# Buteny Key Lock Box (Model btlk002) Instruction Manual

Brand: Buteny | Model: btlk002

## PRODUCT OVERVIEW

The Buteny Key Lock Box provides a secure and convenient solution for storing house keys. Constructed from high-strength zinc alloy and heavy-duty steel, it offers robust protection against tampering. Its 4-digit combination lock ensures secure access, and the design allows for versatile installation options.

Image: The Buteny Key Lock Box, showcasing its compact design and visible 4-digit combination dials.

### Key Features:

- **Convenient Access:** Share your 4-digit combination with authorized individuals for easy key retrieval without hiding keys.
- **Enhanced Security:** Made from high-strength zinc alloy and heavy-duty steel, resistant to hammering, sawing, or prying.
- **Ample Capacity:** Interior dimensions of approximately 3.4" x 2.5" x 1.4" can hold up to 6 keys with keychains.
- **Versatile Installation:** Features a removable shackle for hanging on door knobs or car handles, or can be fixed to a door or wall.
- **Weather Protection:** Equipped with a flexible shutter shield to protect dials from rain and snow.

### Removable Shackle

Free choice of two installation methods

### 4-Digit Combination

More than 1000 password combinations are possible

### Weather Protection

Flexible shutter shields the dials from rain and snow

### Attack-Resistant Material

Protect the box from hammering, sawing or prying

## SETUP AND INSTALLATION

### Setting the Combination:

1. Open the lock box using the default combination (usually 0-0-0-0).
2. Locate the reset lever on the inside of the lock box.
3. Push the reset lever from position 'A' to 'B'.
4. Rotate the combination dials to your desired 4-digit code.
5. Return the reset lever from 'B' to 'A'.
6. Close the lock box and scramble the dials to secure your new combination.
7. Test your new combination several times before storing keys.

## Installation Options:

The Buteny Key Lock Box offers two primary installation methods:

- **Hanging Installation:** Utilize the removable shackle to hang the lock box on a door knob, railing, or similar fixture.
- **Wall-Mounted Installation:** For a more permanent solution, the lock box can be securely mounted to a wall using the provided screws and expandable plugs.

Image: Visual representation of the two installation methods: hanging the lock box on a door knob and securely mounting it to a wall.

## Installation Steps for Wall Mounting:

1. Hold the lock box against the desired wall surface and mark the positions for the four mounting holes.
2. Drill pilot holes at the marked positions.
3. Insert the enclosed expandable plugs into the drilled holes.
4. Align the lock box with the plugs and secure it using the four enclosed screws.

## OPERATING INSTRUCTIONS

---

### Opening the Lock Box:

1. Slide down the shutter door to reveal the combination dials.
2. Rotate the dials to your preset 4-digit combination.
3. Press the release button (usually located below the dials) to open the front panel.
4. Retrieve or place keys inside.

### Closing and Securing:

1. Close the front panel firmly until it clicks shut.
2. Scramble the combination dials to a random sequence to lock the box.
3. Slide up the shutter door to protect the dials from weather and conceal the combination.

## MAINTENANCE

---

To ensure the longevity and optimal performance of your Buteny Key Lock Box, follow these maintenance guidelines:

- **Regular Cleaning:** Periodically wipe down the exterior with a soft, damp cloth to remove dirt and grime. Avoid abrasive cleaners.
- **Lubrication:** If the combination dials or opening mechanism feel stiff, apply a small amount of silicone-based lubricant to the moving parts.
- **Weather Protection:** Always keep the shutter door closed when not in use to protect the dials from rain, snow, and dust.
- **Inspection:** Regularly check for any signs of wear or damage to the shackle, housing, or combination dials.

Image: The key lock box is shown enduring various weather conditions, emphasizing its durable shutter board for rain and snow resistance.

### TROUBLESHOOTING

- **Difficulty Opening/Closing:** Ensure the combination is correctly aligned. If the mechanism feels stiff, apply a silicone lubricant. Avoid forcing the mechanism.
- **Combination Dials Stuck:** Check for any debris obstructing the dials. Clean the dials and apply lubricant if necessary.
- **Lost Combination:** If you forget your combination, there is no master key or override. It is crucial to record your combination in a secure place.
- **Shackle Not Releasing:** Ensure the lock box is fully open and the release button is pressed firmly.
