

## Lampa N50216

# Lampa NORDRIVE N50216 P Post. Radius-2 Aluminum 2-Bike Rack Instruction Manual

## 1. INTRODUCTION

---

This manual provides detailed instructions for the safe and effective installation, operation, and maintenance of your Lampa NORDRIVE N50216 P Post. Radius-2 Aluminum 2-Bike Rack. This versatile rear-mounted bike carrier is designed to transport up to two bicycles securely on your vehicle.

## 2. SAFETY INFORMATION

---

- Read all instructions carefully before installation and use.
- Ensure all straps and fasteners are securely tightened before each journey.
- Do not exceed the maximum weight capacity of the bike rack or your vehicle's rear load limit.
- Always check local regulations regarding rear-mounted bike racks and visibility of license plates and vehicle lights.
- Periodically check the rack's stability during long trips.

## 3. PACKAGE CONTENTS

---

Please verify that all the following components are included in your package:

- Lampa NORDRIVE N50216 P Post. Radius-2 Bike Rack frame
- Anodized aluminum support slides with wheel bays
- Quick-release wheel straps
- 6 double-action fastening straps
- Soft non-slip rubber support pads
- Instruction Manual

## 4. SETUP AND INSTALLATION

---

Follow these steps for quick and easy installation:

1. The bike rack is designed for quick and easy assembly without the need for drilling or specialized tools.
2. Position the soft non-slip rubber support pads against your vehicle's rear surface. These pads protect your vehicle's paintwork and provide a secure grip.
3. Adjust the rack's frame using the robust front-fixing joints. This allows for a perfect adaptation to a wide range of car models. Ensure the rack sits firmly and level on your vehicle.
4. Secure the rack to your vehicle using the 6 double-action fastening straps. Attach the hooks to appropriate points on your vehicle (e.g., trunk lid edges, bumper). Pull all straps taut to ensure the rack is stable and does not move.
5. Double-check all connection points and strap tension before proceeding.

*This image shows the Lampa NORDRIVE N50216 P Post. Radius-2 bike rack in its folded position, attached to the rear of a vehicle. This demonstrates how the rack appears when not in use or during initial setup before bikes are loaded.*

## 5. OPERATING INSTRUCTIONS

---

Once the rack is securely installed, follow these steps to load your bicycles:

1. Load your bicycles onto the anodized aluminum support slides. The rack is compatible with triangular frame bicycles and women's bicycles.
2. Secure each bicycle using the quick-release wheel straps. Ensure the wheels are firmly held in the sliding wheel bays.
3. If using optional frame securing mechanisms (e.g., Pac-Arm, sold separately), attach them to the bicycle frames and the rack for additional stability.
4. Ensure bicycles are evenly distributed on the rack and do not obstruct your vehicle's lights or license plate. If obstruction occurs, consider using an auxiliary light board (sold separately) to comply with traffic regulations.

5. Before driving, give the bikes a gentle shake to confirm they are securely fastened and will not shift during transit.

*This image provides a close-up view of the bike rack's arms, highlighting the attachment points for bicycles. It also indicates the 'Pac-Arm' as an optional accessory for additional bike security.*

## 6. MAINTENANCE

---

To ensure the longevity and safe operation of your bike rack, perform the following maintenance:

- **Regular Inspection:** Periodically inspect all straps, buckles, frame components, and rubber pads for any signs of wear, damage, or corrosion. Replace worn parts immediately.
- **Cleaning:** Clean the rack with mild soap and water after use, especially if exposed to dirt, salt, or harsh weather conditions. Rinse thoroughly and dry completely.
- **Lubrication:** Lubricate any moving joints or pivot points as needed to ensure smooth operation.
- **Storage:** When not in use, fold the rack to reduce its bulk and store it in a dry, protected area away from direct sunlight and extreme temperatures.

## 7. TROUBLESHOOTING

---

Refer to the following common issues and their solutions:

- **Rack feels unstable:** Re-check all 6 fastening straps to ensure they are taut and correctly attached to your vehicle. Verify the frame adjustment for a snug fit to your specific car model.
- **Bicycles are not secure:** Ensure all quick-release wheel straps are tightened around the bicycle wheels. If using, check that optional frame holders (like the Pac-Arm) are properly engaged and locked.
- **Difficulty fitting bikes:** Adjust the sliding wheel bays on the anodized aluminum support slides to

accommodate different bike sizes. Ensure compatibility with triangular frames or women's bikes.

- **Scratches on vehicle:** Ensure the soft non-slip rubber support pads are correctly positioned and clean. Avoid overtightening straps which can cause excessive pressure.

## 8. SPECIFICATIONS

---

<b>Model</b>	N50216
<b>Brand</b>	Lampa
<b>Material</b>	Anodized Aluminum
<b>Capacity</b>	Up to 2 bicycles (versatile for 2 or 3 depending on bicycle type and size)
<b>Weight</b>	Approximately 9.64 kg (21.25 lbs)
<b>Dimensions (L x W x H)</b>	99 x 19 x 62 cm (38.98 x 7.48 x 24.41 inches)
<b>Tube Diameter</b>	30 mm

## 9. WARRANTY INFORMATION

---

This Lampa product is covered by the standard manufacturer's warranty. For specific details regarding warranty terms, conditions, and duration, please refer to the warranty card included in your original product packaging. Alternatively, you may contact Lampa customer support directly for assistance.

## 10. CUSTOMER SUPPORT

---

For technical assistance, inquiries about spare parts, or to process a warranty claim, please contact Lampa customer support. You can typically find contact information on the official Lampa website or within the documentation provided with your product.
