4.1 Basic Functions

- **Left Button:** Primary click function, typically used for selecting items or opening links.

4.2 Optical Tracking

The A4 Tech G3-200N uses optical tracking technology for precise cursor movement. For best performance, use the mouse on a non-reflective, opaque surface. Avoid using it on glass or highly reflective surfaces.

4.3 Wireless Range

The mouse operates wirelessly via the 2.4 GHz frequency band. Ensure the USB receiver is within a reasonable range

(typically up to 10 meters) for uninterrupted connectivity.

5. MAINTENANCE

5.1 Cleaning the Mouse

To clean your mouse, gently wipe its surface with a soft, slightly damp cloth. Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the finish or internal components. Ensure no liquid enters the mouse.

5.2 Battery Replacement

When the mouse performance degrades, the cursor becomes erratic, or the mouse stops responding, it may be time to replace the AA battery. Follow the battery installation steps outlined in Section 3.1.

6. TROUBLESHOOTING

Problem	Possible Solution
Mouse not responding	• Check if the mouse is powered on. • Ensure the USB receiver is securely plugged into a working USB port. • Replace the battery with a fresh AA battery. • Try plugging the USB receiver into a different USB port on your computer.
Erratic cursor movement	• Replace the battery. • Clean the optical sensor on the underside of the mouse with a soft, dry cloth. • Ensure you are using the mouse on a suitable, non-reflective surface.
Poor wireless connection	• Move the mouse closer to the USB receiver. • Ensure there are no large metal objects or other wireless devices (e.g., Wi-Fi routers, cordless phones) interfering with the signal between the mouse and receiver.
