## KOIOS 9001

# KOIOS Upgraded Juicer Machines User Manual

Model: 9001

Brand: KOIOS

## INTRODUCTION

Thank you for choosing the KOIOS Upgraded Juicer Machine. This slow masticating juicer is designed to extract maximum nutrients from your fruits and vegetables, providing you with fresh, healthy, and delicious juice. Its cold press technology minimizes oxidation and preserves vitamins, enzymes, and minerals. Please read this manual thoroughly before operation to ensure safe and efficient use.

The KOIOS Upgraded Juicer Machine, ready for use with fresh oranges.

## PRODUCT COMPONENTS

Familiarize yourself with the parts of your KOIOS juicer:

- Motor Base: Houses the full copper motor and control buttons.
- Hopper: Top opening where fruits and vegetables are fed.
- Pusher: Used to gently push ingredients into the juicer.
- Drum: Transparent chamber where juicing takes place.
- Auger: The spiral component that crushes and presses produce.
- Juicing Sieve: Stainless steel filter that separates juice from pulp.
- Blank End Cap: Secures the juicing assembly and expels pulp.
- Juice Container: Collects the extracted juice.
- Pulp Collector: Collects the dry pulp expelled from the juicer.
- Cleaning Brush: For easy cleaning of the sieve and other parts.

Product overview showing all detachable parts of the juicer.

## SETUP AND ASSEMBLY

Follow these steps to assemble your juicer before first use:

1. Insert the auger into the drum.
2. Place the juicing sieve onto the auger.
3. Cover the blank end cap on the end of the drum, rotating it clockwise until it aligns and clicks into place.
4. Attach the assembled drum to the base unit by twisting it clockwise until the locking clip button is pressed and it locks securely.
5. Place the pulp container under the pulp ejector and the juice container under the juice outlet.
6. Affix the hopper onto the top of the drum.

Visual guide for the five-step installation process.

## OPERATING INSTRUCTIONS

Prepare your ingredients by washing them thoroughly. Cut fruits and vegetables into smaller pieces (approximately 3 inches) to fit the feeding chute and ensure optimal juicing. Remove any hard pits or large seeds from fruits like peaches or plums.

### Speed Modes

The juicer features two speed modes for different types of produce:

- **SOFT Mode (70-100 RPM):** Ideal for soft and juicy fruits and vegetables such as watermelon, orange, grape, tomato, kiwi, etc.
- **HARD Mode (90-110 RPM):** Suitable for hard fruits and vegetables like apple, pear, carrot, beets, ginger, and kale.

## 2-Speed Control Mode

Suitable for kinds of fruits and vegetables. Extract various of fruits and vegetables with richer nutrition and less pulp. Also, reverse function to avoid stuck.

Control panel and examples for Soft and Hard speed modes.

### Juicing Process

1. Plug in the juicer and select the appropriate speed mode (SOFT or HARD) using the buttons on the motor base.
2. Slowly feed the prepared ingredients into the hopper. Use the pusher only if necessary to gently guide the produce down. Avoid forcing ingredients.
3. The juicer will automatically separate the juice into the juice container and the pulp into the pulp collector.

### Reverse Function

If ingredients get jammed or the juicer stops during operation, press the 'Reverse' button. This will rotate the auger in the opposite direction to clear the blockage. Release the button to resume normal operation. This function helps prevent clogging and ensures continuous juicing.

The Reverse function helps clear jams and prevent clogging.

## MAINTENANCE AND CLEANING

Regular cleaning ensures the longevity and hygiene of your juicer. All detachable parts are made from culinary grade, BPA-free materials.

### Disassembly for Cleaning

To disassemble, simply press the locking clip button and twist the drum counter-clockwise. All parts can then be easily removed.

### Cleaning Instructions

- Rinse all detachable parts under running water immediately after use to prevent pulp from drying.
- Use the included cleaning brush to thoroughly clean the juicing sieve, as small fibers can get stuck in the mesh.
- The detachable parts can be washed by hand with mild soap and water or placed in the dishwasher for convenience.
- Wipe the motor base with a damp cloth. Never immerse the motor base in water.
- Ensure all parts are completely dry before reassembling or storing the juicer.

## Easy to Disassemble and Clean

While pressing the locking clip button, twist the drum clockwise.  
Easy to clean, a cleaning brush included.

Easy disassembly and cleaning methods for the juicer.

## EASY TO CLEAN

All materials are culinary grade and BPA-Free. The detachable parts of the juicer can all be cleaned by hand or in the dishwasher. A brush included in the package to make cleaning easier and faster.

Rinsing the auger, a key component, under running water.

If you encounter any issues with your juicer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Juicer stops during operation or gets jammed.	Too much produce fed at once; hard ingredients causing blockage.	Press the 'Reverse' button to clear the blockage. If persistent, disassemble and clear manually. Feed ingredients slowly.
Excessive pulp in juice.	Sieve is clogged or damaged; improper assembly.	Clean the sieve thoroughly. Ensure all parts are assembled correctly and securely.
Low juice yield.	Incorrect speed mode selected; ingredients not cut properly.	Ensure appropriate speed mode (SOFT/HARD) is selected. Cut ingredients into smaller pieces.
Motor is unusually loud.	Overloading the motor; improper assembly.	Do not overload the juicer. Ensure all parts are correctly assembled. The juicer operates at less than 60dB for quiet use.

SPECIFICATIONS

Feature	Detail
Brand	KOIOS
Model Name	Upgraded Juicer Machines
Item Model Number	9001
Color	White
Product Dimensions	15.5"D x 10.2"W x 8.7"H
Item Weight	9.58 pounds
Power Source	AC
Voltage	110 Volts (AC)
Number of Speeds	2 (SOFT/HARD)
Special Feature	BPA Free, Quiet Motor
Blade Material	Stainless Steel
Capacity	1 Liters
Dishwasher Safe Parts	No (Detachable parts are easy to clean by hand or in dishwasher)
