COLORLIFE BTJ01

COLORLIFE Electric Jellyfish Tank Table Lamp

Model: BTJ01

Introduction

Thank you for choosing the COLORLIFE Electric Jellyfish Tank Table Lamp. This product is designed to provide a calming and mesmerizing visual experience, simulating the gentle movement of jellyfish in an illuminated aquarium. It serves as an ideal mood light for relaxation in various indoor settings.

Safety Information

- This product is **not waterproof** and not water resistant. Avoid direct contact with water or placing it in wet environments to prevent electric shock or damage.
- Ensure the power adapter and cable are free from damage before use. Do not use if damaged.
- Keep out of reach of small children and pets to prevent accidental spills or tampering with electrical components.
- The top lid is removable. Exercise caution to prevent water spillage, especially if placed on surfaces sensitive to moisture.
- Use only the provided USB power cable with a compatible USB power source (5V).
- Do not attempt to open or repair the device yourself. Refer to qualified personnel for servicing.

Package Contents

- 1 x COLORLIFE Electric Jellyfish Tank Table Lamp Unit
- 2 x Artificial Jellyfish
- 2 x Artificial Fish
- 1 x USB Power Cable
- 1 x User Manual

Setup Instructions

1. **Prepare the Tank:** Carefully remove the top lid of the lamp unit.
2. **Fill with Water:** Fill the tank with clean, distilled water up to the indicated fill line (or approximately 1 inch from the top). Distilled water is recommended to prevent mineral buildup and ensure optimal jellyfish movement.
3. **Add Jellyfish and Fish:** Gently place the artificial jellyfish and fish into the water. Ensure they are fully submerged. For optimal movement, add 1-2 drops of liquid dish soap (non-foaming type) to the water. This helps reduce surface tension and allows the jellyfish to float and move more freely.

4. **Replace Lid:** Securely place the top lid back onto the lamp unit.
5. **Connect Power:** Plug the USB power cable into the lamp's power port and connect the other end to a compatible USB power adapter (not included) or a USB port.
6. **Initial Bubbles:** It is normal for small air bubbles to cling to the jellyfish and fish initially. These bubbles will dissipate over 1-2 days of continuous operation, allowing for smoother movement. Gently shaking the tank can help dislodge some bubbles.

Operating Instructions

1. **Power On/Off:** Press the "ON/OFF" button located on the front base of the lamp to turn the unit on or off.
2. **Change Light Color:** Press the "LIGHT" button on the front base to cycle through various color options. The lamp features color-changing LED lights.
3. **Adjust Water Flow Speed:** The lamp offers 3 different water flow speeds. These speeds control how fast the jellyfish and fish move within the tank. (Note: Specific button for speed adjustment is not detailed in product data, typically integrated with power/light button or automatic cycling).
4. **Automatic Shut-off:** The lamp is equipped with an 8-hour automatic shut-off function to conserve energy and for convenience.

Maintenance

- **Water Changes:** To maintain clarity and prevent algae growth, it is recommended to change the distilled water every 1-2 months.
- **Cleaning:** If the tank or artificial elements appear dirty, gently clean them with a soft cloth and mild soap. Rinse thoroughly before returning to the tank. Avoid abrasive cleaners.
- **Air Bubbles:** If new air bubbles appear on the jellyfish or fish after a water change, they should dissipate naturally within a day or two. A small drop of dish soap can assist this process.

Troubleshooting

Problem	Possible Cause	Solution
Jellyfish/Fish not moving or sinking	Too many air bubbles attached; insufficient water flow; incorrect water type.	Gently shake the tank to dislodge bubbles. Ensure water level is correct. Use distilled water. Add 1-2 drops of dish soap to reduce surface tension.
Lamp does not turn on	No power; faulty connection.	Check if the USB cable is securely plugged into both the lamp and the power source. Try a different USB port or power adapter.
Water appears cloudy or discolored	Mineral buildup from tap water; algae growth.	Perform a full water change using distilled water. Clean the tank and artificial elements thoroughly.

Specifications

- **Model Number:** BTJ01
- **Brand:** COLORLIFE
- **Product Dimensions:** 4"D x 4.5"W x 12.5"H
- **Item Weight:** 16 ounces
- **Material Type:** Acrylic, Plastic
- **Power Source:** Corded Electric (USB) or 3x AAA Batteries
- **Voltage:** 5 Volts
- **Wattage:** 5 watts
- **Light Source Type:** LED
- **Control Method:** Touch (Push Button)
- **Water Resistance Level:** Not Water Resistant
