INTRODUCTION

Thank you for choosing the Aquapik® PRO Water Flosser. This professional oral irrigator is designed to provide superior dental cleaning, effectively removing plaque and promoting healthy gums. It is especially beneficial for individuals with implants, braces, or sensitive gums. Please read this manual thoroughly before first use to ensure proper operation and maintenance.

SETUP GUIDE

1. **Choose and Insert Nozzle:** Select the desired nozzle from the 8 available options. Insert the nozzle firmly into the handle until you hear a click, ensuring it is securely in place.
2. **Fill Water Tank:** Open the water tank lid and fill the 600 ml tank with lukewarm water. It is recommended to use only water; avoid mouthwashes or other solutions as they may impair the device's function.
3. **Select Pressure Level:** The device offers 10 adjustable pressure levels (20 – 140 PSI). Rotate the dial on the base of the unit to select your preferred pressure setting. Start with a lower setting and gradually increase as you become comfortable.
4. **Positioning:** Lean over a sink and place the nozzle tip into your mouth, aiming it at your gumline at a 90-degree angle.

OPERATING INSTRUCTIONS

1. **Start Flossing:** Once positioned, switch on the water flosser using the ON/OFF switch on the handle. Allow the water to flow for approximately 2 minutes, ensuring thorough cleaning of all interdental spaces and gumlines.
2. **Technique:** Guide the water jet along the gumline, pausing briefly between teeth. For optimal cleaning, follow the contours of your teeth and gums.
3. **Completion:** After use, switch off the device using the ON/OFF switch on the handle.

MAINTENANCE AND CARE

- **Daily Cleaning:** After each use, empty any remaining water from the tank. Rinse the tank and the nozzle under running water.
- **Deep Cleaning (Weekly/Bi-weekly):** For thorough cleaning, fill the water tank with warm water and add 2 tablespoons of white vinegar. Run the solution through the unit until the tank is empty. Rinse by running a full tank of clean water through the unit.
- **Nozzle Replacement:** Nozzles should be replaced every 3-6 months, or sooner if they show signs of wear.
- **Storage:** Store the unit in a dry place away from direct sunlight. Ensure the water tank is empty and dry before storage.
