

Drive Medical BP002

Pure Expressions Insulated Cooler Bag User Manual

Model: BP002

INTRODUCTION

Thank you for choosing the Drive Medical Pure Expressions Insulated Cooler Bag. This manual provides essential information for the proper use, care, and maintenance of your cooler bag. Please read it thoroughly before first use and keep it for future reference.

This cooler bag is designed to keep breast milk or other temperature-sensitive items cold for up to 8 hours or warm for up to 4 hours, making it ideal for transporting milk to and from work, daycare, or during travel.

INCLUDED COMPONENTS

The Pure Expressions Insulated Cooler Bag package includes the following items:

- 1 x Pure Expressions Insulated Cooler Bag (Navy Blue & Green)
- 4 x Cooler Packs
- 2 x 6oz Storage Bottles

Figure 1: Pure Expressions Insulated Cooler Bag with included bottles and ice packs. The bag is navy blue with green trim and features a zippered opening revealing the insulated interior.

SETUP AND PREPARATION

1. **Prepare Cooler Packs:** For optimal cooling performance, place the included cooler packs in a freezer for at least 6-8 hours prior to use, or until completely frozen.
2. **Clean Storage Bottles:** Before first use, and after each subsequent use, thoroughly wash the 6oz storage bottles with warm, soapy water. Rinse well and allow to air dry.
3. **Prepare Cooler Bag:** Ensure the interior of the cooler bag is clean and dry before placing items inside.

OPERATING INSTRUCTIONS

For Keeping Items Cold:

1. Place your pre-chilled breast milk or other cold items into the 6oz storage bottles or other suitable containers.
2. Arrange the frozen cooler packs around the bottles inside the insulated cooler bag. Ensure good contact between the packs and the items to be kept cold.
3. Securely close the zipper of the cooler bag to maintain the internal temperature.
4. The bag is designed to keep contents cold for up to 8 hours, depending on external temperatures and frequency of opening.

For Keeping Items Warm:

1. Place your warm items into the 6oz storage bottles or other suitable containers.
2. *Note:* The cooler packs are not designed for heating. For keeping items warm, rely on the bag's insulation.
3. Securely close the zipper of the cooler bag.
4. The bag is designed to keep contents warm for up to 4 hours, depending on external temperatures and initial temperature of contents.

For best results, minimize the time the bag is open and avoid placing hot and cold items together.

CARE AND MAINTENANCE

- **Cleaning the Bag:** The cooler bag should be hand washed only. Use a damp cloth with mild soap to wipe down the interior and exterior surfaces. Do not submerge the bag in water.
- **Drying:** Allow the bag to air dry completely before storing to prevent mold or mildew. Ensure the interior is thoroughly dry.
- **Cleaning Bottles:** The 6oz storage bottles are reusable and should be washed after each use. They are typically dishwasher safe (top rack) or can be hand washed with warm, soapy water.
- **Cooler Packs:** Wipe cooler packs clean with a damp cloth if they become soiled. Do not puncture or open the cooler packs.
- **Storage:** Store the cooler bag in a cool, dry place away from direct sunlight when not in use.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Contents not staying cold/warm for stated duration.	Cooler packs not fully frozen (for cold). Bag opened too frequently. High ambient temperature. Items not pre-chilled/pre-warmed.	Ensure cooler packs are completely frozen. Minimize opening the bag. Pre-chill/pre-warm contents before placing in bag. Consider adding more frozen packs if available for extended cooling in hot environments.
Unpleasant odor inside bag.	Improper cleaning or drying. Spills not cleaned promptly.	Thoroughly hand wash the interior with mild soap and water. Ensure the bag is completely air dried before storage. For persistent odors, a baking soda solution can be used, followed by thorough rinsing and drying.

PRODUCT SPECIFICATIONS

Model Number	BP002
Brand	Drive Medical
Color	Navy Blue & Green
Exterior Material	Polyester
Insulation Material	Polyvinyl Chloride (PVC)
