## Diversitech MP-2C

# Diversitech MP-2C Anti-Vibration Pad User Manual

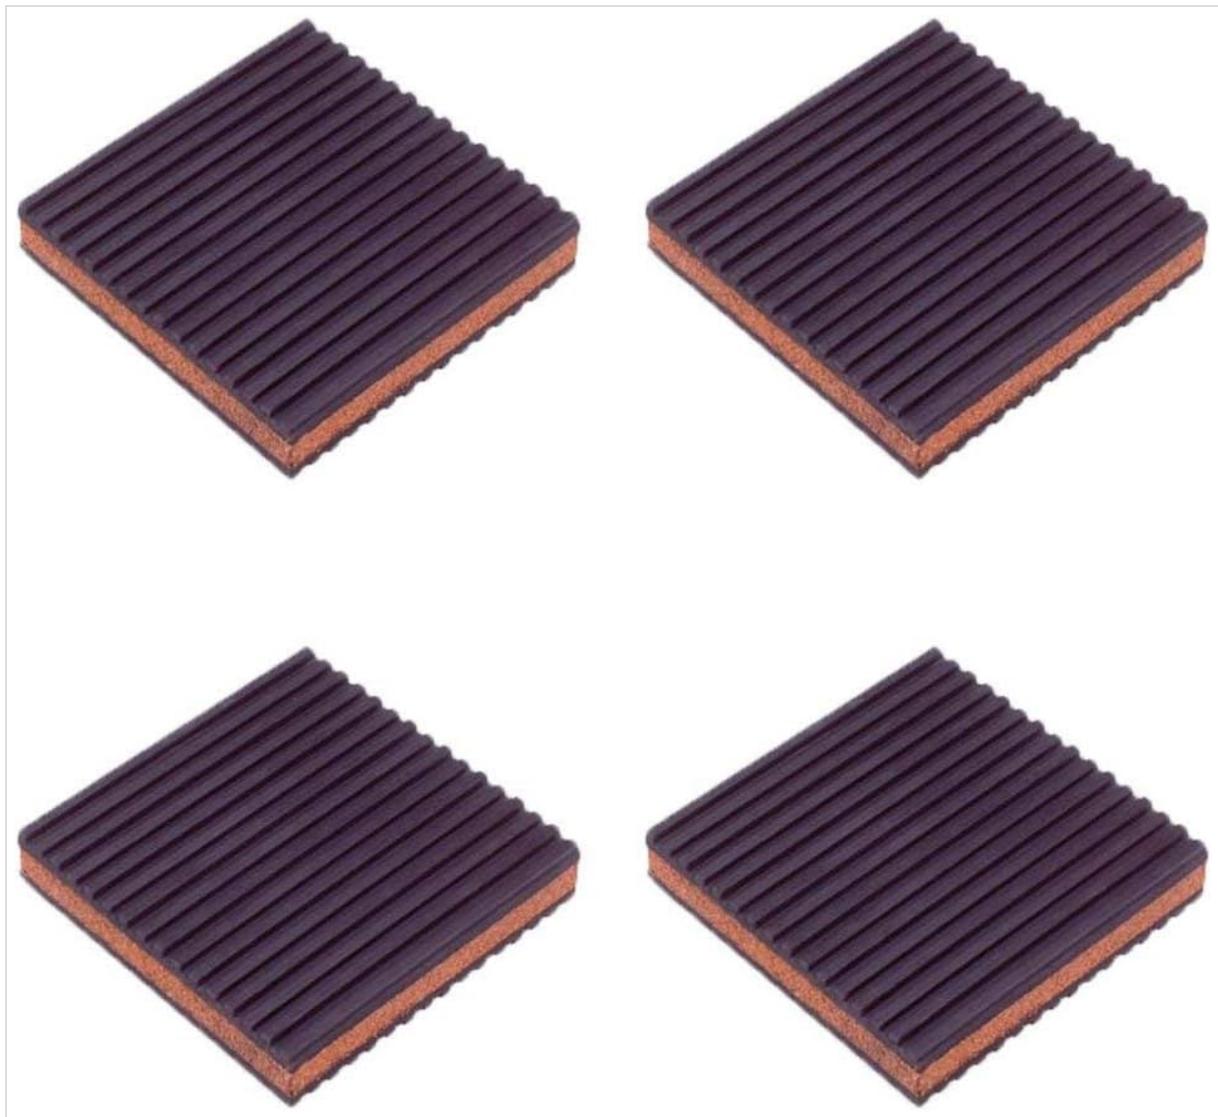

Model: MP-2C | Brand: Diversitech

## INTRODUCTION

This manual provides instructions for the proper installation, use, and maintenance of the Diversitech MP-2C Anti-Vibration Pads. These pads are designed to reduce noise and vibration caused by various equipment, improving operational stability and extending the lifespan of machinery and surrounding structures.

## PRODUCT OVERVIEW

The Diversitech MP-2C Anti-Vibration Pads are engineered to provide effective vibration isolation. Each pad features a durable, ribbed rubber top layer and a dense, resilient foam base, working together to absorb and dissipate vibrations. They are suitable for a wide range of applications, including HVAC equipment, washing machines, dryers, and other machinery prone to vibration.

This image displays four individual Diversitech MP-2C anti-vibration pads. Each pad is square, featuring a dark gray, ribbed rubber top layer designed for grip and vibration absorption. Beneath the rubber layer is a reddish-brown, dense foam material that further aids in dampening vibrations and providing stability. The pads are shown from an elevated angle, highlighting their two-layer construction.

## SETUP AND INSTALLATION

Follow these steps for optimal installation of your Diversitech MP-2C Anti-Vibration Pads:

- 1. Prepare the Surface:** Ensure the surface where the equipment will rest is clean, dry, and level. Remove any debris or obstructions.
- 2. Position the Pads:** Place one anti-vibration pad directly under each foot or corner of the equipment. For best results, distribute the weight evenly across all pads.
- 3. Align Equipment:** Carefully lower the equipment onto the pads, ensuring that each foot or corner is centered on its respective pad.
- 4. Verify Stability:** Gently push or rock the equipment to confirm it is stable and does not wobble. Adjust pad placement if necessary.
- 5. Check for Clearance:** Ensure there is adequate clearance around the equipment for proper airflow and operation, especially for HVAC units.

*Note:* For heavy equipment, it is recommended to have assistance during installation to prevent injury or damage.

## OPERATING PRINCIPLES

---

The Diversitech MP-2C pads function by creating a barrier between the vibrating equipment and the supporting surface. The ribbed rubber top layer provides a non-slip grip and initial vibration absorption, while the underlying dense foam layer further dampens and isolates structural vibrations. This dual-layer design effectively reduces noise transmission and prevents equipment movement, contributing to a quieter and more stable environment.

## MAINTENANCE

---

These anti-vibration pads require minimal maintenance. Follow these guidelines to ensure their continued effectiveness:

- **Regular Inspection:** Periodically inspect the pads for any signs of wear, cracking, or degradation. For equipment that is frequently moved or subject to harsh conditions, inspect more often.
- **Cleaning:** If necessary, clean the pads with a damp cloth and mild soap. Avoid using harsh chemicals or abrasive cleaners, as these can damage the material. Ensure pads are completely dry before re-positioning equipment.
- **Replacement:** If pads show significant signs of wear or damage, replace them to maintain optimal vibration isolation performance.

## TROUBLESHOOTING

---

If you experience issues after installing the anti-vibration pads, consider the following:

- **Vibration Persists:**
  - Ensure pads are correctly positioned directly under each support point of the equipment.
  - Verify that the equipment's weight is evenly distributed across all pads.
  - Check if the equipment itself has internal issues causing excessive vibration that pads cannot fully mitigate.
- **Equipment Wobbles:**
  - Confirm the underlying surface is level. Use shims if necessary to level the surface before placing pads.
  - Ensure pads are not damaged or unevenly compressed.
- **Pads Displace:**
  - Ensure the equipment feet are centered on the pads.
  - Verify the pads and equipment feet are clean and free of slippery residues.

## SPECIFICATIONS

---

<b>Model Number</b>	MP-2C
<b>Dimensions (each pad)</b>	2.01 x 2.01 x 0.87 inches (approximately 2" x 2" x 7/8")
<b>Item Weight (per pack of 4)</b>	3.2 ounces
<b>Quantity</b>	4 pads per pack

**Manufacturer**

Diversitech

## **WARRANTY AND SUPPORT**

For specific warranty information or technical support regarding your Diversitech MP-2C Anti-Vibration Pads, please contact Diversitech directly. You can often find contact details and additional resources on the official Diversitech website or through your product retailer.

Visit the [Diversitech Store on Amazon](#) for more products and information.
