 190 LEDs providing 360-degree illumination, 8 distinct lighting modes, and a durable IP65-rated PVC casing. This rope light is connectable, allowing for extended lengths up to 300 feet, and includes an integrated fuse for enhanced safety.

2. WHAT'S IN THE BOX

Upon unpacking, verify that all components are present:

- 1 LED Rope Light (25 feet, Green)
- 1 Power Cord with Controller
- 1 Accessory Bag (containing 10 clips, 10 zip ties, and 20 Phillips screws for mounting)

Image: All components included in the product package.

3. SETUP AND INSTALLATION

Follow these steps for proper installation:

1. **Uncoil the Rope Light:** Carefully uncoil the LED rope light from its packaging.
2. **Plan Placement:** Determine the desired path for your rope light. The flexible PVC tubing allows for bending and shaping to fit various designs.
3. **Mounting:** Use the provided clips, zip ties, and screws to secure the rope light in place. Ensure the clips are evenly spaced to support the light's weight and maintain its shape.
4. **Connecting Multiple Ropes (Optional):** If extending the length, connect the male end of one rope light to the female end of another. Ensure a secure connection. The system is extendable up to a maximum length of 300 feet.
5. **Power Connection:** Connect the power cord to the rope light and then plug it into a standard electrical outlet.

Extendable

Safely combine multiple lengths
Connectable up to 300ft

Video: This video demonstrates the general appearance and application of WYZworks LED rope lights, showcasing their use in various outdoor settings and highlighting their durability and aesthetic appeal.

5. MAINTENANCE

The West Ivory LED Rope Light is designed for durability and minimal maintenance:

- **Weather Resistance:** The light strand has an IP65 rating, indicating it is protected against dust and low-pressure water jets. This allows for year-round outdoor usage. **Note:** The IP65 rating applies only to the light rope, not the power plug. The power plug portion requires protective covering when used outdoors.
- **Temperature Range:** The rope light is designed to withstand temperatures from -20°C to 50°C.
- **Cleaning:** Wipe the PVC tubing with a soft, damp cloth as needed. Do not use harsh chemicals or abrasive cleaners.

Weatherproof

year round outdoor usage

IP65
Water resistant
LED strand portion

NOTE: Power cord portion / white lead wire
Is not waterproof, requires protective covering when used outdoors

6. TROUBLESHOOTING

If you encounter issues with your rope light, consider the following:

- **Light Not Turning On:** Ensure the power cord is securely plugged into both the rope light and the electrical outlet. Check if the outlet is functional.
- **Flickering or Partial Lighting:** Verify that all connections, especially between multiple rope light sections, are tight and secure.
- **Safety Fuse:** The power cord includes an integrated fuse to protect against electrical hazards like short circuits and overheating. If the light stops working, check the fuse in the connector. A spare fuse is included for replacement.

Safety

Built-in fuse connector, including spare fuse

Will short circuit then shut off for an extra layer of protection from overcurrent and overload. Including overheating, burnout, and power surges. Replaceable
