SETUP

1. **Unpack Components:** Carefully remove all building blocks and the instruction manual from the packaging.
2. **Organize Pieces:** It is recommended to sort the micro-sized blocks by color or shape before beginning assembly to facilitate the building process.
3. **Prepare Work Area:** Ensure you have a clean, well-lit, and stable surface for assembly. Due to the small size of the blocks, a contained area is advised to prevent loss of pieces.

ASSEMBLY INSTRUCTIONS

Your Nanoblock Pokemon Snorlax Building Kit includes a detailed, step-by-step instruction booklet. Follow the diagrams and numerical sequence provided in the booklet to assemble your Snorlax model.

Step 1: Identify Pieces: Each step in the instruction booklet will show the specific blocks required. Carefully identify these blocks from your sorted pile.

Step 2: Connect Blocks: Nanoblocks are designed for a secure fit. Apply gentle, even pressure to connect the blocks. Avoid excessive force.

Step 3: Layer by Layer: Assembly typically proceeds layer by layer. Ensure each layer is firmly connected before moving to the next.

Reference Diagrams: Pay close attention to the orientation and placement of each block as shown in the diagrams.

MAINTENANCE

- **Cleaning:** To clean your assembled Nanoblock model, gently wipe it with a dry, soft cloth. For stubborn dust, a soft brush or compressed air can be used. Avoid using water or chemical cleaners, as these may damage the blocks.
- **Storage:** Store unassembled blocks in a secure container to prevent loss. Keep assembled models away from direct sunlight and extreme temperatures to preserve their color and structural integrity.

TROUBLESHOOTING

Problem	Solution
Missing pieces	Carefully check your work area and packaging. If pieces are genuinely missing, contact nanoblock customer support.
Blocks not connecting securely	Ensure blocks are aligned correctly and apply firm, even pressure. Verify you are using the correct block type and size for the step.
Model is unstable	Review previous steps in the instruction manual to ensure all connections are secure and blocks are placed in the correct orientation.
