# Skyflame 8-Piece Ceramic Wood Log Set Instruction Manual

Model: B07DC35FM8

Brand: Skyflame

## INTRODUCTION

This manual provides detailed instructions for the proper setup, operation, and maintenance of your Skyflame 8-Piece Ceramic Wood Log Set. Designed for use in various indoor and outdoor gas fireplaces and fire pits, these ceramic logs offer a realistic wood-burning aesthetic without the smoke, ash, or soot of real wood. Please read all instructions carefully before use to ensure safe and optimal performance.

## PRODUCT FEATURES

- Set Contents:** 8 ceramic logs, including 2 pieces of 12.5 inches, 2 pieces of 4.5 inches, and 4 pieces of 7.5 inches.
- Realistic Appearance:** Ceramic fiber gas logs designed to mimic the look of real wood logs, including orange/red hot spots when burning.
- Versatile Use:** Compatible with ventless gas fireplaces, outdoor gas fireplaces, indoor gas fireplaces, direct vent, zero clearance, natural gas, gel, standard fire pits, fake fireplaces, electric fireplace inserts, and propane fireplaces.
- Clean Burning:** Burns cleanly without polluting the air with ash, soot, debris, or residue.
- Quick Cooling:** Designed to cool quickly for enhanced safety.
- Complementary Use:** Can be used to enhance existing gas logs, firelogs, crackle flame firelogs, fire starters, glowing embers, and lava rocks.

## SETUP INSTRUCTIONS

The Skyflame ceramic logs are designed for flexible arrangement to suit various fireplace and fire pit configurations. Follow these guidelines for optimal placement:

- Unpacking:** Carefully remove all logs from their packaging. Inspect each log for any damage.
- Base Layer:** Place the larger logs at the bottom of your fireplace or fire pit grate. Ensure they are stable and provide a sturdy base for smaller logs.
- Arrangement:** Arrange the remaining logs in a natural-looking stack or pyramid. You can experiment with different patterns to achieve your desired aesthetic.
- Igniter Clearance:** Ensure that no logs directly cover the gas igniter or burner ports. Adequate space is necessary for proper ignition and flame distribution.
- Flame Path:** Position logs to allow flames to dance between them, creating a realistic and visually appealing effect. Avoid stacking logs too tightly, which could restrict airflow.

## OPERATING INSTRUCTIONS

Once the logs are properly arranged and your gas fireplace or fire pit is ready for operation, follow the manufacturer's instructions for your specific gas appliance to ignite the flames. The ceramic logs will begin to heat up and develop realistic orange/red hot spots, enhancing the ambiance of your fire.

- **Initial Burn:** Allow the logs to heat up for several minutes to achieve their full realistic glow.
- **Adjusting Logs:** If you need to adjust the logs while the fire is active, use appropriate heat-resistant tools, such as fireplace tongs, to avoid burns. It is recommended to make major adjustments when the logs are cool.
- **Safety:** Always ensure proper ventilation as per your gas appliance's guidelines. Never leave an active fire unattended.

## MAINTENANCE

Skyflame ceramic logs are designed for durability and easy maintenance. To keep your logs looking their best and functioning optimally:

- **Cleaning:** Periodically, when the logs are completely cool, you may gently brush off any accumulated dust or debris. For a more thorough cleaning, you can rinse them with water and allow them to air dry completely in the sun before placing them back in your fireplace or fire pit.
- **Storage:** If storing the logs for an extended period, ensure they are clean and dry. Store them in a safe place where they will not be subject to impact or extreme temperatures.
- **Inspection:** Regularly inspect logs for any signs of damage or wear. While durable, ceramic can crack if subjected to severe impact. Replace any damaged logs to maintain safety and aesthetic appeal.

## TROUBLESHOOTING

The Skyflame ceramic logs are passive decorative elements and do not typically require troubleshooting. If you experience issues with your fireplace or fire pit, such as improper ignition or flame patterns, please refer to the instruction manual for your specific gas appliance or consult a qualified technician. Ensure logs are not obstructing gas flow or igniter components.
