Glacier Bay 833X-0001

Glacier Bay 833X-0001 Aragon WaterSense Tub and Shower Faucet Instruction Manual

Model: **833X-0001** | Brand: **Glacier Bay**

1. PRODUCT OVERVIEW

The Glacier Bay 833X-0001 Aragon WaterSense Tub and Shower Faucet is designed for reliable performance and water efficiency. It features a durable chrome finish, a 2-handle design for precise control over hot and cold water, and a single-function showerhead. This faucet is WaterSense certified, ensuring a 1.8 GPM flow rate to conserve water without compromising performance.

Key features include washerless cartridges for smooth operation and extended product life.

2. IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before installation and use. Failure to follow these instructions may result in property damage or personal injury.

- Always turn off the main water supply before beginning any installation or repair work.
- Wear appropriate personal protective equipment, such as safety glasses, during installation.
- If you are unsure about any part of the installation process, it is highly recommended to consult a qualified plumber or professional.
- Ensure all connections are secure to prevent leaks.

3. PACKAGE CONTENTS

Verify that all components are present before beginning installation. The package typically includes:

- Showerhead

- Hot and Cold Handles
- Tub Spout with Diverter
- Internal Wall Pipes (Valve Body)
- Washers, Rings, and Mounting Hardware
- Illustrated Installation Instructions

4. INSTALLATION INSTRUCTIONS

Installation of this tub and shower faucet is considered advanced. It is strongly recommended to consult a qualified plumber or professional for installation to ensure proper function and compliance with local codes.

Refer to the **illustrated installation instructions** included in your product packaging for detailed, step-by-step guidance specific to this model. These instructions will cover:

1. Preparation and water supply shut-off.
2. Mounting the valve body (solid brass valve) within the wall.
3. Connecting hot and cold water lines.
4. Installing the tub spout, showerhead, and handles.
5. Information regarding the plug for shower-only installations.
6. Testing for leaks and proper operation.

The product has been factory pressure tested to ensure quality and reliability.

5. OPERATING INSTRUCTIONS

The Glacier Bay 833X-0001 Aragon faucet features a user-friendly 2-handle design for controlling water flow and temperature.

- **Water Temperature Control:** Turn the left handle counter-clockwise to increase hot water flow and clockwise to decrease. Turn the right handle counter-clockwise to increase cold water flow and clockwise to decrease. Adjust both handles to achieve your desired water temperature.
- **Water Flow Control:** The further the handles are turned counter-clockwise, the greater the water flow.
- **Showerhead Operation:** The showerhead provides a single, consistent spray pattern. To divert water from the tub spout to the showerhead, pull up the diverter knob located on the tub spout. Push the knob down to return water flow to the tub spout.

6. MAINTENANCE AND CARE

Proper care and maintenance will ensure the longevity and appearance of your Glacier Bay faucet.

- **Cleaning:** Clean the faucet regularly with a soft cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the chrome finish.
- **Washerless Cartridges:** This faucet is equipped with washerless cartridges, which are designed for smooth operation and long life, typically requiring less maintenance than traditional washer-based faucets.
- **Hard Water:** In areas with hard water, mineral deposits may accumulate. Regular cleaning can help prevent buildup. For stubborn deposits, a solution of white vinegar and water can be used, followed by thorough rinsing.

7. TROUBLESHOOTING

If you encounter issues with your faucet, consider the following common solutions. For complex problems, professional assistance is recommended.

- **Low Water Pressure:** Check if the main water supply is fully open. Ensure there are no clogs in the showerhead or aerator (if applicable).
- **Leaks:** Verify that all connections are tightened properly. If leaks persist from the handles or spout, the internal cartridges may need inspection or replacement by a qualified professional.
- **Temperature Control Issues:** Ensure both hot and cold water supplies are functioning correctly.

If troubleshooting steps do not resolve the issue, contact a qualified plumber or Glacier Bay customer support.

8. SPECIFICATIONS

Brand	Glacier Bay
Model Number	833X-0001
Color	Chrome
Finish Type	Polished
Number of Handles	2
Handle Material	Brass
Mounting Type	Wall Mount
Item Weight	2.4 Pounds
Product Dimensions	11.15 x 8.45 x 6.46 inches
Flow Rate	1.8 GPM (WaterSense Certified)

9. WARRANTY INFORMATION

The Glacier Bay 833X-0001 Aragon WaterSense Tub and Shower Faucet is backed by a **Limited Lifetime Warranty**. This warranty covers defects in materials and workmanship under normal use and service.
