## SETUP AND INSTALLATION

---

## Unpacking and Placement

- Carefully remove all packaging materials. Ensure no parts are left inside the drum or behind the machine.
- Remove the transport bars from the rear of the machine. Refer to the quick start guide for detailed instructions on transport bar removal.
- Place the washing machine on a firm, level surface. Adjust the feet to ensure the machine is stable and level.
- Ensure adequate ventilation around the machine. Do not install in areas prone to freezing temperatures.

## Water and Electrical Connection

- Connect the water inlet hose to a cold water tap with a 3/4" thread. Ensure the connection is secure to prevent leaks.
- Position the drain hose into a suitable drain or sink, ensuring it is securely fixed to prevent displacement during operation.
- Plug the power cord into a properly grounded electrical outlet. Ensure the voltage and frequency match the specifications on the machine's rating plate.

## Initial Setup

- Before the first wash, run a maintenance wash cycle without laundry and detergent to clean the drum.
- Familiarize yourself with the control panel.
- **TwinDos System:** Insert the UltraPhase 1 and UltraPhase 2 detergent cartridges into their respective compartments. The machine will automatically detect them.
- **WiFiConn@ct:** To enable smart features and app control, follow the instructions in the display to connect your washing machine to your home Wi-Fi network. Download the Miele@mobile app for remote control and monitoring.

## OPERATING INSTRUCTIONS

### Control Panel Overview

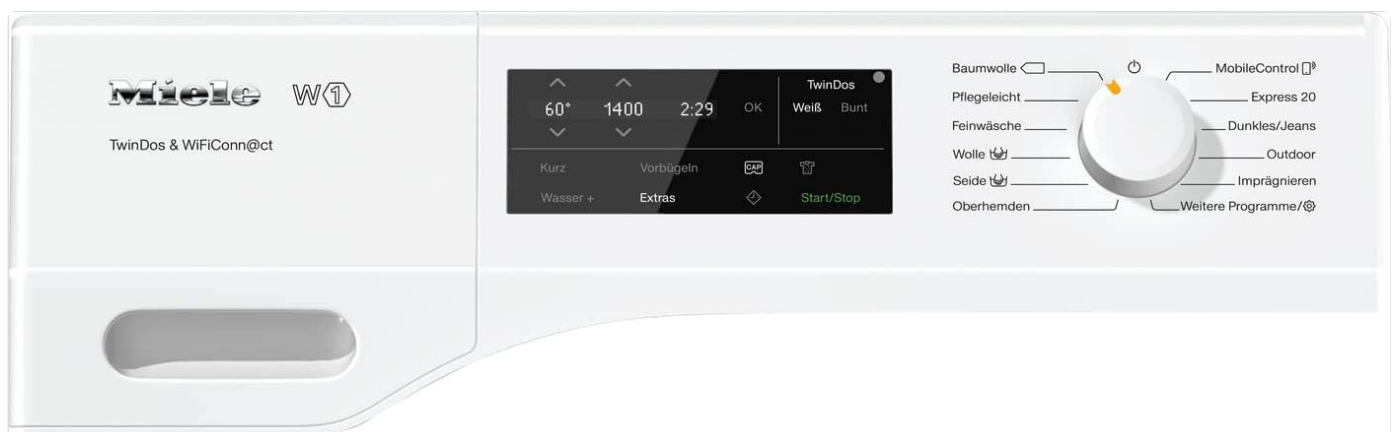

Image: Miele WCE 670 WCS Control Panel. This detailed view of the control panel highlights the central display, the rotary program selector on the right, and various touch buttons for settings like temperature, spin speed, and extra options.

- The display shows program information, time remaining, and settings.
- The rotary selector allows you to choose wash programs.
- Buttons for temperature, spin speed, and additional options (e.g., "Short", "Pre-ironing", "Water Plus", "Extra").
- The "Start/Stop" button initiates or pauses a cycle.

## Loading Laundry

- Sort laundry by fabric type, color, and degree of soiling.
- Open the door and load laundry loosely into the drum. Do not overload the machine.
- Close the door firmly until it clicks.

## Detergent Dispensing

- **TwinDos:** The machine automatically dispenses the correct amount of UltraPhase 1 and 2 liquid detergents based on the program and load. Ensure TwinDos is activated in the settings.
- **CapDosing:** For special applications (e.g., wool care, reproofing), insert a Miele Cap into the CapDosing compartment. The machine will dispense the contents at the appropriate time.
- **Manual Detergent:** If not using TwinDos or CapDosing, add powder or liquid detergent to the main detergent compartment in the dispenser drawer.

## Program Selection and Start

- Turn the program selector to choose the desired wash program (e.g., Cotton, Minimum Iron, Delicates, Wool, Silk, Express 20, Dark Garments/Jeans, Outdoor, Proofing, Shirts).
- Adjust temperature and spin speed if necessary using the corresponding buttons.
- Select any additional options (e.g., "Pre-ironing" to reduce creasing, "Water Plus" for increased water levels).
- Press the "Start/Stop" button to begin the wash cycle. The door will lock, and the program will start.
- To pause a program, press "Start/Stop" again. To cancel, turn the program selector to "Off".

## Using WiFiConn@ct

- Once connected to your home network, you can control and monitor your washing machine via the Miele@mobile app on your smartphone or tablet.
- Features include remote start, program selection, status updates, and notifications when the cycle is complete.
- Ensure the "MobileControl" option is enabled on the machine's control panel to allow app control.

## MAINTENANCE AND CARE

---

### Cleaning the Detergent Dispenser Drawer

- Regularly remove and clean the detergent dispenser drawer to prevent residue buildup.
- Rinse under warm water and use a brush if necessary.

### Cleaning the Drum and Door Seal

- Wipe the door seal after each wash to remove lint and moisture.
- Run a "Maintenance Wash" program (if available) or a hot wash cycle with a drum cleaner periodically to prevent odors and bacteria buildup.

### Cleaning the Drain Filter

- Locate the drain filter access panel at the bottom front of the machine.
- Place a shallow container underneath to catch any residual water.
- Carefully unscrew and remove the filter. Clean it under running water and remove any foreign objects.
- Reinsert and securely tighten the filter.

## TwinDos System Care

- If you do not use the TwinDos system for an extended period, run the "TwinDos maintenance" program to flush the lines and prevent blockages.
- Replace empty TwinDos cartridges promptly.

## TROUBLESHOOTING

Before contacting Miele Service, please consult the following table for common issues and their solutions. Many problems can be resolved without professional assistance.

Problem	Possible Cause	Solution
Machine does not start.	Power cord unplugged, door not closed properly, program not selected.	Check power connection, ensure door is latched, select a program and press Start/Stop.
Water not entering machine.	Water tap closed, inlet hose kinked, water filter blocked.	Open water tap, straighten hose, clean water inlet filter.
Poor wash results.	Overloading, incorrect detergent dosage, wrong program.	Reduce load size, check TwinDos settings or manual dosage, select appropriate program.
Unusual noise or vibration.	Transport bars not removed, machine not level, foreign objects in drum/pump.	Ensure transport bars are removed, level the machine, check drain filter and drum for objects.
Error message on display.	Specific issue indicated by code.	Refer to the full operating instructions for specific error code meanings and solutions. If persistent, contact Miele Service.
