# Instruction Manual

## EWATCHPARTS 22MM LEATHER WATCH BAND STRAP FOR TISSOT T035617A COUTURIER

### 1. Introduction

This manual provides detailed instructions for the installation, operation, and maintenance of your Ewatchparts 22mm Leather Watch Band Strap, designed for the Tissot T035617A Couturier watch model. Please read these instructions carefully to ensure proper use and longevity of your watch band.

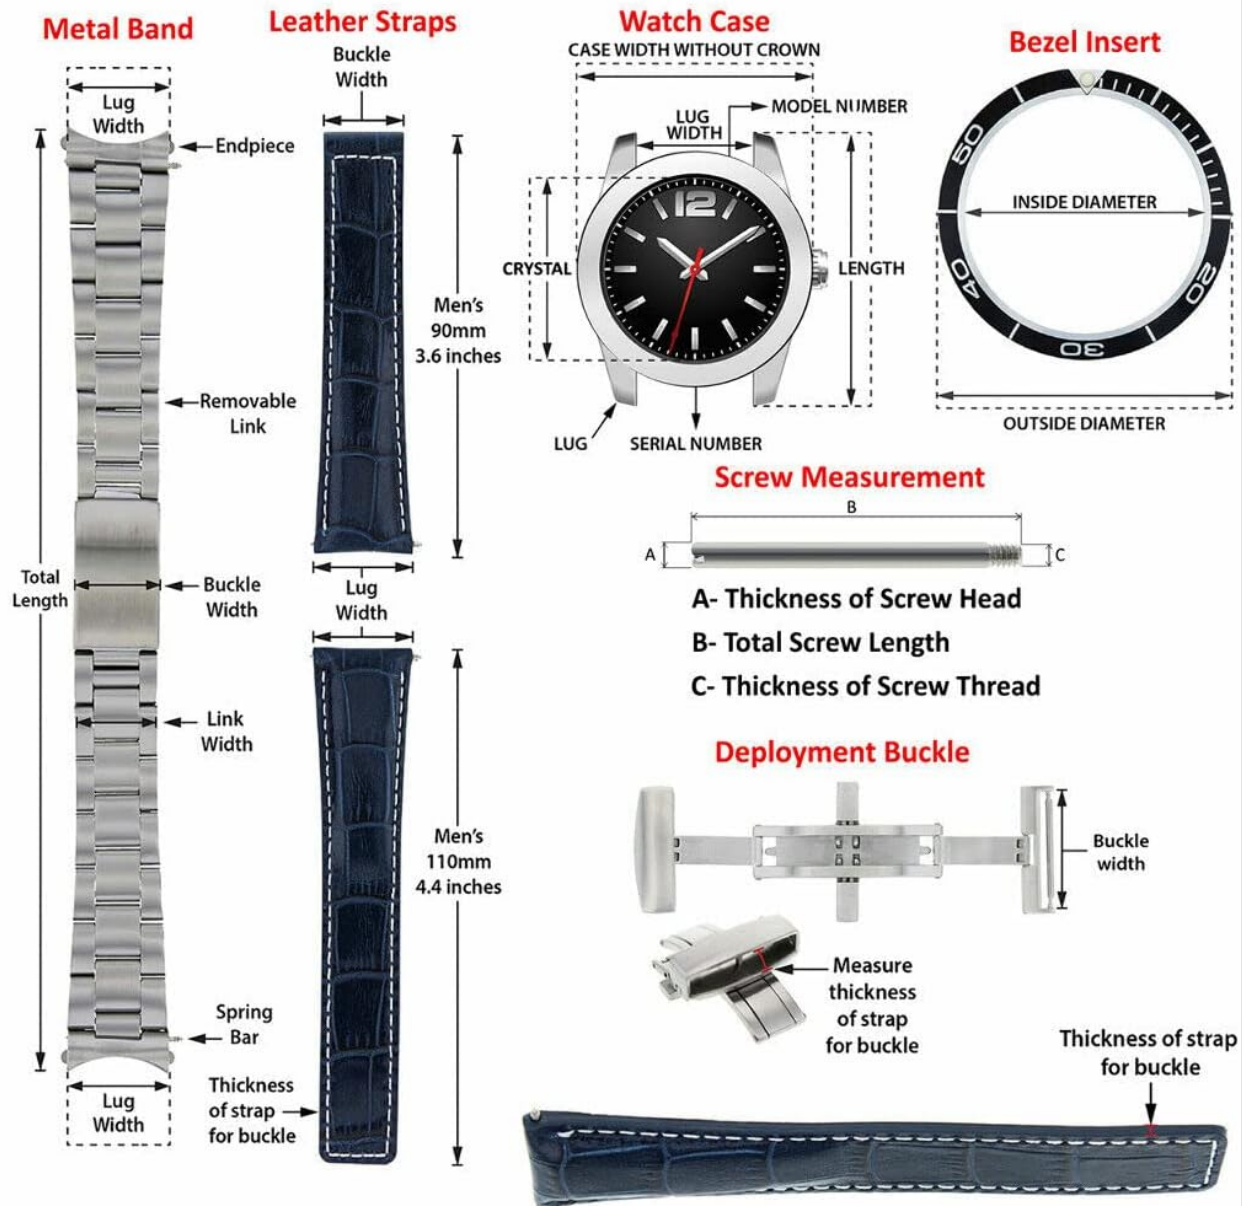

### 2. Compatibility

This 22mm leather watch band is specifically designed for the **39mm Tissot T035617A Couturier** watch model. It features a black leather strap with a butterfly deployment clasp. To ensure a perfect fit, it is crucial to verify your watch's lug width and model number before installation.

**Important:** Please measure your watch's lug width accurately. The lug width is the distance between the two points on your watch case where the strap attaches.

# How to Measure Your Watch Case and Watch Band Using a Ruler

**Figure 2.1:** Guide on how to measure your watch case and existing watch band using a ruler. This diagram illustrates how to determine the lug width (A), strap width at the buckle (C), and total strap length (D) for both metal bands and leather straps. It also shows how to measure screw dimensions for certain watch types.

## 3. Package Contents

Upon opening your package, please ensure all the following items are present:

- 1 x Leather Watch Strap (22mm, Black)
- 1 x Stainless Steel Butterfly Deployment Clasp
- 2 x Spring Bars

**Figure 3.1:** The Ewatchparts 22mm leather watch band strap shown with its separate butterfly deployment clasp. This image displays the two strap pieces and the stainless steel clasp mechanism, illustrating the components included in the package.

## 4. Setup and Installation

Follow these steps to install your new Ewatchparts leather watch band:

1. **Prepare Your Watch:** Place your watch face down on a soft, clean surface to prevent scratches.
2. **Remove Old Watch Band (if applicable):** Use a spring bar tool (not included) to compress the spring bars holding your old watch band in place. Carefully remove the old strap pieces.
3. **Attach the Deployment Clasp to the Shorter Strap Piece:** The butterfly deployment clasp typically attaches to the shorter strap piece. Slide the pin of the clasp through the hole at the end of the shorter strap piece and secure it. Ensure the clasp is oriented correctly so it will close properly when worn.
4. **Install the Shorter Strap Piece:** Insert one end of a spring bar into a lug hole on your watch case. Compress the other end of the spring bar with your tool and guide it into the opposite lug hole. Gently tug on the strap to ensure it is securely seated.
5. **Install the Longer Strap Piece:** Repeat the process for the longer strap piece on the other side of your watch case. This piece will have the holes for adjusting the length.
6. **Attach the Deployment Clasp to the Longer Strap Piece:** Once both strap pieces are attached to the watch, feed the longer strap piece through the deployment clasp. Adjust the length by selecting the appropriate hole on the longer strap piece and securing it with the clasp's pin.

**Figure 4.1:** The Ewatchparts 22mm leather watch band strap with the butterfly deployment clasp fully assembled and ready for attachment to a watch. This view shows the top side of the strap and the integrated clasp.

**Figure 4.2:** The underside of the Ewatchparts 22mm leather watch band strap, displaying the 'Top Quality Genuine Leather' marking and the '22' size indicator near the lug ends. This view is helpful for confirming strap details during installation.

## 5. Operating the Deployment Clasp

The butterfly deployment clasp provides a secure and comfortable fit while extending the life of your leather strap by reducing wear on the buckle holes.

1. **Opening the Clasp:** To open, gently press the two small buttons on the sides of the clasp. The clasp will spring open, allowing you to remove or put on your watch.
2. **Closing the Clasp:** To close, bring the two ends of the clasp together until they click securely into place. Ensure both sides are fully engaged.
3. **Adjusting Length:** The length of the strap is adjusted by selecting one of the pre-punched holes on the longer strap piece. Once the desired length is set, the clasp will maintain this adjustment, making it easy to put on and take off your watch without re-buckling.

## 6. Care and Maintenance

Proper care will help preserve the appearance and extend the lifespan of your leather watch band and stainless steel clasp.

- **Leather Strap Care:**

- Avoid prolonged exposure to direct sunlight, extreme heat, or cold, as this can cause the leather to dry out, crack, or fade.
- Keep the strap dry. Avoid contact with water, sweat, perfumes, cosmetics, and cleaning agents. If it gets wet, gently blot it with a soft, dry cloth and allow it to air dry naturally, away from direct heat.
- Clean the leather periodically with a soft, slightly damp cloth. For deeper cleaning or conditioning, use a leather-specific cleaner and conditioner, following the product's instructions.

- **Deployment Clasp Care:**

- The 316L stainless steel clasp is resistant to corrosion. Clean it with a soft, dry cloth to remove fingerprints and smudges.
- If necessary, use a slightly damp cloth with mild soap and water, then dry thoroughly. Avoid abrasive cleaners.

## 7. Troubleshooting

If you encounter issues with your watch band, consider the following:

- **Strap Does Not Fit:**

- **Incorrect Lug Width:** Double-check your watch's lug width measurement against the 22mm strap size. Refer to Section 2 for measurement guidance.
- **Incorrect Model:** Ensure your watch is the Tissot T035617A Couturier (39mm) model. This strap is designed for specific compatibility.

- **Difficulty Installing Spring Bars:**

- Ensure you are using a proper spring bar tool.
- Verify the spring bars are correctly aligned with the lug holes. Sometimes a slight angle adjustment is needed.

- **Clasp Not Closing Securely:**

- Ensure no debris is obstructing the clasp mechanism.
- Confirm that the strap is properly threaded through the clasp and the pin is securely in a hole.

## 8. Specifications

style="background-color: #fff;">

Feature	Detail
Strap Material	Premium Italian Leather
Strap Color	Black
Stitching	Black Thread
Padding Thickness	4mm
Lug Width	22mm
Buckle Width	20mm
Long Part Length	115mm (4.53 Inches)
Short Part Length	75mm (2.95 Inches)
Clasp Type	Butterfly Deployment Clasp
Clasp Material	316L Stainless Steel
Product Dimensions	2 x 2 x 2 inches; 2.08 ounces (packaging)

## 9. Warranty and Support
