Sirui SS-01

Sirui SS-01 Smart Selfie Stick with Built-In LED Light User Manual

Model: SS-01

INTRODUCTION

The Sirui SS-01 Smart Selfie Stick is designed to enhance your mobile photography experience. It features a built-in LED light for improved illumination and a 2.4 GHz Bluetooth remote for convenient photo capture. This manual provides detailed instructions for the setup, operation, and maintenance of your device.

PRODUCT COMPONENTS

The Sirui SS-01 includes the following main components:

- Extendable Monopod with Phone Holder
- Integrated LED Fill Light
- Bluetooth Remote Control (built-in)
- Charging Port (Micro USB)
- Rear Mirror (for self-portraits using the main camera)

Image: Back view of the selfie stick, featuring a small mirror for framing shots when using the phone's rear camera.

SETUP

1. **Charging the Device:** Connect the selfie stick to a USB power source using the provided charging cable. The charging time is approximately 2.0 hours. A full charge allows Bluetooth operation for up to 30 days with the fill light off.
2. **Attaching Your Phone:** Gently pull open the phone holder clamps and insert your smartphone. Ensure the phone is securely gripped by the holder. The holder is compatible with most iOS and

Android devices.

3. **Bluetooth Pairing:**

- Power on the selfie stick by pressing and holding the power button (often combined with the light button) until an indicator light flashes.
- On your smartphone, navigate to the Bluetooth settings.
- Search for available devices and select "SIRUI SS-01" (or similar name) to pair.
- Once paired, the indicator light on the selfie stick will typically stop flashing and remain solid.

The Bluetooth operating range is up to 33 feet (10 meters).

OPERATING INSTRUCTIONS

1. **Extending the Monopod:** Hold the handle firmly and gently pull the phone holder upwards to extend the telescopic arm to your desired length.
2. **Adjusting Phone Angle:** The phone holder can be tilted and rotated to achieve the optimal shooting angle. Loosen any locking mechanisms if present, adjust, and then secure.
3. **Using the LED Fill Light:** Press the light button (often the same as the power button, or a dedicated button) to cycle through different brightness levels or turn the light on/off.
4. **Taking Photos/Videos:**
 - Open your smartphone's camera application.
 - Press the camera shutter button on the selfie stick handle to remotely capture photos or start/stop video recording.
5. **Retracting the Monopod:** Push the phone holder back towards the handle until the telescopic arm is fully collapsed for compact storage.

MAINTENANCE

- **Cleaning:** Wipe the selfie stick with a soft, dry cloth. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the device in a cool, dry place away from direct sunlight and extreme temperatures. Ensure it is fully retracted before storage.
- **Battery Care:** To prolong battery life, avoid fully discharging the device frequently. Charge it regularly, even if not in use for extended periods.

- **Water Exposure:** This device is not waterproof. Avoid exposure to water or high humidity.

TROUBLESHOOTING

Problem	Solution
Device does not power on.	Ensure the device is fully charged. Connect it to a power source and charge for 2 hours.
Bluetooth will not pair with phone.	Make sure the selfie stick is powered on and in pairing mode. Turn off and on your phone's Bluetooth. Forget the device in your phone's Bluetooth settings and attempt to pair again. Ensure the selfie stick is within the 33-foot operating range.
Shutter button does not take photos.	Verify that the selfie stick is successfully paired via Bluetooth. Ensure your phone's camera app is open and active. Some phone models may require adjusting camera settings to use volume buttons as a shutter; the selfie stick typically emulates a volume button press.
LED light does not turn on.	Check if the device has sufficient battery charge. The LED light consumes more power than Bluetooth.
