Casio MTP-VD01D-2EVUDF

Casio Enticer Analog Blue Dial Men's Watch - MTP-VD01D-2EVUDF Instruction Manual

Model: MTP-VD01D-2EVUDF

1. INTRODUCTION

This manual provides essential information for the proper use, setup, maintenance, and troubleshooting of your Casio Enticer Analog Blue Dial Men's Watch, Model MTP-VD01D-2EVUDF. Please read this manual thoroughly to ensure optimal performance and longevity of your timepiece.

2. PRODUCT OVERVIEW

The Casio Enticer MTP-VD01D-2EVUDF is an analog men's watch featuring a striking blue dial and a durable stainless steel band. It is designed for everyday wear with practical features.

Key Features:

- **Dial Color:** Blue, **Case Shape:** Round, **Dial Glass Material:** Mineral
- **Band Color:** Silver, **Band Material:** Stainless Steel
- **Watch Movement Type:** Quartz, **Watch Display Type:** Analog
- **Case Material:** Stainless Steel, **Case Diameter:** 45 millimeters
- **Water Resistance Depth:** 50 meters, **Clasp:** Fold-Over Clasp with Safety

Components:

Your watch consists of the following main components:

- **Dial:** The face of the watch displaying time and date.
- **Hands:** Hour, minute, and second hands for time indication.
- **Crown:** Used for setting time and date.
- **Case:** The main body of the watch, housing the movement.
- **Band:** The stainless steel bracelet that secures the watch to your wrist.
- **Clasp:** The mechanism that fastens the band.

Product Visuals:

Front view of the Casio Enticer watch, showcasing its blue dial, silver stainless steel band, and clear time markers.

Side profile of the watch, highlighting the robust case and the functional crown.

Rear view showing the stainless steel case back with engraved details and the secure clasp.

The watch on a wrist, providing a perspective on its size and how it sits comfortably.

3. SETUP

Setting the Time:

1. Pull the crown out to the second click.
2. Rotate the crown to move the hands and set the desired time.
3. Push the crown back in to the normal position to start timekeeping.

Setting the Date:

1. Pull the crown out to the first click.
2. Rotate the crown to adjust the date.
3. Push the crown back in to the normal position.

Note: Avoid setting the date between 9:00 PM and 1:00 AM, as this may interfere with the automatic date change mechanism.

Battery:

The watch is powered by one LR44 battery, which is included. When the watch stops or the second hand moves erratically, it indicates a low battery and requires replacement.

4. OPERATING

Basic Timekeeping:

Once the time and date are set, the watch will continuously display the current time and date. The quartz movement ensures accurate timekeeping.

Water Resistance (50 Meters):

Your Casio Enticer watch is water resistant up to 50 meters (5 ATM). This means it is suitable for everyday use and can withstand splashes, rain, and brief immersion in water. It is **not** suitable for swimming, diving, or showering with hot water, as steam can penetrate the seals.

5. MAINTENANCE

Cleaning:

Wipe the watch case and band periodically with a soft, dry cloth to remove dirt and moisture. For the stainless steel band, a slightly damp cloth can be used, followed by a dry cloth. Avoid using chemical cleaners or abrasive materials.

Battery Replacement:

Battery life typically lasts several years. When the battery needs replacement, it is highly recommended to have it done by a qualified watch technician or an authorized Casio service center. This ensures proper battery installation and re-sealing for water resistance.

Water Resistance Care:

- Do not operate the crown or push buttons when the watch is wet.
- Avoid exposing the watch to extreme temperatures (e.g., direct sunlight on a car dashboard, very cold environments).
- If the watch is exposed to saltwater, rinse it thoroughly with fresh water and dry it with a soft cloth.

6. TROUBLESHOOTING

Watch Not Running:

- Ensure the crown is pushed all the way in.
- The battery may be depleted. Refer to the Battery Replacement section.

Incorrect Time/Date:

- Re-set the time and date according to the Setup section.
- If the issue persists, the watch may require professional inspection.

Condensation Inside Dial:

- Small amounts of condensation may appear temporarily due to sudden temperature changes but should clear within a short time.
- If condensation persists or is significant, it indicates a loss of water resistance. Seek immediate professional service to prevent damage to the movement.

7. SPECIFICATIONS

Feature	Specification
Model Number	MTP-VD01D-2EVUDF
Movement Type	Japanese Quartz
Display Type	Analog
Case Material	Stainless Steel
Case Diameter	45 Millimeters
Band Material	Stainless Steel
Band Color	Silver
Dial Color	Blue
Dial Glass Material	Mineral
