BWT Soft Filtered Water Extra Filter Cartridges User Manual

Model: soft_extra_kartuschen_parent

1. INTRODUCTION

The BWT Soft Filtered Water Extra cartridges are designed to enhance your tap water by reducing hardness and improving taste. These cartridges are specifically formulated for areas with very hard water, offering extra protection against limescale for your household appliances.

Each cartridge effectively reduces water hardness, heavy metals such as lead and copper, and substances like chlorine that can impair odor and taste. With a capacity of approximately 120 liters or a lifespan of 4 weeks, these cartridges provide a convenient solution for filtered water.

BWT filter cartridges are compatible with BWT and Brita Maxtra (excluding Maxtra+) table water filter jugs, as well as other compatible systems.

2. SETUP AND INSTALLATION

1. **Preparation:** Remove the new filter cartridge from its packaging.
2. **Rinsing:** Submerge the cartridge completely in cold tap water for approximately 5 minutes. This helps to remove any air bubbles and prepare the filter material.
3. **Insertion:** Insert the prepared cartridge firmly into the funnel of your compatible water filter jug. Ensure it is seated correctly to prevent unfiltered water from bypassing the filter.
4. **Initial Filtration:** Fill the jug with tap water and allow it to filter through. Discard the first two filtered fills. This primes the filter and removes any loose carbon particles.
5. **Ready for Use:** Your BWT filter cartridge is now ready to provide filtered water.

3. OPERATING INSTRUCTIONS

Using your BWT filter cartridge is straightforward:

1. **Fill the Jug:** Pour cold tap water into the top section (funnel) of your water filter jug.
2. **Filter Process:** Allow the water to pass through the BWT filter cartridge into the main reservoir of the jug. This process may take a few minutes.
3. **Serve:** Once filtered, the water is ready for consumption or use in appliances.

acqua più dolce per un piacere puro.

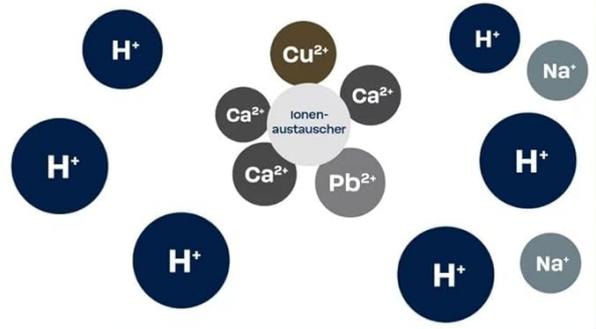

Image 3: Enjoying soft filtered water. This image shows a glass of clear, filtered water, emphasizing the improved quality.

4. MAINTENANCE AND REPLACEMENT

To ensure optimal filtration performance and water quality, regular maintenance and timely cartridge replacement are crucial.

- **Cartridge Lifespan:** Replace the BWT Soft Filtered Water Extra cartridge every 4 weeks or after filtering approximately 120 liters of water, whichever comes first.
- **Jug Cleaning:** Regularly clean your water filter jug according to its manufacturer's instructions. This prevents the buildup of residue and maintains hygiene.
- **Storage:** Store unused cartridges in their original, sealed packaging in a cool, dry place away from direct sunlight.

La resina a scambio ionico riduce il calcare e assorbe alcuni metalli pesanti.

Un filtro fine trattiene le particelle.

Il granulato di carbone attivo assorbe le impurità e le sostanze che alterano odore e sapore.

Lo scambiatore ionico riduce il calcare e assorbe alcuni metalli pesanti.

Il filtro fine impedisce il rilascio di particelle nell'acqua filtrata.

Image 4: Internal filter technology. This diagram illustrates the multi-stage filtration process, including ion exchange resin and activated carbon, which reduce limescale and impurities.

5. TROUBLESHOOTING

- **Slow Filtration:** If water filters slowly, ensure the cartridge is properly seated. If the issue persists, the cartridge may be nearing the end of its life or is clogged, requiring replacement.
- **Unusual Taste or Odor:** If the filtered water develops an unusual taste or odor, replace the cartridge immediately. This indicates the filter media is exhausted.
- **Water Bypassing Filter:** If water appears to be flowing around the cartridge rather than through it, remove and re-insert the cartridge, ensuring a tight seal in the jug's funnel.
- **Visible Particles:** A few black carbon particles may appear in the first few fills after installation. This is normal and harmless. Discard these fills as per setup instructions. If particles persist, re-rinse the cartridge.

6. SPECIFICATIONS

Feature	Detail
Model Number	soft_extra_kartuschen_parent
Material	Plastic
Product Dimensions	11.81"D x 2.4"W x 4.88"H
Item Weight	360 Grams (12.7 ounces)
External Testing Certification	BWT
Product Benefits	Reduces Chlorine, Water Hardness, Heavy Metals (Lead, Copper)
Capacity per Cartridge	Approx. 120 liters / 4 weeks
Compatibility	BWT and Brita Maxtra (NOT Maxtra+) Table Water Filter Jugs
Number of Items (in this pack)	3

7. WARRANTY INFORMATION

BWT products are manufactured to high-quality standards. For specific warranty details regarding your BWT filter cartridges, please refer to the information provided on the product packaging or visit the official BWT website. Keep your proof of purchase for any warranty claims.

8. SUPPORT AND CONTACT

Should you have any questions, require assistance, or need further information about your BWT Soft Filtered Water Extra cartridges, please contact BWT customer support.

- **Online:** Visit the official BWT website for FAQs, product information, and contact forms.
- **Retailer:** Contact the retailer from whom you purchased the product.
